1986 Family Food Expenditure Survey
Public Use Microdata File

Family Expenditure Surveys Section
Household Surveys Division
March 22, 1988

INTRODUCTION

This public-use microdata tape is the second available using Canadian Family Food Expenditure Survey data. The survey was carried out throughout 1986.

The Family Food Expenditure Survey of 1986 is the first since 1984. The 1986 survey was designed to provide information for families and unattached individuals (spending units) living in private households in the ten provinces of Canada as well as Whitehorse and Yellowknife. In contrast, the coverage of the 1984 survey only included 17 major cities in Canada. For confidentiality reasons, data from Charlottetown and Summerside were excluded from the 1984 file. Users should note that data on full budget expenditure for 1986 were collected in a separate survey. The Food Survey had the same coverage as the Survey of Family Expenditure of 1986. A public-use tape will be produced of the Survey of Family Expenditure. Records from Whitehorse and Yellowknife have been excluded from both the 1986 files.

This documentation of the tape is intended to help users interpret food expenditure data correctly. Following the introduction is the section on the public-use microdata summary file which is split into three sub-sections. The first sub-section is the technical characteristics of the summary file which provides a physical description of this file. This is followed by the record layout. The record layout gives the basic content of the summary file with the names of the items, their field number and position on the file. The summary file contains the spending unit (SU) description, income, and summary expenditure information. There is one record for each weekly diary reported (a maximum of two per spending unit). The section called "Variable Descriptions of the Summary File" gives the components of each item, the area in the questionnaire or diary from which the variable was derived, and clarifying notes if needed.

Following the information on the summary file is information on the detailed item file. This data set records the items purchased (expenditures and quantities). The technical characteristics and the record layout of this file are followed by the "Variable Descriptions of the Detailed Item File". The total of the purchases of an item by an SU in a week in a type of store constitute one record. If an SU made no purchases of an item no record will be present for that item.

Appendix A shows summary family food expenditure information by region and family income. These tables show information before and after the reweighting and changes to some variables, which were done to safeguard the identity of respondents. Also, to illustrate the effect of the complex sample design, the standard errors for average expenditures are shown based on a technique which allows for the sample design.

Appendix B shows the 1986 Detailed Food Codes which were used in the detail item file and the units of measure for the items. Also in this table are the average expenditures and quantities calculated after reweighting.

Copies of the questionnaires used to collect the expenditure data are included with the package. There are three documents in each official language. The household control card (FE 1) was used to list all members of the household along with some of their characteristics. The questionnaire or schedule (FE 2) was used to collect selected socio-economic characteristics (including income) of the SU, as well as purchasing habits and food expenditures while away from home last month. The diary (FE 3) was used to collect detailed quantity and expenditure information on the day-to-day purchases of food by the spending unit.

It is recommended that, as well as reading this documentation, users read the copy of "Family Food Expenditure in Canada, Catalogue 62-554" which contains further information on the survey as well as tabulated results. A copy of the User's Guide for 1986 is included with each tape.

VARIABLE DESCRIPTIONS OF THE SUMMARY FILE

LOCATION

IDENTIFICATION NUMBER

This variable is a unique five-digit number which identifies each spending unit on the file. The numbers begin at 00001 and end at 10919. Duplicate record numbers will be on the file for all records with two completed diaries. The file is sorted by geographic code (field 5) and income before taxes (field 39) (i.e. income within geographic code). The size of residence code and the geographic code were made equal to zero for 20 extreme income records. These records will be numbered 00001 to 00010. The lowest income in the Atlantic provinces will have number 00011 and the highest income in British Columbia would have the largest identification number.

WEEK

Code	Classification
1	Diary completed during the first week after the interview
2	Diary completed during the second week

QUARTER

Code	Classification
1	Quarter 1 January February March
2	Quarter 2 April May June
3	Quarter 3 July August September
4	Quarter 4 October November December

FOOD SURVEY WEIGHT

In order to provide estimates applicable to the population in the ten provinces, it is necessary to weight each record by a weighting factor. This weighting factor reflects the variation in sampling and response rates between geographic areas and spending unit types. As compared with previously released results, records have been reweighted to mask location within region and size of area of residence categories. The reweighting process has attempted to minimize the differences between the averages and aggregates before and after reweighting. The revised weights were formed where necessary by swapping the weights between records within geographical areas. As was noted in the description of the identification number the geographic code and size of residence codes of 20 records were suppressed. The weights of these records were also adjusted. Tabulations of average income and expenditure by various classifying variables before and after the reweighting of records are presented in Appendix A. The differences in the values are attributable to the reweighting of records.

