

APPENDIX C

List of Postsecondary Education Institutions

This Appendix (G95APXC2.PDF) provides a list of the institutions included in the survey, showing for each institution:

- a) the "ERLID" identification code, which occurs in positions 2117 - 2123 of each record;
- b) the population-size reported to us by the institution (i.e., the number of graduates for calendar year 1995, together with name, address, level of qualification and field of study for each graduate);
- c) the size of the sample selected from the population for each institution;
- d) response (1997) refers to those 1995 graduates who provided complete or partial information and agreed to share it.

Note that the sample selection procedure for the survey included stratification by province, by level of qualification and by groups of fields of study, with different sampling fractions for each stratum. The result was a varying proportion selected for the sample from the population for each institution, according to the varying proportions of each institution's population in each stratum. The reliability of results by institution therefore also varies widely.
