Census Tract (CT)

Census tracts (CTs) are small geographic units representing urban or rural neighbourhood-like communities created in census metropolitan areas and census agglomerations (with an urban core population of 50,000 or more at the previous census). CTs are initially delineated by a committee of local specialists (for example, planners, health and social workers, educators) in conjunction with Statistics Canada. Once a census metropolitan area (CMA) or census agglomeration (CA) has been subdivided into census tracts, the census tracts are maintained even if the urban core population of the CMA or CA subsequently declines below 50,000. (Statistics Canada, Cat. No. 92-351-UIE1996 Census Dictionary Final Edition)

Secteur de recensement (SR)

Les secteurs de recensement (SR) sont des petites unités géographiques représentant des collectivités urbaines ou rurales créées au sein de régions métropolitaines de recensement et d'agglomérations de recensement dont le noyau urbain compte 50 000 habitants ou plus d'après le recensement précédent. Les SR sont initialement délimités par un comité de spécialistes locaux (par exemple, des planificateurs, des travailleurs sociaux, des travailleurs du secteur de la santé et des éducateurs) de concert avec Statistique Canada. Une fois qu'une région métropolitaine de recensement (RMR) ou qu'une agglomération de recensement (AR) a été divisée en secteurs de recensement, les secteurs de recensement sont maintenus même si, ultérieurement, la population du noyau urbain de la RMR ou de l'AR devient inférieure à 50 000 habitants. (Statistique Canada no 92-351-UIF au catalogue Dictionnaire du recensement de 1996 Édition définitive)

Citizenship status - summary

Refers to the legal citizenship status of the respondent. Persons who are citizens of more than one country were instructed to indicate this fact. The citizenship status classification was adjusted in 1996 to accommodate the change in the citizenship question between 1991 Census and the 1996 Census. This variable reflects the current 1996 citizenship status classification. A second variable was derived in 1996 based on the 1991 scenario. For this second variable, please refer to 'Citizenship status - historical comparison'.

Citoyenneté (statut de) - Sommaire

Statut légal de citoyenneté du recensé. Les personnes ayant plus d'une citoyenneté devaient en faire état dans leur réponse. En 1996, la classification du statut de citoyenneté a été mise à jour en tenant compte du changement à la question sur la citoyenneté entre les recensements de 1991 et 1996. Cette variable représente la classification actuelle du statut de citoyenneté de 1996. En 1996, une deuxième variable a été dérivée selon le scénario de 1991. Voir «Statut de citoyenneté - Comparaison dans le temps» pour cette deuxième variable.

Aboriginal: Aboriginal Population Derived

Refers to those persons who reported identifying with at least one aboriginal group, i.e. North American Indian, Métis or Inuit and/or reported being registered under the Indian Act of Canada and/or reported being a member of an Indian Band or First Nation. In 1991 and previous censuses, Aboriginal persons were determined using the ethnic origin question, based primarily on the ancestry dimension. The 1996 Census shifts the focus away from the background of one's ancestors to the individual's own perception of their Aboriginal identity.

Autochtone : Population autochtone dérivée

Personne ayant indiqué appartenance à au moins un groupe autochtone, c'est-à-dire Indien de l'Amérique du Nord, Métis ou Inuit, et/ou ayant déclaré être un(e) Indien(ne) inscrit(e) en vertu de la Loi sur les Indiens du Canada et/ou ayant déclaré être membre d'une bande indienne ou d'une première nation. Lors du recensement de 1991 et des recensements antérieurs, la population autochtone était déterminée au moyen de la question sur l'origine ethnique, fondée essentiellement sur l'appartenance ancestrale. Au recensement de 1996, l'accent n'est plus mis sur les origines des ancêtres d'une personne mais plutôt sur sa propre perception de son identité.

Autochtone : Identité autochtone

Personne ayant déclaré appartenir à au moins un groupe autochtone, c'est-à-dire Indien de l'Amérique du Nord, Métis ou Inuit. Labour Market Activities: Class of Worker (Derived)

This variable classifies persons who reported a job into those who (a) worked mainly for wages, salaries, commissions or payments 'in kind' (payments in goods or services rather than money), (b) worked without pay in a family farm, business or professional practice owned or operated by a related household member, (c) worked mainly for themselves, with or without paid help. The job reported was the one held in the week prior to enumeration if the person was employed, or the job of longest duration since January 1, 1995, if the person was not employed during the reference week. Persons with two or more jobs in the reference week were to provide information for the job at which they worked the most hours.