GEOGRAPHIC CODE (Region)

Code	Classification
0	Extreme Income Record
1	Atlantic Provinces includes Newfoundland Prince Edward Island Nova Scotia New Brunswick
2	Quebec
3	Ontario
4	Manitoba and Saskatchewan
5	Alberta
6	British Columbia

SIZE OF AREA OF RESIDENCE

Code	Classification
0	Extreme Income Record
1	Urban Areas with Population of 100,000 or More
2	Urban Areas with Population of 30,000 - 99,999
3	Urban Areas with Population Less than 30,000 (1)
4	Rural Farm
5	Rural Non-farm

Size of Area of Residence

Spending units are located in specific areas of residence at the time of the survey. (2) These areas are of three basic kinds. The first kind

are those represented by a sample of its own population, which in the Labour Force (LFS) frame are called Self-representating Units (SRU's). The second kind form part of a wider grouping of rural or smaller urban areas outside the SR areas, in which specific areas would not necessarily be represented by its own population. These are called Non-self-representing Units (NSRU's). The third kind are called Special Areas and comprise hospitals, military establishments, institutions and remote areas. SRU's, with a few exceptions, have the 1981 Census boundary of either a census metropolitan area (CMA), a census agglomeration (CA), or a single municipality (which is not part of a CMA or CA). SRU's have for family expenditure data users been delineated to size of area of residence classification according to the 1986 population (1986 boundary) of the CMA, CA or single municipality which they wholly or partly form. (3) Special Areas were classified in the appropriate size of area of residence category.

-
- (1) Some areas in this category are defined by Census as rural.
 - (2) During part or all of the survey reference year some spending units could have been located in a different area.
 - (3) Specific assignments for the 100,000 or more, and the 30,000 to 99,999 groups are shown in the appended chart.

POPULATION 100,000 OR MORE

St. John's	Kitchener-Waterloo
Sydney-Sydney Mines	London
Halifax	Oshawa
Moncton	St. Catharines-Niagara
Saint John	Sudbury
Quebec	Thunder Bay
Montreal	Windsor
Hull	Winnipeg
Sherbrooke	Regina
Chicoutimi-Jonquiere	Saskatoon
Trois-Rivieres	Calgary
Ottawa	Edmonton
Kingston	Vancouver
Toronto	Victoria
Hamilton-Burlington	

POPULATION 30,000 - 99,999

Corner Brook	Chatham
Charlottetown-Summerside	Guelph
Truro	Barrie
Bathurst	Orillia
New Glasgow	Midland & Penetanguishene
Fredericton	Sault Ste. Marie
Rimouski	North Bay
Thetford Mines	Timmins
Shawinigan	Brandon
Drummondville	Moose Jaw
Victoriaville	Prince Albert
St. Jean	Medicine Hat

Saint Hyacinthe	Lethbridge
Granby	Red Deer
Valleyfield	Fort McMurray
St.-Jerome	Kelowna
Rouyn	Vernon
Sorel	Penticton
Joliette	Kamloops
Baie Comeau	Chilliwack
Cornwall	Matsqui/Mission
Brockville and Prescott	Nanaimo
Peterborough	Prince George
Belleville	Port Alberni
Trenton	Courtenay & Comox
Brantford	Williams Lake
Sarnia	

15 CITY INDICATOR

Code	Classification
0	Not one of 15 cities
1	One of 15 cities (see list below)

Note:

The 15 cities are included in the Public Use Microdata File, Food Expenditure Survey - selected cities - 1984.

The cities are:

St. John's	Winnipeg
Halifax	Regina
Saint John	Saskatoon
Quebec	Calgary
Montreal	Edmonton
Ottawa	Vancouver
Toronto	Victoria
Thunder Bay	

HOUSING

LIVING QUARTERS OCCUPIED BY SU

Code	Classification
1	Single House
2	Semi-detached or Double House
3	Row House
4	Duplex
5	Apartment
6	Other

Source:

FE2 (schedule) Section B. Characteristics of Dwelling Occupied by SU, question 1.

