S1A   Data-sharing follow-up

The purpose of the data sharing agreement is to reduce the number of organizations seeking interviews with the respondent and to reduce the cost of collecting information. Although the survey is voluntary and you may refuse to share your answers, agreeing to share information from the survey means that you may not have to provide similar information to the Ministries at a later date.The information provided to these departments and institutions will not contain your name, address, telephone number or other identifiers such as employer name. These departments and institutions are also obliged, under the data-sharing and confidentiality provisions of the Statistics Act, to keep the data confidential and use it only for statistical research purposes.
(Interviewer: The Provincial Ministries will receive a data file of all survey respondents who agree to share their answers. Each record will be identified by the institution from which the respondent graduated. The 6 educational institutions will also receive a data-sharing file of all survey respondents, however only graduates from their institution will be identified for that institution's data file. All other respondents will be identified as graduates from a university or college in the following regions: East, Quebec, Ontario and West.)