Activités sur le marché du travail : Catégorie des travailleurs (Variable dérivée)

Variable permettant de classer les personnes qui ont déclaré un emploi selon a) qu'elles ont travaillé principalement pour un salaire, un traitement ou à commission ou contre rémunération «en nature» (paiements sous forme de biens ou de services, plutôt qu'en espèces), b) qu'elles ont travaillé sans rémunération dans une entreprise ou une ferme familiale appartenant à un parent du même ménage ou exploitée par celui-ci ou c) qu'elles ont travaillé surtout à leur compte, avec ou sans aide rémunérée. L'emploi déclaré désigne l'emploi qu'elles occupaient au cours de la semaine ayant précédé le recensement ou, si elles n'ont pas travaillé au cours de cette semaine, l'emploi qu'elles ont occupé le plus longtemps depuis le 1er janvier 1995. Les personnes ayant occupé deux emplois ou plus cette semaine-là devaient donner des renseignements sur celui auquel elles avaient consacré le plus grand nombre d'heures.

Labour: On Temporary Lay-off or Absent from Job or Business (in Reference Week)

On temporary lay-off or absent from job or business (in reference week). Refers to whether persons were, during the week (Sunday to Saturday) prior to Census Day, (a) on temporary lay-off from a job to which they expected to return for the entire week or (b) absent from their job or business for the entire week. Reasons for absence included vacation, illness, a strike or lock-out at the respondent's place of employment, or other reasons including maternity leave, bad weather, fire, personal or family responsibilities and attendance at training courses if wages or salaries were received from the employer. Data were collected for persons 15 years of age and over, excluding institutional residents, who did not work for pay or in self-employment in the week prior to enumeration. CAUTIONARY NOTE: This variable is used to derive the respondent's labour force activity status in the census reference week (the week preceding the census) and is normally not used on its own. It is strongly recommended that users wishing to use this variable on its own should contact census labour subject matter officers for advice on its proper use and interpretation. Users interested in obtaining the respondent's labour force activity status in the census reference week can simply use the Labour Force Activity variable. Users interested in tabulating historically comparable labour force activity data, dating back to the 1971 Census should use the Labour Force Activity - 1971 Census Concepts variable.

Travail : Mises à pied temporaire ou absence du travail ou de l'entreprise (pendant la sem. de réf.)

Mises à pied temporaire ou absence du travail ou de l'entreprise (pendant la semaine de référence). Variable indiquant les personnes qui ont déclaré être, pendant la semaine (du dimanche au samedi) ayant précédé le jour du recensement, a) temporairement mises à pied et qui s'attendaient à être rappelées à l'emploi qu'elles occupaient pendant toute la semaine, b) absentes de leur travail ou de l'entreprise pendant toute la semaine pour une ou l'autre des raisons suivantes : vacances, maladie, grève ou lock out, congé de maternité, mauvais temps, incendie, raisons personnelles ou familiales, cours de formation (si elles ont touché un salaire ou un traitement de leur employeur). Les données ont été recueillies pour les personnes âgées de 15 ans et plus, à l'exclusion des pensionnaires d'un établissement institutionnel, qui n'ont pas travaillé contre rémunération ou à leur compte durant la semaine ayant précédé le recensement. MISE EN GARDE : Cette variable sert à obtenir par dérivation la situation du recensé vis-à-vis de l'activité au cours de la semaine de référence du recensement (la semaine précédant le recensement). Cette variable est normalement pas employée seule. On recommande vivement aux utilisateurs qui souhaiteraient utiliser cette variable seule de communiquer avec un spécialiste du recensement concernant les questions du travail afin de s'assurer d'en faire une utilisation et une interprétation adéquates. Les utilisateurs qui cherchent à obtenir la situation du recensé vis-à-vis de l'activité au cours de la semaine de référence du recensement n'ont qu'à recourir à la variable sur l'activité. Les utilisateurs qui désirent faire des totalisations de données historiques comparables sur l'activité remontant au Recensement de 1971 devraient en remettre au concept de variable sur l'activité défini pour les besoins du Recensement de 1971.

Labour: Labour Force Activity - 1971 Census Concepts

Refers to the labour market activity of the working age population in the reference week (the week prior to Census Day) according to 1971 Census concepts. Although different (and fewer) questions were asked in the 1971 Census, census labour force activity concepts have remained fairly consistent since 1971. This variable should be used whenever historically comparable labour data dating back to the 1971 or 1976 Censuses are being compared. For views that exclude institutional residents, the counts for 'Not in labour force-Institutional Residents' will be zero. For further information, please refer to the 1991 Census Technical Report: Labour Force Activity (Catalogue 92-337E) or contact census labour subject matter officers for advice on the variable's proper use and interpretation.

Travail : Activité - Selon les concepts du recensement de 1971

Activité sur le marché du travail des personnes en âge de travailler au cours de la semaine de référence (la semaine ayant précédé le recensement) selon les concepts de 1971. Même si les questions du recensement de 1971 étaient quelques peu différentes (et moindre), les concepts sur l'activité sont demeurés relativement semblables depuis 1971. Cette variable devrait être utilisée lorsque des données sur le travail sont compilées pour des comparaisons provenant des recensements de 1971 ou de 1976. Dans le cas d'une vue excluant les pensionnaires d'un établissement institutionnel, le chiffre pour «Pas dans la population active - pensionnaire d'un établissement institutionnel» sera zéro. Pour plus de renseignements, prière de consulter Rapports techniques du recensement de 1991 : Activité (no 92-337F au catalogue), ou communiquer avec un spécialiste du recensement concernant les questions du travail afin de s'assurer de faire une utilisation et une interprétation adéquates de cette variable.