CLASS OF TENURE

Code	Classification
1	Homeowner Without Mortgage
2	Homeowner With Mortgage
3	Tenants - Regular
4	Tenants - Roomers and Rent-free

Source:

FE2 (schedule) Section B. Characteristics of Dwelling Occupied by SU, question 2.

CHARACTERISTICS OF HEAD

Note:

Spending unit head. Normally the reference person is the spending unit head. In married-couple families with or without never married children, if the reference person's income before tax was a positive value less than \$11,000 and the spouse of the reference person had income more than 1.5 times that of the reference person or if the reference person had income before taxes of zero and the spouse had non-zero income, then the spouse became the head. If the income was not stated for the SU, then the reference person was the head. For the definition of reference person, see the FE2 (schedule) Section A - SU Composition, question (column) 1.

MARITAL STATUS

Code	Classification
1	Married (or living Common-Law)
2	Single (Never Married)
3	Other

Source:

FE2 (schedule) Section A. SU Composition, question (column) 6.

Note:

To be classified as married the spouse must be a member of the spending unit. Even if the head was legally married the marital status would be "other" if there was no spouse present.

AGE

Code	Classification
20	Age 20 years and under
21-75	Actual age
76	Age 76 years and over

Source:

FE2 (schedule) Section A. SU Composition, question (column) 4.

SEX

Code	Classification
1	Male
2	Female

Source:

FE2 (schedule) Section A. SU Composition, question (column) 5.

EDUCATIONAL LEVEL

Code	Classification
1	Less Than 9 Years of Elementary Education
2	Some or Completed Secondary Education
3	Some Post-secondary Education
4	Post-secondary Certificate or Diploma
5	University Degree
6	Not stated

Source:

FE2 (schedule) Section A. SU Composition, question 13.

OCCUPATION

Code	Classification
1	Managerial and Administrative
2	Professional and Technical
3	Teaching
4	Clerical
5	Sales
6	Services
7	Farming, Fishing, Forestry and Logging Operations
8	Mining, Processing and Machining
9	Product Fabricating, Assembling and Repair
10	Construction
11	Other Occupations
12	Not Working, Including Retired
13	Not Stated

Source:

FE2 (schedule) Section A. SU Composition, question (column) 7.

Note:

The code is determined by the occupation for the longest period during the 12 months preceding the interview. If the person was not working or retired for the longest period but not the full year then the classification would not be 12 but one of the other codes. The codes are determined as per the Standard Occupational Classification (S.O.C.) code:

see following page

EXPLANATION OF OCCUPATION GROUPS

Code	Classification
	- Major Groups (codes and classifications from S.O.C.)
1	Managerial and Administrative
	- 11 Managerial, Administrative and Related Occupations
2	Professional and Technical
	- 21 Occupations in Natural Sciences, Engineering & Mathematics
	- 23 Occupations in Social Sciences and Related Fields
	- 25 Occupations in Religion

FE2 (schedule) Section A. SU Composition, question 16.

COUNTRY OF BIRTH

Code	Classification
0	No spouse
1	Canada
2	United States, United Kingdom and North and West Europe
3	South and East Europe
4	Other

Source:

FE2 (schedule) Section A. SU Composition, question 15.

SPENDING UNIT DESCRIPTION

FAMILY COMPOSITION

Code	Classification
1	Unattached individuals
2	Married couple only
3	Married couple family only with single children only
4	Married couple family with other relatives only
5	Married couple family with unrelated persons
6	Lone-parent family only
7	Other SU with relatives only
8	Other SU with unrelated persons

Source:

FE2 (schedule) Section A. SU Composition, question (column) 3, 4 and 6.

Note:

to be a married couple family, the head and the spouse must have been members at the time of interview;
to be a lone-parent family (Code 6) there must have been only one parent a member at the time of interview;
codes 3 and 6 consist only of parent(s) and never married sons and daughters.

TOTAL SPENDING UNIT SIZE

Code	Classification
1-9	Actual Size
10	10 or more persons

This includes...

Total Adults 65 Years and Over
Total Adults 16 to 64 Years
Total Children 5 to 15 Years
Total Children under 5

Source:

FE2 (schedule) Section A. SU Composition, question (column) 4.

Note:

includes all persons who were members of the spending unit at the time of the interview, even though they may not be present during the interview. The age is as of the day of the interview.
the above variables were adjusted if the S.U. size was greater than ten.

