7	DON-T KNOW	0	0
8	REFUSAL	0	0
9	NOT STATED	0	0
		31,963	6,317,254

Nota: A blended family refers to a couple census family (married or common-law couples) with two or more children, one of whom does not share the same natural and/or adoptive par ents as the other child(ren). This would indicate that the child has half and /or step sib lings living in the household. (Foster children are not included in the census family). In

the derivation of blended, intact, step and type of step family derived variables (BDMCD1 4, 15, 16 and 17) if a child is the biological child of one pare nt and the adoptive child of the other parent then this child is treated like the step child of the adoptive parent. However, if a child is the adoptive child of both parents, then this child is treated the same as a biological child of both parents.

					31,303	0,017,201

Nota: This factor score was derived using the unweighted items (ASPHQ01A to Q10F). In o rder to calculate the scores, we reduced the item values by 1 (ie. a value of 1 ('strongl y agree') was recoded to 0, and 2 was recoded to 1 etc.). This was done in or der to assoc iate a value of zero for the lowest score. The values were reversed for ASPHQ01A, ASPHQ01D and ASPHQ01E. The total score varies between 0 and 18, a high score indicating the presence of social support. The Cronbach Alpha value for this factor score is 0.82.

HEALTH STATUS				

Nota: The next set of questions ask about his/her-s day to day health. The questions ar

e not about illnesses like colds that affect people for short periods of time. They are co ncerned with %his/her% abilities relative to other children the same age. Yo u may feel t hat some of these questions do not apply to %him/her%, but it is important that we ask the same questions of everyone.

	s of everyone.

					31,963	6,317,254

Nota: This score is an equal interval score derived from the raw score for each comCINat ion of grade and test level. Scores on this variable increase as the child-s grade level a nd ability increase. For this reason, it is highly recommended that the scale scores be u sed in all analyses involving growth over time.

					31 963	6 317 254

Nota: This score is a scaled score derived using item response theory (IRT) from the pat tern of correct answers for each combination of grade and test level. Scores on this varia ble increase as the child-s grade level and ability increase. The score is n ot only base d on the . . but is also a function of the level of difficulty of the items that the child answered correctly. The method used to derive the scores are described in this documenta tion. For this reason, it is highly recommended that the scale scores be used in all anal yses involving growth over time.

Nota: This score was derived using the following items. BPACQ1, BPACQ2, BPACQ3, BPACQ4, BPACQ5, and BPACQ9. The score ranges from 0 to 24, where 0 means the absence of a problem and 24 the highest possible score with respect to problems. Before calculating the score, the order of values was reversed for items BPACQ1, BPACQ2, BPACQ3, BPACQ4, and BPACQ5 (i. e., 5 was recoded to 1, 4 was recoded to 2, etc.). Then all values were rescaled to 0-4~by subtracting one from the value for all 6 items. Finally the sum of these transformed values was taken across the 6 items.

BEHAVIOUR - SCORES FOR THE VARIOUS FACTORS IN THE BEHAVIOUR SCALE

Nota: In order to calculate the scores, we reduced the item values by 1 (ie. a value of 1 (-never or not true-) was recoded to 0, 2 was recoded to 1, and 3 was recoded to 2). This was done in order to associate a value of zero for the lowest score.

FACTOR SCORES FOR PARENTING SCALE

Nota: In order to calculate the scores, we reduced the item values by 1 (ie. a value of 1 (-often-) was recoded to 0, 2 was recoded to 1, 3 was recoded to 2, and 4 was recoded to 3). This was done in order to associate a value of zero for the lowest sco re.
