## Why questions are asked

Your answers are combined with those of other Canadian farmers to track trends, provide insight and measure the health of this vital industry once every five years. For instance:

- Census information on livestock counts, crop area and types of crops planted gives a historical picture of the change in Canadian agriculture over time
- The census collects information on minimum and no-till seeding, organic products, new crops or livestock and other innovations in agriculture
- It tracks partnerships and corporations, computer use and major farm expenses to paint a statistical picture of the business of farming.

## But why in May?

Statistics Canada recognizes that, for farmers, mid-May is one of the busiest times of the year as they rush to get crops in the ground. However, collecting the data at the same time as the Census of Population and combining public awareness campaigns — even though the two censuses are very different — streamlines procedures and saves millions of dollars.

Conducting the two together also provides the opportunity to show the human side of agriculture. When the two censuses are conducted at the same time, it is possible to provide a wealth of information on the social and economic characteristics of the farm population such as marital status, level of schooling, major field of study, labour force activity and sources of income.

## Who uses Census of Agriculture data?

Census data gives all players in agriculture an equally reliable source of information. Farm organizations, government departments, agriculture service providers and academics all depend on the Census of Agriculture to understand and respond to change in agriculture.

## The law protects what you tell us

The confidentiality of your census questionnaire is protected by law. All Statistics Canada employees have taken an oath of secrecy. Your personal census information cannot be given to anyone outside Statistics Canada. This is your right. Your census questionnaire will be retained in accordance with legislative requirements and will be stored securely.