Labour: Labour Force Activity

Refers to the labour market activity of the population 15 years of age and over, excluding institutional residents, in the week (Sunday to Saturday) prior to Census Day. Respondents were classified as either employed, unemployed or not in the labour force. Use of school attendance information: In order to conform as closely as possible to the monthly labour force survey, information from the school attendance question was used in the 1991 Census labour force activity edit and imputation modules. This question was not available in the 1986 census. As a result, there are some differences, relative to 1986, in labour force activity estimates, in the unemployed and not in the labour force categories which are particularly concentrated among persons 15-19 years of age. Users for whom this difference is significant can retrieve 1991 data comparable to 1986 using a define statement - contact subject matter.

Travail : Activité

Activité sur le marché du travail des personnes âgées de 15 ans et plus, à l'exclusion des pensionnaires d'un établissement institutionnel, au cours de la semaine (du dimanche au samedi) ayant précédé le jour du recensement. Les recensés sont classés dans les catégories «personnes occupées», «chômeurs» ou «inactifs». Utilisation de l'information sur la scolarité: Afin de se conformer le plus possible à l'enquête sur la population active mensuelle, l'information sur la scolarité a été utilisée lors des modules du contrôle et de l'imputation pour l'activité du recensement de 1991. Cette question n'était pas disponible au recensement de 1986. De ce fait quelques différences existent, relatives au recensement de 1986, pour les estimations de l'activité pour les catégories 'chômeurs' et 'inactifs', qui renferment surtout des personnes de 15 à 19 ans. Les utilisateurs pour qui cette différence est importante peuvent extraire les données de 1991 comparables à 1986 en utilisant un 'déclaration de définition' - veuillez contacter les agents spécialisés.

Labour: Looked for paid work in past four weeks (full- or part-time)

Looked for paid work in past four weeks (full- or part-time). Refers to whether or not a person actively looked for paid work in the four weeks prior to Census Day. The work sought could be either full time (30 hours or more per week) or part time (less than 30 hours per week). 'Actively looked' means using such job search methods as contacting a Canada Employment Centre, checking with employers or placing or answering newspaper ads. Data were collected for persons 15 years of age and over, excluding institutional residents, who did not work for pay or in self-employment in the week prior to enumeration. Travail : Recherche d'un emploi rémunéré (à plein ou à temps partiel) au cours des quatre dern. sem.

Recherche d'un emploi rémunéré (à plein temps ou à temps partiel) au cours des quatre dernières semaines. Variable indiquant si les personnes ont cherché activement un emploi rémunéré à plein temps (30 heures ou plus par semaine) ou à temps partiel (moins de 30 heures par semaine) au cours des quatre semaines ayant précédé le jour du recensement. «Chercher activement un emploi» signifie, par exemple, s'adresser à un Centre d'emploi du Canada ou à des employeurs, faire paraître une demande d'emploi dans les journaux ou répondre à une offre d'emploi. Les données ont été recueillies pour les personnes âgées de 15 ans et plus, à l'exclusion des pensionnaires d'un établissement institutionnel, qui n'ont pas travaillé contre rémunération ou à leur compte pendant la semaine ayant précédé le recensement. Labour: Number of children

This variable is calculated for persons 15 years and over in private households, overseas (2C) households and hutterite colonies only. This variable classifies the population into those with no children at home and those with children at home. Those persons with children at home are further classified by the total number of children at home. The term 'children' refers to all never-married blood, step or adopted sons or daughters in census families, of any age, who are living in the same dwelling as their parent(s).

Travail : Nombre d'enfants

Cette variable ne concerne que les personnes de 15 ans et plus dans les ménages privés, les ménages d'outre-mer (2C) et les colonies huttérites. Cette variable classe la population selon les personnes n'ayant pas d'enfants à la maison et celles ayant des enfants à la maison. Les personnes ayant des enfants à la maison sont classifiées de nouveau par le nombre total d'enfants à la maison. Le terme «enfants» se rapporte à tous les enfants jamais mariés, les beaux-fils et belles-filles, les fils et filles adoptés dans les familles de recensement peu importe l'âge et qui vivent dans le même logement que leurs parents.

