Coverage: Respondents who had more than one employer and were not self-employed, and who worked 4 weeks or more during the REFERENCE PERIOD.

Note: This variable is for the second employer information for the respondent during the reference period for the survey (other than the ROE employer). It is based on a number of factors: 1. whether the respondent reported any additional job(s); 2. whether the respondent was currently working at any additional job(s), if more than one additional job was reported; and 3. the job with the longest duration of employment, if more than one job was reported. Note that a current job, regardless of the duration of employment, was always selected as the second employer information for the file over a previous job that may have been of longer duration.

Variable Name: **E2GB27** *Position:* 212 *Length:* 1
Collection Name: QB27
