NOTE TO USERS

Cycle/Year and the Variable Name Structure

The year and cycle of a variable corresponds with the character in the fourth position of the variable name (with the exception of 20 constant longitudinal variables - please see Derived Variables Documentation for a listing). For example, the variable HSCB_24 contains data relating to cycle 7 (2006/2007) since the character in the fourth position is a B. Whereas the variable HSC2_24 contains data relating to Cycle 5 (2002/2003) since the character in the fourth position is a 2. For reference of NPHS cycles with their corresponding years, see the list below.

<u>Cycle/Year</u>	<u>4th Position of Variable Name</u>
Cycle 1 = 1994/1995	4
Cycle 2 = 1996/1997	6
Cycle 3 = 1998/1999	8
Cycle 4 = 2000/2001	0
Cycle 5 = 2002/2003	2
Cycle 6 = 2004/2005	A
Cycle 7 = 2006/2007	B
Cycle 8 = 2008/2009	C
Cycle 9 = 2010/2011	D
Cycle 10 = 2012/2013	E

Last Interview

Some of the NPHS interview questions make reference to *last interview*. For instance, the interview question for variable RACB_2A (question RA_Q2A) states:

During our last interview there were no activity restrictions or disabilities reported for you, BUT this time there were. Is this due to a new activity restriction or disability or to the worsening of an old one?

Last interview refers to the last interview that was conducted. It is not necessarily from the last survey cycle. If no interview was conducted in the cycle(s) immediately prior to the current cycle then the *last interview* could be from one of the prior survey cycles.

Survey sections which contain variables that refer to *last interview* are AL (Alcohol), CC (Chronic Conditions), LF (Labour Force), PH (Preventative Health), RA (Restriction of Activity) and SM (Smoking).