Labour Market Activities: Presence of Children (Derived E&I)

Presence of Children, derived variable - This variable classifies the population 15 years of age and over in private households into those with no children at home and those with children at home. Those persons with children at home are further classified on the basis of the age groups of all their children. This variable is based on census family concepts. It is derived specifically for the purposes of analysis and dissemination of census labour force activity data. In the 1981, 1986 and 1991 Censuses, this variable was derived only for females 15 years and over in private households

Activités sur le marché du travail : Présence d'enfants (Dérivé de E & I)

Présence d'enfants, variable dérivée - Cette variable permet de classer les personnes âgées de 15 ans et plus, dans les ménages privés, selon qu'elles ont ou non des enfants à la maison. Les personnes qui ont des enfants à la maison sont ensuite classées selon le groupe d'âge de tous leurs enfants. Cette variable est fondée sur les concepts du recensement ayant trait à la famille. Elle a été dérivée spécialement aux fins d'analyses et de diffusion des données du recensement sur la population active. Aux recensements de 1981, 1986 et 1991, cette variable a été dérivée uniquement pour les femmes âgées de 15 ans et plus dans les ménages privés

Labour: Occupation (Based on the 1990 National Occupational Classification - HRD Canada)

Occupation based on the 1990 National Occupational Classification - Refers to the kind of work persons were doing during the reference week, as determined by their kind of work and the description of the most important duties in their job. Data are available for persons 15 years of age and over, excluding institutional residents. If the person did not have a job during the week prior to enumeration, the data relate to the job of longest duration since January 1, 1995. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

Activités: Profession (Selon la Classification Nationale des Professions de 1990 - DRH Canada)

Profession selon la Classification Nationale des Professions de 1990 - Genre de travail que faisaient les personnes pendant la semaine de référence. Le genre de travail exécuté est défini d'après le type d'emploi occupé par le recensé et la description des tâches les plus importantes qui s'y rattachent. Les données ont trait aux personnes âgées de 15 ans ou plus, à l'exclusion des pensionnaires d'institution. Si le recensé n'avait pas d'emploi au cours de la semaine ayant précédé le recensement, les données portent sur l'emploi qu'il avait occupé le plus longtemps depuis le 1er janvier 1995. Les personnes qui avaient deux emplois ou plus devaient donner des renseignements sur l'emploi auquel elles avaient consacré le plus d'heures de travail.

Labour: New Job to Start in Four Weeks or Less (from Reference Week)

New job to start in four weeks or less (from reference week). Refers to whether a person, in the week (Sunday to Saturday) prior to Census Day, had definite arrangements to start a new job within the next four weeks. Data were collected for persons 15 years of age and over, excluding institutional residents, who did not work for pay or in self-employment in the week prior to enumeration.

CAUTIONARY NOTE: This variable is used to derive the respondent's labour force activity status in the census reference week (the week preceding the census) and is normally not used on its own. It is strongly recommended that users wishing to use this variable on its own should contact census labour subject matter officers for advice on its proper use and interpretation. Users interested in obtaining the respondent's labour force activity status in the census reference week can simply use the Labour Force Activity variable. Users interested in tabulating historically comparable labour force activity data, dating back to the 1971 Census should use the Labour Force Activity - 1971 Census Concepts variable.

Travail : Début d'un nouvel emploi dans les quatre semaines suivant la semaine de référence

Début d'un nouvel emploi dans les quatre semaines suivant la semaine de référence. Variable indiquant si les personnes avaient ou non, au cours de la semaine (du dimanche au samedi) ayant précédé le jour du recensement, des arrangements définis pour se présenter à un nouvel emploi dans les quatre semaines suivantes. Les données ont été recueillies pour les personnes âgées de 15 ans et plus, à l'exclusion des pensionnaires d'un établissement institutionnel, qui n'ont pas travaillé contre rémunération ou à leur compte au cours de la semaine ayant précédé le recensement.

MISE EN GARDE : Cette variable sert à obtenir par dérivation la situation du recensé vis-à-vis de l'activité au cours de la semaine de référence du recensement (la semaine précédant le recensement). Cette variable est normalement pas employée seule. On recommande vivement aux utilisateurs qui souhaiteraient utiliser cette variable seule de communiquer avec un spécialiste du recensement concernant les questions du travail afin de s'assurer d'en faire une utilisation et une interprétation adéquates. Les utilisateurs qui cherchent à obtenir la situation du recensé vis-à-vis de l'activité au cours de la semaine de référence du recensement ont qu'à recourir à la variable sur l'activité. Les utilisateurs qui désirent faire des totalisations de données historiques comparables sur l'activité remontant au Recensement de 1971 devraient en remettre au concept de variable sur l'activité défini pour les besoins du Recensement de 1971.

Labour: Reasons unable to start a job (in reference week)

Reasons unable to start a job (in reference week). Refers to whether or not persons 15 years of age and over, excluding institutional residents, could have started a job in the week (Sunday to Saturday) prior to Census Day. If the respondent could not have started a job, they were asked to indicate the reasons why they could not. Reasons provided to respondents included: already had a job, temporary illness or disability, personal or family responsibilities, going to school and the residual category 'Other reasons'.

