Employment Insurance Coverage Survey, 2004

Release Questionnaire

Section: Introduction

INTRO We are conducting a survey to find out the Employment Insurance Coverage of people in different situations. (This information will help Human Resources and Skills Development make decisions about how employment insurance money should be spent to assist people.)

Your answers to this voluntary survey are important and will be kept confidential under the Statistics Act. (Your answers to this survey will NOT in any way affect your eligibility for Employment Insurance or the benefits you receive.)

Note: Coverage statements are provided throughout the questionnaire with the exception of the Confirm Mother Status (MO), Confirm Type (TY), Last Work (LW) and Out of Scope (OS) modules. These modules confirm or update the respondent's situation which determines if the respondent is in-scope or not. Throughout the questionnaire, we will be using the abbreviations DK for "Don't Know" and RF for "Refused".

The past tense was used throughout this questionnaire for most questions because the reference period is in the past. In Job Information section (JB), the questions were asked in past tense unless the respondent confirmed their work status, then the questions were asked in present tense. In section called Work in Last Year (WY), some questions for regular population refer to the year before the survey reference month. For mothers, some questions refer to 12 months prior the birth/adoption of the child. In Employment Insurance section (EI), most questions for the regular population refer to the Labour Force Survey reference week. For mothers, most questions focus on the entire period since the birth or adoption of their child. In Parental Benefits section (PB), some questions were asked in past tense if the age of the child is greater than 10 months. Otherwise, the appropriate tense (present and future) was used.

During the development of the application variables are set, created and calculated. In order to instruct the programmer easily, certain variables are given shortened names. Here is the list of descriptions and their shortened names. REFMO - reference month, LWM/LWY - last worked month and year, if LWY is 1901 - LWY - Never worked, TYPE - type of respondent (1 to 5), WRK - whether worked reference week, COW - class of worker main job, ERNAME - employer name, RSWK - reason stopped working at last job, BYEAR - birth year of child, BMTH - birth month of child, SPPR - spouse present in household, MULTF - whether a multi or single case family, MULTINC - multiple household, LFS - labour force status, SALMIN - minimum salary per hour for respondent's province of residence, MOTHER - respondent identified as mother of a child aged 12 months or less, SRYR - survey year, LWP - last worked period, FAMSZ - family size, RELHD - relationship to head of household, RAGE - age of respondent, SALRYHR - salary per hour.