NUMBER OF PERSONS AT HOME

Source:

FE2 (schedule) Section A. SU Composition, question (column) 4.

FE3 (diary) page 21, question 2.

Note:

the number of persons in the family adjusted for the number of nights any members spent away from home overnight or longer during the survey week.

this field has two implied decimals.

NUMBER OF FULL-TIME EARNERS

Code	Classification
0-2	Actual number of full-time earners
3	3 or more full-time earners

Source:

FE2 (schedule) Section E. Personal Income in the past 12 months, question 1.

Note:

a full-time earner is one who has worked more than 48 weeks, of which at least 25 weeks must be full-time employment.

NUMBER OF PART-TIME EARNERS

Code	Classification
0-3	Actual number of part-time earners
4	4 or more part-time earners

Source:

FE2 (schedule) Section E. Personal Income in the past 12 months, question 1.

Note:

A part-time earner is one who has worked between 1 and 48 weeks, or less than 25 weeks as a full-time earner if he works more than 48 weeks.

ECONOMIC FAMILY UNIT CODE

Code	Classification
1	SU is an EF Unit
2	SU is not an EF Unit

Note:

Code 2: Not an economic family unit in this context is one or more of following:

there is at least one person in the SU who is not related to the head by blood, marriage or adoption;
the SU formed only part of an economic family, that is, the economic family comprised two or more spending units;

HOUSEHOLD CODE

Code	Classification
1	SU is the complete household
2	SU is only part of household

Note:

To be the complete household the spending unit must comprise the entire household at the time of survey.

U.I.C. INDICATOR

Code	Classification
0	No member of the SU received U.I.C. benefits
1	At least one member of the SU received U.I.C. benefits

Source:

FE2 (schedule) Section E. Personal Income in the past 12 months, question 12.

SOCIAL ASSISTANCE INDICATOR

Code	Classification
0	No member of the SU received social assistance benefits
1	At least one member of the SU received social assistance benefits

Source:

FE2 (schedule) Section E. Personal Income in the past 12 months, question 13.

INCOME BEFORE TAXES

This includes income from the following sources

Wages and salaries
Income from self-employment
Investment income
Government transfer payments
Miscellaneous income

Source:

FE2 (schedule) Section E. Personal Income in the past 12 months, questions 2 to 17.

Note:

-includes incomes of all members of the spending unit;
-this does not refer to calendar year 1986 income: The income from the Food Survey refers to varying income periods ranging approximately from the previous calendar year for the January sample to the 1986

calendar year for the December sample. The inability of some respondents to provide good estimates of income from some of the sources over a non-standard period appears to further bias the results.

-there are some differences between the Survey of Consumer Finances (SCF) and this survey (FOOD):

-In both surveys respondents report gross income from roomers and boarders. In SCF only one third is included in net receipts while FOOD includes all of the gross receipts;

-Both surveys do not consider within "family" transfers of money, but, since there is a difference in the definition of family, the incomes of families within a household could differ;

-In the treatment of interest income FOOD explicitly requires interest received, whereas for SCF the requirement is not explicit;

-SCF excludes families whose major source of income is military pay and allowances whereas for FOOD only military personnel living in barracks are excluded;

-wages and salaries includes employment income including military pay and allowances and salary paid to owner of incorporated business. Income from self-employment includes net profit to proprietor or partner of unincorporated business or farm and gross income from roomers and boarders. Investment income includes interest and dividends, net rents on owned property, trust and estate income. Government transfer income includes family allowances, unemployment insurance, old age security, guaranteed income supplement, Canada or Quebec Pension Plan, social assistance and child tax credits. Miscellaneous income includes pensions arising out of previous employment, individually purchased annuities and other money income.

-This field may be negative.

INCOME FROM WAGES AND SALARIES

This includes income from the following sources

Wages and salaries

Military pay and allowances

Source:

FE2 (schedule) Section E. Personal Income in the past 12 months, questions 2 and 3.

Note:

-includes incomes of all members of the spending unit;

-wages and salaries includes employment income including military pay and allowances and salary paid to owner of incorporated business.

INCOME FROM SELF-EMPLOYMENT

This includes income from the following sources

Net income from non-farm self-employment

Net income from farm self-employment

Gross income from roomers and boarders

Source:

FE2 (schedule) Section E. Personal Income in the past 12 months, questions 4 and 5.