CAUTIONARY NOTE: This variable is used to derive the respondent's labour force activity status in the census reference week (the week preceding the census) and is normally not used on its own. Travail : Raisons de l'impossibilité de commencer à travailler (au cours de la semaine de réf.)

Raisons de l'impossibilité de commencer à travailler (au cours de la semaine de référence). Variable permettant de déterminer si les personnes âgées de 15 ans et plus, à l'exclusion des pensionnaires d'un établissement institutionnel, auraient pu commencer à travailler au cours de la semaine (du dimanche au samedi) ayant précédé le jour du recensement. Si le recensé avait pu commencer à travailler, il devait en indiquer la raison. Les raisons fournies dans le questionnaire étaient les suivantes : avait déjà un emploi, maladie temporaire ou invalidité, raisons personnelles ou familiales, allait à l'école et la catégorie résiduelle «Autres raisons». MISE EN GARDE : Cette variable sert à obtenir par dérivation la situation du recensé vis-à-vis de l'activité au cours de la semaine de référence du recensement (la semaine précédant le recensement). Labour: Occupation (Based on 1991 Standard Occupational Classification)

Occupation based on the 1991 Standard Occupational Classification - Refers to the kind of work persons were doing during the reference week, as determined by their kind of work and the description of the most important duties in their job. Data are available for persons 15 years of age and over, excluding institutional residents. If the person did not have a job during the week prior to enumeration, the data relate to the job of longest duration since January 1, 1995. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

Activités: Profession (Selon la Classification Type des Professions de 1991)

Profession selon la Classification Type des Professions de 1991 - Genre de travail que faisaient les personnes pendant la semaine de référence. Le genre de travail exécuté est défini d'après le type d'emploi occupé par le recensé et la description des tâches les plus importantes qui s'y rattachent. Les données portent sur les personnes âgées de 15 ans et plus, à l'exclusion des pensionnaires d'institution. Si le recensé n'avait pas d'emploi au cours de la semaine ayant précédé le recensement, les données portent sur l'emploi qu'il avait occupé le plus longtemps depuis le 1er janvier 1995. Les personnes qui avaient deux emplois ou plus devaient donner des renseignements sur l'emploi auquel elles avaient consacré le plus d'heures de travail.

The variable relates to non-institutional residents 15 years of age and over who have worked since January 1, 1995. The variable usually relates to the individual's job held in the week prior to enumeration. However, if the person had not worked during that week but had worked at some time since January 1, 1995, the information relates to the job held longest during that period. Workplace locations are coded to a geographic point location. This geographic point location is either a block-face, an enumeration area or a census subdivision representative point. Commuting distance is calculated as the straight line distance between the residential enumeration area representative point and the workplace location representative point. Respondents who worked outside of the large urban areas were coded to the Census Subdivision level of geography. Consequently, an Enumeration Area of work corresponding with the Census Subdivision was assigned. Assigned Enumeration Areas may not represent the true workplace location. Some respondents have very large commuting distances which can distort statistics calculated on commuting distances. For this reason published commuting distance data exclude distances in excess of 200 km from the calculation of statistics.

DDT : Distance à parcourir pour se rendre au travail

Distance, en kilomètres, entre la résidence du recensé et son lieu habituel de travail. Les données portent sur les personnes âgées de 15 ans et plus, à l'exclusion des pensionnaires d'un établissement institutionnel, qui ont travaillé depuis le 1er janvier 1995. La variable se rapporte habituellement à l'emploi occupé par les recensés au cours de la semaine ayant précédé le recensement. Toutefois, dans le cas des personnes qui n'ont pas travaillé cette semaine-là, mais qui avaient travaillé à un moment quelconque depuis le 1er janvier 1995, les données portent sur l'emploi occupé le plus longtemps au cours de cette période. Les emplacements du lieu de travail sont codés à un point géographique. Il s'agit du point représentatif d'un côté d'un lot, d'un secteur de dénombrement ou d'une subdivision de recensement. La distance de navettage est calculée en ligne droite du point représentatif du secteur de dénombrement de résidence au point représentatif de l'emplacement du lieu de travail. Les répondants ayant travaillé à l'extérieur des grands centres urbains ont été codés au niveau géographique de la subdivision de recensement. Par conséquent, un secteur de dénombrement de travail correspondant à la subdivision de recensement a été attribué. Il se peut que les secteurs de dénombrement ayant été attribués ne correspondent pas au véritable emplacement du lieu de travail. Certains répondants doivent parcourir de très longues distances de navettage, ce qui peut fausser les statistiques ayant été calculées en fonction des distances de navettage. Pour cette raison, les données ayant été publiées sur la distance de navettage excluent des calculs statistiques les distances de plus de 200 km.

