Coverage: Respondents who had more than one employer.

Note: This variable is for the second employer information for the respondent during the reference period for the survey (other than the ROE employer). It is based on a number of factors: 1. whether the respondent reported any additional job(s); 2. whether the respondent was currently working at any additional job(s), if more than one additional job was reported; and 3. the job with the longest duration of employment, if more than one job was reported. Note that a current job, regardless of the duration of employment, was always selected as the second employer information for the file over a previous job that may have been of longer duration.

Coverage: Respondents who are not currently working for the second employer.

Note: This variable is for the second employer information for the respondent during the reference period for the survey (other than the ROE employer). It is based on a number of factors: 1. whether the respondent reported any additional job(s); 2. whether the respondent was currently working at any additional job(s), if more than one additional job was reported; and 3. the job with the longest duration of employment, if more than one job was reported. Note that a current job, regardless of the duration of employment, was always selected as the second employer information for the file over a previous job that may have been of longer duration. For the variable E2GRSSTP, if the respondent went back to the ROE job, then the job ended again later, we did not ask why the job ended the second time; we only asked why the job ended at the time of the ROE.
