TABLE OF CONTENTS

Family and custody history	1
Custody - derived variables	17
Weighting and linking variables	18

General notes:

The Family and Custody History module was not asked of all Cohort 1 children. It was not asked for youth aged 18-19 (1615 records), nor youth aged 16-17 who live independently (26 records), nor for children and youth aged 8-17 where the respondent was not the birth, step, or adoptive parent of the child (85 records). Such records (1726 in total) have "Valid skip" for all variables.

It was possible for households with both parents currently living together to answer, at ECSCEQ2, that the child's parents had never lived together as a couple (15 records). This contradiction disrupted some of the subsequent flows.

Coverage: Cohort 1 children who are not currently living with both parents, excluding those whose parents have never been together since child's birth

Note: For respondents who answered ECSCEQ6 = 4 (Relationship data is incorrect), information collected about the household members was reviewed and updates were made to associated demographic derived variables where possible. The applicable Custody questions that had not been asked were then set to 'Not Stated' for these respondents. The remaining cases reflected here (31 cases) represent primarily respondents who reported no additional adults living in the household or the household information was insufficient to make updates. For these cases the remainder of the Custody component has been set to 'Valid skip'. Data users should be cautious about the household demographic variables when ECSCEQ6=4.