JTW: Place of work status

Refers to the usual place of work of non-institutional residents 15 years of age and over who have worked since January 1, 1995. The variable usually relates to the individual's job in the week prior to enumeration. However, if the person had not worked in that week but had worked at some time since January 1, 1995, the information related to the job held longest during that period.
 Respondent-completed responses include:
 Worked at home - Persons whose job is located in the same building as their place of residence, persons who live and work on the same farm, and teleworkers who spend most of their work week working at home.
 Worked outside Canada - Persons who work as diplomats, Armed Forces personnel and other persons enumerated abroad. Includes also recent immigrants who may not currently be employed but whose job of longest duration since January 1, 1995 was held outside Canada.
 No fixed workplace - Persons who do not go from home to the same workplace location at the beginning of each shift. Such persons include building and landscape contractors, travelling salespersons, independent truck drivers, etc.
 Worked at usual place - Persons who are not included in the categories described above and who report to the same (usual) workplace location at the beginning of each shift are included here.
 Respondents were asked to provide the street address, city, town, village, township, municipality or Indian reserve, province/territory and postal code of their workplace. If the full street address was not known, the name of the building or nearest street intersection could be substituted.
 Teleworkers who spend less than one-half of their work week working at their home office were asked to report the full address of their employer. Persons whose actual workplace location varied but who reported regularly to an employer's headquarters at the beginning of each shift were asked to report the full address of the headquarters. These persons are counted as working at a usual place.
 Place of work status can be used to select a target population when tabulating workers in specified geographic areas. Including those who worked at a usual place and those who worked at home will count all persons working in the area. In some cases clients may wish to exclude persons who worked at home from tabulations.

DDT : Statut de lieu de travail

Lieu de travail habituel des personnes âgées de 15 ans ou plus, à l'exclusion des pensionnaires d'un établissement institutionnel, qui ont travaillé depuis le 1er janvier 1995. La variable se rapportent habituellement à l'emploi occupé par les recensés au cours de la semaine ayant précédé le recensement. Toutefois, dans le cas des personnes qui n'ont pas travaillé cette semaine-là, mais qui avaient travaillé à un moment quelconque depuis le 1er janvier 1995, les données portent sur l'emploi occupé le plus longtemps au cours de cette période.
 Réponses fournies par les recensés
 À domicile - Les personnes dont le lieu de travail et la résidence se trouvaient dans le même immeuble, celles qui habitaient la ferme où elles travaillaient et les télétravailleurs qui travaillaient à domicile pendant la plus grande partie de leur semaine de travail.
 En dehors du Canada - Les diplomates, les membres des Forces armées et les autres personnes dénombrées à l'étranger, de même que les nouveaux immigrants ne travaillant pas en ce moment, mais dont l'emploi de plus longue durée depuis le 1er janvier 1995 avait été exercé à l'extérieur du Canada.
 Sans adresse de travail fixe - Les personnes qui ne se rendaient pas au même lieu de travail au début de chaque quart, notamment les entrepreneurs en bâtiments, les entrepreneurs paysagistes, les représentants de commerce, les chauffeurs de camion indépendants, etc.
 Lieu de travail habituel - Les personnes qui ne sont pas incluses dans les catégories ci dessus et qui se rendent au même lieu de travail (habituel) au début de chaque quart sont incluses ici. Les recensés devaient inscrire le numéro de voirie, la ville, le village, le canton, la municipalité ou la réserve indienne, la province ou le territoire et le code postal de leur lieu de travail. Ceux qui ne connaissaient pas l'adresse complète pouvaient donner uniquement le nom de l'immeuble ou de l'intersection la plus proche.
 Les télétravailleurs qui passaient moins que la moitié de la semaine de travail à leur bureau à domicile devaient donner l'adresse complète de leur employeur. Les personnes qui travaillaient à des endroits différents, mais se présentaient à un siège social au début de chaque quart devaient donner l'adresse complète du siège social. Ces personnes sont dénombrées en tant que personnes travaillant à un endroit habituel.
 La variable «Statut de lieu de travail» peut être utilisée pour sélectionner une population cible lorsque l'on effectue la totalisation du nombre de travailleurs dans une région géographique spécifique. Le fait d'inclure les personnes ayant travaillé à un lieu de travail habituel et celles ayant travaillé à la maison effectuera le dénombrement de toutes les personnes qui travaillent dans la région. Dans certains cas, il se peut que les clients veuillent exclure des totalisations les personnes ayant travaillé à la maison.

JTW: Mode of transportation to work

Refers to the mode of transportation to work of non-institutional residents 15 years of age and over who have worked since January 1, 1995. Persons who indicated in the place of work question that they either had no fixed workplace address, or specified a usual place of work address, were asked to identify the mode of transportation they most frequently used to commute between home and work. The variable usually relates to the individual's job in the week prior to enumeration. However, if the person had not worked during that week but had worked at some time since January 1, 1995, the information relates to the job held longest during that period. Persons who use more than one mode of transportation were asked to identify the single mode they used for most of the travel distance. As a result, the question provides data on the primary mode of transportation to work. It does not measure multiple modes of transportation, nor does it measure seasonal variation in mode of transportation or trips made for purposes other than the commute between home and work.