Note:

- includes incomes of all members of the spending unit;
- income from self-employment includes net profit to proprietor or partner of unincorporated business or farm and gross income from roomers and boarders;
- this field may be negative.

INCOME FROM INVESTMENT

This includes income from the following sources

Interest on bonds, deposits, etc.
Dividends
Other income from investments

Source:

FE2 (schedule) Section E. Personal Income in the past 12 months, questions 6 to 8.

Note:

- includes incomes of all members of the spending unit;
- investment income includes interest and dividends, net rent on owned property, trust and estate income;
- this field may be negative.

INCOME FROM GOVERNMENT TRANSFER PAYMENTS

This includes income from the following sources

Family Allowances including Federal Child Tax Credit
Old Age Security, Guaranteed Income Supplement
Canada/Quebec Pension Plan benefits
Unemployment Insurance
Social assistance and provincial income supplements
Other income from government sources

Source:

FE2 (schedule) Section E. Personal Income in the past 12 months, questions 9 to 14 and 17.

Note:

- includes incomes of all members of the spending unit;
- this field may be negative.

INCOME FROM OTHER SOURCES

This includes income from the following sources

Retirement pensions
Other money income

Source:

FE2 (schedule) Section E. Personal Income in the past 12 months, questions 15 and 16.

Note:

-includes income of all members of the spending unit;
-income from other sources includes pensions arising out of previous employment, individually purchased annuities and other money income.

INCOME NOT STATED INDICATOR

Code	Classification
0	Income on file
1	Income not stated

MEALS RECEIVED FREE OR REIMBURSED

WHILE ON TRIPS OVERNIGHT OR LONGER

This includes meals

From friends or relatives
Reimbursed on business
Included in package trips
Other

Source:

FE2 (schedule) Section D. Food and Beverages while away from home overnight or longer during the previous month, question 4.

Note:

-this is the number of meals received for a one week period;
-this figure was calculated by multiplying the responses to Section D, question 4 by 0.2308.
-this field has two implied decimals.

LOCALLY AND ON DAY TRIPS

- FOOD PURCHASED WHILE ON TRIPS OVERNIGHT OR LONGER

Source:

FE2 (schedule) Section D. Food and Beverages while away from home overnight or longer during the previous month, question 6.

Note:

Food purchased while on trips overnight or longer was collected for the previous month. The figure was averaged to weekly expenditure by multiplying by 0.2308.

FOOD PURCHASED FROM RESTAURANTS

This includes expenditures

Locally or on day trips

While on trips overnight or longer

Source:

FE3 (diary). Food and Beverages Purchased from Restaurants.

FE2 (schedule) Section D. Food and Beverages while away from home overnight or longer during the previous month, question 5.

Note:

Food from restaurants while away from home was collected for the previous month. The figure was averaged to weekly expenditure by multiplying by 0.2308.

- WHILE ON TRIPS OVERNIGHT OR LONGER

Source:

FE2 (schedule) Section D. Food and Beverages while away from home overnight or longer during the previous month, question 5.

Note:

Collected for the previous month. The figure was averaged to weekly expenditure by multiplying by 0.2308.

FOOD EXPENDITURE IN SPECIALTY STORES

Source:

FE3 (diary). Food and Beverages Purchased from Stores.

Note:

FOOD SPECIALTY STORES are retail stores which offer a wide variety of a limited number of items. Included in this group are butcher stores, fresh produce stores, bakery shops, fish markets, candy and nut stores, delicatessens, health food stores, and soft drink outlets. Outdoor farmers' markets or stands are also included in this group, as are direct purchases from producers and frozen food provisioners.

FOOD EXPENDITURE IN CONVENIENCE STORES

Source:

FE3 (diary). Food and Beverages Purchased from Stores.

Note:

CONVENIENCE STORES are retail stores which offer a limited variety of a general line of groceries (food and non-food items). These stores normally have extended hours.

FOOD EXPENDITURE IN SUPERMARKETS

Source:

FE3 (diary). Food and Beverages Purchased from Stores.

Note:

SUPERMARKETS are retail stores which offer a wide variety of most grocery items (food and non-food). Retail co-operatives are included in this group.

