## NOTE TO USERS

### Cycle/Year and the Variable Name Structure

The year and cycle of a variable corresponds with the character in the fourth position of the variable name (with the exception of 20 constant longitudinal variables - please see Derived Variables Documentation for a listing). For example, the variable HSCB\_24 contains data relating to cycle 7 (2006/2007) since the character in the fourth position is a B. Whereas the variable HSC2\_24 contains data relating to Cycle 5 (2002/2003) since the character in the fourth position is a 2. For reference of NPHS cycles with their corresponding years, see the list below.

<u>Cycle/Year</u>	<u>4<sup>th</sup> Position of Variable Name</u>
Cycle 1 = 1994/1995	4
Cycle 2 = 1996/1997	6
Cycle 3 = 1998/1999	8
Cycle 4 = 2000/2001	0
Cycle 5 = 2002/2003	2
Cycle 6 = 2004/2005	A
Cycle 7 = 2006/2007	B
Cycle 8 = 2008/2009	C
Cycle 9 = 2010/2011	D
Cycle 10 = 2012/2013	E

### Last Interview

Some of the NPHS interview questions make reference to *last interview*. For instance, the interview question for variable RACB\_2A (question RA\_Q2A) states:

During our last interview there were no activity restrictions or disabilities reported for you, BUT this time there were. Is this due to a new activity restriction or disability or to the worsening of an old one?

*Last interview* refers to the last interview that was conducted. It is not necessarily from the last survey cycle. If no interview was conducted in the cycle(s) immediately prior to the current cycle than the *last interview* could be from one of the prior survey cycles.

Survey sections which contain variables that refer to *last interview* are AL (Alcohol), CC (Chronic Conditions), LF (Labour Force), PH (Preventative Health), RA (Restriction of Activity) and SM (Smoking).

**Variable Name** LFC8GO47 **Length** 2 **Position** 4006 - 4007

### Question Name

**Concept** Standard Occupation Codes for main job - 47 groups - (G)

### Question

**Universe** Respondents who answered LFC8\_2=1

**Note** Based on LFC8CO91 (Standard Occupational Classification (SOC) 1991). This variable is conceptually the same as LFCnGO34 in Cycles 1 and 2. With the introduction in Cycle 3 (1998/1999) of the new SOC 1991, this derived variable was created for all cycles and replaces the variable LFCnGO34 in Cycles 1 and 2. See Derived Variables Documentation.