DDT : Mode de transport au travail

Mode de transport utilisé pour se rendre au travail par les personnes âgées de 15 ans et plus, à l'exclusion des pensionnaires d'un établissement institutionnel, qui ont travaillé depuis le 1er janvier 1995. Les personnes qui ont indiqué qu'elles n'avaient pas d'adresse de travail fixe, ou ont précisé l'adresse d'un lieu de travail habituel, devaient inscrire le moyen de transport utilisé le plus souvent pour faire la navette entre le domicile et le travail. La variable se rapporte habituellement à l'emploi occupé par les recensés au cours de la semaine ayant précédé le recensement. Toutefois, dans le cas des personnes qui n'ont pas travaillé cette semaine-là, mais qui avaient travaillé à un moment quelconque depuis le 1er janvier 1995, les données portent sur l'emploi occupé le plus longtemps au cours de cette période. Les personnes qui utilisaient plus d'un moyen de transport devaient indiquer seulement celui qu'elles utilisaient pour faire la plus grande partie du trajet. En conséquence, la question a permis de recueillir des données sur le principal mode de transport utilisé pour se rendre au travail. Elle ne permet toutefois pas d'obtenir des données sur l'utilisation de plusieurs modes de transport, la variation saisonnière dans le choix du mode de transport, ni sur les déplacements faits à d'autres fins que pour faire la navette entre le domicile et le travail.

Mobility 1: Mobility Status - Place of residence 1 year ago (1995)

Mobility 1: Refers to the relationship between a person's usual place of residence on census day and his/her usual place of residence one year earlier. A person is classified as a non-mover if no difference exists; otherwise, a person is classified as a mover and this categorization is called Mobility Status (1 Year Ago). Within the category movers, a further distinction is made between non-migrants and migrants; this difference is called Migration Status.

Mobilité 1: Mobilité - Lieu de résidence 1 an auparavant (1995)

Mobilité 1: La mobilité est déterminée d'après le lien entre le domicile habituel d'une personne le jour du recensement et son domicile habituel un an auparavant. Il s'agit d'une personne n'ayant pas déménagé si son domicile n'a pas changé dans l'intervalle; sinon, il s'agit d'une personne ayant déménagé. Cette distinction correspond au sous-univers Mobilité (1 an auparavant). Dans la catégorie des personnes ayant déménagé, on peut également distinguer les non-migrants et les migrants; cette distinction correspond au 'statut migratoire'.

Mobility 5: Refers to the relationship between a person's usual place of residence on census day and his/her usual place of residence five years earlier. A person is classified as a non-mover if no difference exists; otherwise, a person is classified as a mover and this categorization is called Mobility Status (5 Years Ago). Within the category movers, a further distinction is made between non-migrants and migrants; this difference is called Migration Status.

Mobilité 5: Mobilité - Lieu de résidence 5 ans auparavant (1991)

Mobilité 5: La mobilité est déterminée d'après le lien entre le domicile habituel d'une personne le jour du recensement et son domicile habituel cinq ans auparavant. Il s'agit d'une personne n'ayant pas déménagé si son domicile n'a pas changé dans l'intervalle; sinon, il s'agit d'une personne ayant déménagé. Cette distinction correspond au sous-univers Mobilité (5 ans auparavant). Dans la catégorie des personnes ayant déménagé, on peut également distinguer les non-migrants et les migrants; cette distinction correspond au «statut migratoire»

Schooling: Highest level of schooling

Schooling: Refers to the highest grade or year of elementary or secondary school attended, or the highest year of university or other non-university completed. University education is considered to be above other non-university. Also, the attainment of a degree, certificate or diploma is considered to be at a higher level than years completed or attended without an educational qualification.

Cautionary Note: Some anomalies have been detected for this variable when it is cross classified with the 1996 variable Schooling: Highest degree, certificate or diploma (DegreeR). It should be noted that anomalies do not normally occur when legends are aggregated at a higher level. In general, this variable should be used to extract and produce CAPSS output. The anomalies occur in: Detailed HLOS (28), HLOS (15), HLOS (11) and HLOS (11A). If detailed output is being produced, a derived variable has been created which can be substituted. The name of the derived variable is B96_HLosR_Rev - Schooling: Highest level of schooling (Revised). It should be noted that this variable is restricted to the Centre for Education Statistics CAPSS user group and access must be requested each time that it is required. To discuss the anomalies or, to arrange for access to the derived variable, please contact George Mori, Culture, Tourism and Centre for Education Statistics Division at (613) 951-5750.

