		6,512	2,344,610

Coverage: All respondents who live in Canada

Note: Based on postal code. The physical address can differ from the mailing address.

National Longitudinal Survey of Children and Youth, Cycle 7, 2006
Master file (Longitudinal)

Variable Name: **GGEHbD07** **Position:** 7 **Length:** 8

Province/Census Division (CD)/Dissemination Area (DA) from 2006 Census (8 characters-2 for Province, 2 for CD, 4 for DA)

Response:	Province/CD/DA	FREQ	WTD
99999996	Valid skip	6,319	2,286,237
99999999	Not stated	1	612
		192	57,761
		=====	=====
		6,512	2,344,610

Coverage: All respondents who live in Canada

Note: Based on postal code. The physical address can differ from the mailing address. If the postal code covers more than one DA, one DA is chosen. GGEHgD04 has been set to valid skip for longitudinal respondents living outside of Canada.

Variable Name: **GGEHgD04** **Position:** 15 **Length:** 1
Collection Name: GEHBDV04

Size of area of residence in which the child lives, according to 2006 Census counts.

		FREQ	WTD
1	Rural area	1,653	386,933
2	Urban, population < 30,000	1,034	215,139
3	Urban, population 30,000 to 99,999	789	231,811
4	Urban, population 100,000 to 499,999	1,440	435,793
5	Urban, population 500,000 or over	1,403	1,016,563
6	Valid skip	1	612
9	Not stated Age of PMK	192	57,761
		=====	=====
		6,512	2,344,610

Coverage: All respondents who live in Canada

Note: Based on postal code. The physical address can differ for the mailing address. The method used to assign a given child to its area of residence has been slightly modified from the previous cycle to make it better fit the geographical concepts used when determining the low income cut-offs (variable GINH03A).

Coverage: All respondents

Note: The age of the child determines, in most cases, the questions that will be asked about him or her. Instead of using the child's actual age, the NLSCY uses a calculated age called effective age. This is done to ensure the child stays in the age group to which he/she is assigned regardless of whether collection takes place before or after the child's birthday. For Cycle 7, the effective age is calculated as 2006 minus year of birth. For example, a child born in 1994 would have an effective age of 12 years old (2006-1994). Note that the actual age of the child at the time of the interview is sometimes different from the effective age.

Longitudinal post-stratification variable

Note: This code identifies the child's longitudinal post-stratification group. The first three characters are the cycle (always "c1_"), the fourth and fifth digits are the age, the sixth character is the sex ("M" or "F") and the last digit is the province. The sum of the longitudinal weights (GWTCW01L) or funnel weights (GWTCWD1L) within each post-stratification group will match the population estimates based on the 2006 Census for January 1995.

<i>Variable Name:</i>	PSTRATF	<i>Position:</i>	1471	<i>Length:</i>	7
<i>Collection Name:</i>	POSTSTRAF				

Cross-sectional post-stratification variable

Note: This code uniquely identifies the child's funnel post-stratification group. The first three characters are the cycle (always C1_) the fourth and fifth digits are the age, the sixth character is sex ("M" or "F") and the last digit is province. Records that are out of scope have PSTRATF = 9999999. The sum of funnel weights (GWTCWD1L) within each post-stratification group will match the population estimates based on the 2006 Census for January 1995.

National Longitudinal Survey of Children and Youth, Cycle 7, 2006
Master file (Longitudinal)

<i>Variable Name:</i>	GLWTCD	<i>Position:</i>	1478	<i>Length:</i>	1
<i>Collection Name:</i>	C7DATA				

Flag indicating if data was collected

		FREQ	WTD
1	Yes	6,320	2,286,849
2	No	192	57,761
		=====	=====
		6,512	2,344,610

Note: The 192 records with GLWTCD = 2 represent children from whom data could not be collected. For example, children who have died have a longitudinal weight to represent other children in the target population who have died. Records with GLWTCD = 2 have the 'Not stated' code assigned for all survey variables regardless of the child's characteristics.
