

**Canadian Community Health Survey (CCHS)  
Mental Health (2012)**

**Public Use Microdata File**

**April 2014**

This public use microdata file (PUMF) provides cross-sectional estimates at provincial and national levels. Data are based on interviews with approximately 25,000 respondents aged 15 or older residing in households in all provinces.

The survey collected information about mental health status, access to and perceived need for formal and informal services and supports, functioning and disability, and covariates.
