Introduction

1. CCHS content is comprised of three components:
 - a. **Core content** is asked of all respondents, annual core content remains relatively stable over time while other common modules are asked for one or two years and alternate from year to year;
 - b. **Optional content** is chosen by health regions and is usually coordinated at the provincial level.
 - c. **Rapid Response** modules are cost-recovery projects asked of all respondents living in the ten provinces usually for one collection period (2 months).
2. Question text in **bold** font is read to the respondent. Text in normal font is not read to the respondent. Interviewer instructions are prefaced by the word "INTERVIEWER", and are not read aloud.
3. Question text in **bold** font enclosed by brackets () is read to the respondent at the discretion of the interviewer.
4. The options "Don't Know" (DK) and "Refusal" (RF) are allowed on every question unless otherwise stated. However, the response categories are not read aloud.
5. External variable names are displayed in the questionnaire. Those names, highlighted in grey, are used in the microdata files.

Help text:

Tag: Perceived health

Perceived health is an indicator of overall health status. It can reflect aspects of health not captured in other measures, such as: incipient disease, disease severity, aspects of positive health status, physiological and psychological reserves and social and mental function. Perceived health refers to the perception of a person's health in general, either by the person himself or herself, or, in the case of proxy response, by the person responding. Health means not only the absence of disease or injury but also physical, mental and social well being.

HUI_BEG

Optional content

The Health Utility Index (HUI) is formed of 8 attributes. In CCHS, these attributes are found in two different modules. The module Pain and discomfort (HUP) is comprised of 3 questions related to the pain and discomfort attribute and is part of the core content which is asked to all survey respondents. The 7 other attributes are found in the module Health Utility Index (HUI). In 2009-2010, this module is also asked to all respondents as part of the theme content.

What is your religion? Specify one denomination or religion only, even if you are not currently a practicing member of that group.

INTERVIEWER: Respondent does not have to be practicing.

If respondent answers "Catholic", ask "by Catholic do you mean Roman Catholic, Ukrainian Catholic or something else?"

If respondent answers Christian, Protestant or Orthodox, ask "Which denomination or church?" If no specific denomination or church can be given, record original response. If respondent provides more than one response, ask about the religion which is most important to them or which they practice most often.

Start typing the name of the religion to activate the search function. Enter "Other - Specify" if the religion is not part of this list. If no religion, enter "No religion".

Tag: Religion

"No religion" means that somebody is not practicing any type of religion, regardless of their beliefs.

An "atheist" is somebody who does not hold a belief in the existence of a God or deity. This may take the form of an assertive disbelief ("I believe God does not exist") or simply lacking the belief itself ("I do not believe in the existence of God").

An "agnostic" is somebody with the assertive belief that the existence and nature of a God or deity is unknown and unknowable ("One cannot know for sure, but I do believe in God or a deity").

This question should be answered regardless of whether or not this person is an Aboriginal person of North America.

Aboriginal people are usually those with ancestors who resided in North America prior to European contact and who identify with one of the three Aboriginal groups listed on the questionnaire: First Nations (North American Indian), Métis and Inuk.

Persons who consider themselves to be East Indian or Asian Indian, or who have ethnic roots on the subcontinent of India, should respond: "No, not an Aboriginal person" to this question.

Individuals who refer to themselves as Métis in the context of mixed ancestry, but who do not have North American Aboriginal ancestry-for example, those from Africa, the Caribbean and South America-should respond "No, not an Aboriginal person".

If respondent answers "mixed" or "bi-racial", or multi-racial", etc probe for specific groups and mark each one separately (e.g. White, Black, Chinese). Aboriginal people or First Nations are not included in the list of response categories because the Employment Equity Act defines visible minorities as "persons, other than Aboriginal persons, who are non-Caucasian in race or non-white in "colour". Tag: Owned or rented

Choose 'Owned' if the respondent and/or another member of this household own the dwelling in which they live, even if the dwelling is on rented or leased land, or if it is part of a condominium, or if it is still being paid for by the respondent or another member of your household.

Choose 'Rented' in all other cases, even if the dwelling occupied by the respondent is provided without cash rent or at a reduced rent (for example, a clergy's residence or a superintendent's dwelling in an apartment building), or the dwelling is part of a co-operative.