Scolarité : Plus haut niveau atteint

Scolarité : Dernière année d'études primaires ou secondaires, terminée ou non, ou dernière année universitaire ou non universitaire terminée. Dans la hiérarchie de la scolarité, les études universitaires sont classées au-dessus des autres études non universitaires. En outre, la personne qui a obtenu un grade, certificat ou diplôme se trouve classée à un échelon au-dessus de celle qui a un nombre d'années de scolarité plus élevé, terminées ou non, mais qui n'a pas de titre scolaire.

Avertissement : Des anomalies ont été relevées pour cette variable, lorsqu'elle est recoupée avec la variable Scolarité : Plus haut grade, certificat ou diplôme (DegreeR) de 1996. Il convient de prendre note que ces anomalies n'apparaissent pas, normalement, lorsque les légendes sont agrégées à un niveau plus élevé. En général, il est préférable d'utiliser cette variable pour extraire et élaborer un produit au moyen du SSPAO. Les anomalies relevées touchent les variables détaillées HLOS (28), HLOS (15), HLOS (11) et HLOS (11A). Pour élaborer un produit détaillé, il faut remplacer cette variable par une variable dérivée ayant été créée à cette fin, dont le nom est B96_HLosR_Rev - Scolarité : Plus haut niveau atteint (révisée). Il convient de prendre note que cette variable ne peut être utilisée que par le groupe utilisateur du SSPAO du Centre des statistiques sur l'éducation et qu'il faut en demander l'accès à chaque utilisation. Pour obtenir des renseignements sur les anomalies relevées ou demander l'accès à cette variable dérivée, communiquer avec George Mori, Culture, tourisme et Centre des statistiques sur l'éducation, au no (613) 951-5750.

Dwelling under construction, renovation or conversion

A dwelling under construction is a new dwelling which, because it is not yet complete, does not meet all three of the conditions necessary for year-round occupancy: a source of heat or power, year-round access to drinking water and shelter from the elements. The dwelling is considered complete when services such as electricity, plumbing and water have been connected and the dwelling's structural parts, such as doors, windows, roof and walls, and in the case of high-rise apartments, passenger elevators, are installed. Painting, driveway paving, trim and landscaping need not be finished for the dwelling to be considered complete.

Logement en construction, en cours de rénovation ou de transformation

Un logement en construction est un nouveau logement dont la construction n'est pas terminée et qui, de ce fait, ne respecte pas les trois conditions essentielles à l'habitation permanente, à savoir : être doté d'une source de chauffage ou d'énergie, avoir accès en permanence à une source d'eau potable et offrir un abri permanent contre les intempéries. La construction est considérée comme terminée quand les services tels que l'électricité, la plomberie et l'arrivée d'eau ont été raccordés et que certains éléments d'architecture tels que les portes, les fenêtres, le toit et les murs (de même que les ascenseurs dans le cas des tours d'habitation) ont été installés. Par contre, il n'est pas nécessaire que les travaux de peinture, le pavage des entrées de voiture, la finition extérieure et l'aménagement paysager soient achevés.

Structural type of dwelling

Refers to the structural characteristics and/or dwelling configuration, that is, whether the dwelling is a detached single house, apartment in a high-rise building, a row house, a mobile home, etc. Cautionary Note: Users of Structural Type of Dwelling data from the 1996 Census for the City of Regina are cautioned that, due to enumerator coding error, some Mobile Homes were misclassified as single detached dwellings. The error is estimated to be an undercount of approximately 160 Mobile Homes.

Type de construction résidentielle

Type de construction et/ou caractéristiques du logement (maison individuelle non attenante, appartement dans une tour d'habitation, maison en rangée, habitation mobile, etc.).
Mise en garde: Les utilisateurs des données du recensement de 1996 sur le Type de construction résidentielle pour la ville de Régina sont avisés que, en raison d'une erreur de codage d'un recenseur, certaines habitations mobiles ont été classées comme logements individuels non attenants. On estime que l'erreur se traduit par un sous-dénombrement d'environ 160 habitations mobiles.

Dwelling, marginal

An occupied private dwelling which, because it was not built, maintained or converted for year-round use, does not meet all three conditions for year-round occupancy (a source of heat or power, year-round access to drinking water and shelter from the elements). To be included in the census, the marginal dwelling must be permanently occupied by a person or a group of persons who have no other usual place of residence. Examples of marginal dwellings are non-winterized cottages or cabins, and unconverted barns or garages.

Logement marginal

Logement privé occupé qui, n'ayant pas été construit, maintenu ou converti en vue d'être utilisé toute l'année, ne respecte pas les trois conditions essentielles à l'habitation permanente, à savoir : être doté d'une source de chauffage ou d'énergie, avoir accès en permanence à une source d'eau potable et offrir un abri permanent contre les intempéries. Pour être inclus dans le recensement, le logement marginal doit être occupé en permanence par une personne ou un groupe de personnes n'ayant pas d'autre domicile habituel. Les chalets et les pavillons non hivernisés ainsi que les granges et les garages non transformés en habitations constituent des exemples de logements marginaux.