FOOD EXPENDITURE FROM OTHER STORES

Source:

FE3 (diary). Food and Beverages Purchased from Stores.

Note:

OTHER STORES include any other type of retail outlet involved in selling food items. Remember to include purchases of food items including confections and soft drinks obtained from non-food stores such as department stores, drug stores and other outlets. Purchases from restaurants (including vending machines) should be reported separately in the restaurant section.

FOOD PURCHASED FROM RESTAURANTS

TABLE SERVICE

This includes expenditures on

- Breakfast
- Lunches
- Dinners
- Between meals

Source:

FE2 (schedule) Section D. Food and Beverages while away from home overnight or longer during the previous month, question 6.
FE3 (diary). Food and Beverages Purchased from Restaurants.

Note:

restaurants which take orders and serve food and/or beverages at a table or eating counter;
includes food purchased from restaurants locally and on day trips and while away from home overnight or longer;

food from restaurants while away from home overnight or longer was collected for the previous month. The figure was averaged to weekly expenditure by multiplying by 0.2308.

EAT-IN OR DRIVE-IN FAST FOOD

This includes expenditures on

Breakfast
Lunches
Dinners
Between meals

Source:

FE2 (schedule) Section D. Food and Beverages while away from home overnight or longer during the previous month, question 6.
FE3 (diary). Food and Beverages Purchased from Restaurants.

Note:

restaurants other than table service where food and beverages are ordered and received in a minimum of time. Provides a sit-down eating area and/or parking area for in-car consumption;
includes food purchased from restaurants locally and on day trips and while away from home overnight or longer;
food from restaurants while away from home overnight or longer was collected for the previous month. The figure was averaged to weekly expenditure by multiplying by 0.2308.

FAST FOOD TAKE-OUT

This includes expenditures on

Breakfast
Lunches
Dinners
Between meals

Source:

FE2 (schedule) Section D. Food and Beverages while away from home overnight or longer during the previous month, question 6.
FE3 (diary). Food and Beverages Purchased from Restaurants.

Note:

restaurants other than table service where food and beverages are ordered and received in a minimum of time. Does not provide any eating area, inside or out.
includes food purchased from restaurants locally and on day trips and while away from home overnight or longer;
food from restaurants while away from home overnight or longer was collected for the previous month. The figure was averaged to weekly expenditure by multiplying by 0.2308.

CAFETERIA

This includes expenditures on

Breakfast
Lunches
Dinners
Between meals

Source:

6	7	19- 25	N	EXPENDITURE
7	4	26- 29	N	WEIGHT

VARIABLE DESCRIPTIONS OF THE DETAILED ITEM FILE

IDENTIFICATION NUMBER

See definition in "Variable Descriptions of the Summary File".
Every expenditure made by a given spending unit will have the same identification number.

WEEK

Code Classification

- 1 Diary completed during first week after interview
- 2 Diary completed during second week

CODE

Each food item has a unique code. For a complete list of the codes and their respective items, see Appendix B.

TYPE OF STORE

Code Classification

- 1 Food specialty store
- 2 Convenience store
- 3 Supermarket
- 4 Other store

Source:

FE3 (diary). Food and Beverages Purchased from Stores.

Note:

food specialty stores are retail stores which offer a wide variety of a limited number of items. Included in this group are butcher shops, fresh produce stores, bakery shops, fish markets, candy and nut stores, delicatessens, health food stores, and soft drink outlets. Outdoor farmers' markets or stands are also included in this group, as are frozen food provisioners.

convenience stores are retail stores which offer a limited variety of a general line of groceries (food and non-food items). These stores normally have extended hours.

supermarkets are retail stores which offer a wide variety of most grocery items (food and non-food). Retail co-operatives are included in this group.

other stores are any other type of retail outlet involved in selling food items.

QUANTITY

Net weight or volume. May be in litres, kilograms or number of units. There are three (3) implied decimals in this field.

Source:

FE3 (diary). Food and Beverages Purchased from Stores.

EXPENDITURE

Total amount spent on this item in the given week at the type of store. Amount measured in cents (¢).

Source:

FE3 (diary). Food and Beverages Purchased from Stores.

WEIGHT

See definition in "Variable Descriptions of the Summary File".

APPENDIX A

LIST OF SUMMARY TABLES

These tables show information before and after the reweighting and masking of spending units which was done to safeguard the identity of respondents.
