Employment Insurance Coverage Survey, 2003

Release Questionnaire

Section: Introduction

INTRO Hello, I am calling from Statistics Canada. My name is.... We are conducting a survey to find out about Employment Insurance coverage of people in different situations. This information will help Human Resources Development Canada make decisions about how Employment Insurance money should be spent to assist people. Your answers to this survey will NOT in any way affect your eligibility for Employment Insurance or the benefits you receive. Your answers to this voluntary survey are important and will be kept confidential under the Statistics Act. My supervisor may listen in to evaluate the survey.

Note: During the development of the application variables are set, created and calculated. In order to instruct the programmer easily, certain variables are given shortened names. Here is the list of descriptions and their shortened names. REF MO - reference month, LWM/LWY - last worked month and year, if LWY is 1901 - LWY = Never worked, TYPE - type of respondent (1 to 5), WRK - whether worked reference week, COWMJ/COWOJ - class of worker main job/other job, ERNAM - employer name, RSWK - reason stopped working at last job, HJRWK - whether had job during reference week, RARWK - reason of absence during reference week, BY - birth year of child, BM - birth month of child, SPPR - spouse present in household, MULTF - whether a multi or single case family, MULT - multiple household, LFS - labour force status, SALMIN - minimum salary per hour for respondent's province of residence, MOTHER - respondent identified as mother of a child aged 12 months or less (1=yes, 0=no).
