*Coverage:* All respondents

*Note:* The age of the child determines, in most cases, the questions that will be asked about him or her. Instead of using the child's actual age, the NLSCY uses a calculated age called effective age. This is done to ensure the child stays in the age group to which he/she is assigned regardless of whether collection takes place before or after the child's birthday. For Cycle 8, the effective age is calculated as 2008 minus year of birth. For example a child born in 2002 would have an effective age of 6 years old (2008-2002). Note that the actual age of the child at the time of the interview is sometimes different from the effective age.

Number of years since first immigrating to Canada

*Allowed values:* 000 : 995

		FREQ	WTD
000 : 059	Years	1,791	561,663
996	Valid skip	13,685	2,053,455
999	Not stated	696	146,526
		=====	=====
		16,172	2,761,644

*Coverage:* PMK with selected child aged 0 to 7 years old, born outside Canada and not Canadian citizen by birth  
*Note:* This derived variable is based on question HSDPQ3. If not the first interview for this adult in Cycle 8, data have been carried forward from previous cycles when available. For Cycle 8 there were 2 cases which had a value of -1. This is because the reference year for Cycle 8 was 2008 and the interview year for these cases was 2009. To determine the number of years since immigrating to Canada, the following equation is used, reference year - year of immigration i.e. (2008-2009) = -1. For these cases we set the -1 to zero (0).

		=====	=====
		16,172	2,761,644

*Coverage:* Children aged 4 or 5 years old

*Note:* The Health Utility Index (HUI) is a generic health status index that is able to synthesize both quantitative and qualitative aspects of health. The system was developed at McMaster University Centre for Health Economics and Policy Analysis. The Comprehensive Health Status Measurement System (CHSMS) provides a description of an individual's overall functional health based on eight attributes: vision, hearing, speech, mobility (ability to get around), dexterity (use of hands and fingers), cognition (memory and thinking), emotion (feelings), and pain and discomfort. Each person's preferences are represented as a numerical value (typically between 0 and 1) with 1 representing high overall function. (The questions used to create this index are: HHLcQ06 to HHLcQ24, HHLcQ27 to HHLcQ34 and HHLcQ36.)

*Note:* This derived variable is based on questions HCRCgD10, HCRCg14A and HCRCg14B.

---

<i>Variable Name:</i>	<b>HCRChD34</b>	<i>Position:</i>	1634	<i>Length:</i>	2
<i>Collection Name:</i>	<b>CARDV34B</b>				

Age in years that the child was first placed in any childcare arrangement

*Allowed values:* 00 : 08

		FREQ	WTD
00 : 07	Age	10,651	1,762,667
96	Valid skip	4,943	900,675
99	Not stated	578	98,302
		=====	=====
		16,172	2,761,644

*Coverage:* All respondents who have used childcare

*Note:* This variable was derived using HCRChQ6A and HCRChQ6B. Data have been carried forward from previous cycles when available. The values for this derived variable have been rounded to the nearest year. For example, a child who was first placed in child care at age 4 months would be assigned a value of 0, but a child first placed in child care at age 5 months would be assigned a value of 1.

Includes items HAGCdQ1 to HAGCd416.

The Ages and Stages Questionnaires (ASQ) are used to identify infants and young children who show potential developmental problems. The questionnaires cover four domains of development: Communication: e.g., babbling, vocalizing, listening and understanding.

Fine motor: hand and finger movements.

Problem solving skills: learning and playing with toys, drawing.

Personal-Social skills: solitary, social play and play with others and toys, to dress and feed oneself.

A score is calculated for each domain (see HAGCdS01, HAGCdS02, HAGCdS03, HAGCdS04).

The items are not reproduced here for copyright reasons. For more information about the Ages and Stages Questionnaires, please contact:

		=====	=====
		16,172	2,761,644

*Coverage:* Children aged 4 or 5 years old

*Note:* This scale represents the overall score for the Who am I? Direct measure. This assessment measures the child's understanding and use of conventional symbols and relevant early learning skills. Summing the value of each of the 10 individual items derived this score. Each individual items score ranges from 1 to 4 (from scribble to clear symbols).

		=====	=====
		16,172	2,761,644

*Coverage:* Children aged 4 or 5 years old

*Note:* This variable represents the age equivalent for the child regarding the Number Knowledge direct measure. This assessment measures the child's intuitive knowledge of numbers by assessing their understanding of the system of whole numbers. Level 1 represents the proportion of correct responses for the predimensional level. There are 5 items in this level. To reach the age equivalent of this level the child has to get a proportion of at least 0.6 (i.e., get at least 3 out of 5 correct responses). Level 2 represents the proportion of correct responses for the unidimensional level. There are 8 items in this level. To reach the age equivalent of this level the child has to get a proportion of a least 0.6 (i.e., get 5 out of 8 correct responses). Level 3 represents the proportion of correct responses for the bidimensional level. There are 9 items in this level. To reach the age equivalent of this level the child has to get a proportion of a least 0.6 (i.e., get 6 out of 9 correct responses).

Flag indicating if data was collected

		FREQ	WTD
1	Yes	16,058	2,761,644
2	No	114	0
		=====	=====
		16,172	2,761,644

*Note:* There are two types of records on the Early Childhood Development file. There are records that are cross-sectionally in scope (i.e., the child resides in the 10 provinces) and data have been collected for them. These have HWTCW01C > 0 and HLWTCD = '1' and are the source data for this codebook. There are also records that are out of scope cross-sectionally (e.g., child has died or lives outside the 10 provinces and no data were collected). These have HWTCW01C = 0, HWTCW01L > 0 and HLWTCD = '2'. Further, the records in the second group have the 'Not stated' code assigned for all survey variables regardless of the child's age or other characteristics.
