

## APPENDIX C

### List of Postsecondary Education Institutions

This Appendix (G90APXC2.PDF) provides a list of the institutions included in the survey, showing for each institution:

- a) the "INSTID" identification code, which occurs in positions 1045 - 1050 of each record;
- b) the population-size reported to us by the institution (i.e., the number of graduates for calendar year 1990, together with name, address, level of qualification and field of study for each graduate);
- c) the size of the sample selected from the population for each institution;
- d) response (1992 or 1995) refers to those 1990 graduates who provided complete or partial information and agreed to share it.

Note that the sample selection procedure for the survey included stratification by province, by level of qualification and by groups of fields of study, with different sampling fractions for each stratum. The result was a varying proportion selected for the sample from the population for each institution, according to the varying proportions of each institution's population in each stratum. The reliability of results by institution therefore also varies widely.

It was determined during interviewing that a number of institutions had, in error, sent us files of graduates for inclusion in the survey frame that were substantially of 1991 graduates (e.g., they had provided data for the academic year 1990-1991 rather than calendar 1990). At the stage of weighting survey results, special procedures were used in calculation the non-response correction factor for responses from their graduates, to minimize the effect of the error (see Section 7.3).
