Variable Name: **TYPE** *Position:* 14 *Length:* 1

Survey type as determined for the EICS

		FREQ	WTD
1	Unemployed during LFS reference week	2,307	1,410,154
2	Employed less than 30 usual hours during reference week	4,831	2,986,256
3	Not in the labour force during reference week	3,856	2,349,915
4	Working full-time during ref. wk. with an interruption - last 3 months	398	228,853
5	Mothers of infants working in reference week	120	43,853
		=====	=====
		11,512	7,019,031

Coverage: All respondents

Note: In a few cases a person could fall into more than one group. The priority sequence is TYPE 5 then TYPE 2 and TYPE 4. Mothers of infants can have TYPE=1, 3 or 5. Mothers absent from work in reference week will have TYPE=3 even though they have a job. They were treated the same way as other type 3's for the purposes of survey operations because they considered themselves "not working and not looking for work" when responding to questions in the interview. TYPE=4 is composed of full-time workers who have experienced an interruption of work in the three months prior to the reference period.

Coverage: Respondents who did not receive benefits for the reference week, or at all since birth or adoption for mothers

Note: Based on EICS questions EI_Q14, EI_Q16, EI_Q17 and JB_Q21. Generally, this variable reflects the answer provided by the respondents as the reason for not receiving or claiming benefits. People who have not worked in two years or more were coded to '11' unless they provided a different reason for not receiving or claiming benefits. This category is also composed of respondents who have recent work experience according to other information collected from them but still believed that they were not eligible for benefits because they had not worked recently. Other survey variables were also used when the reason provided was vague. This increased the usefulness of the variable by reducing the number of observations in the categories "Other" and "Not Stated". People who were self-employed or did not pay EI premiums in their previous job were coded to category 02, unless they provided a different reason for not receiving benefits. Similarly, people working in the reference week in a paid job were coded to category 01.

		=====	=====
		11,512	7,019,031

Coverage: Respondents who were not working during the reference week and worked in the past two years or were looking for work

Note: Based on EICS derived variables BENEFIT, RNBENRW, RSWORK, and HOURS. Persons who received benefits are assigned a value of 1, 2, 3 or 4 as appropriate. Then, people who have not worked in the last year are assigned a value of 11 or 12. Respondents who were self-employed in the last year or in a job where Employment Insurance premiums were not deducted from their pay are assigned a value of 10. Respondents who left their job to return to school or for other reasons not deemed valid for the Employment Insurance Act are then identified and assigned a value of 8 or 9. Lastly, when no other information was available to determine eligibility, an estimate of hours worked in the reference week was used (700 hours guarantees eligibility in all regions of the country for paid employees contributing to the program). In COVERAGE, those who did not receive Employment Insurance benefits despite likely being eligible are all included in a single category. In COV (only available from the master file), a distinction is made between those who made a claim and those who didn't.
