

UNDERTAKING
REGARDING ACCESS TO EXPERIMENTAL DATA

This is to give express recognition that the individual named below is given authorized access to experimental statistics, with the understanding that,

- (i) the data user will provide recommendations on areas where quality improvements can be made to the experimental statistics**
- (ii) the experimental statistics are not confidential under the Statistics Act, and are not released to the public since they may lead to erroneous inferences or interpretations**
- (iii) the data user must include the attached statement on data quality in any work that results:**

"The data set used in this study contains some series that are not generally released by Statistics Canada, because they are deemed to be of an unacceptable quality. The author bears sole responsibility for the results reported herein."

- (iv) the data provided is not to be distributed to any third party, and**
- (v) the data will be made available to the data user for a duration of one year, after which time the data user will destroy the data**

The individual named below assume full responsibility for errors of interpretation and application which may arise from use of these unreleased data and will not publish them without mentioning their quality limits.

In connection with your request, you will find hereunder a preliminary quality statement of the data requested.
