Appendix B

Labour Force Survey questionnaire

The LFS application consists of several questionnaire components (Contact, Household, Demographics, Rent, Labour Force Information and Exit), each of which is summarized below, followed by the lists of codesets. Each of the questionnaire components is comprised of a number of question blocks. For simplicity, as a result of the complexity of the logic within the application, not all possible questions and flows are presented. This is especially the case within the Contact Component where the scope of possible questions and flows is somewhat greater than that summarized below.

Selected dwellings are in the survey for six consecutive months. A birth interview corresponds to the first interview for a new household, and is usually conducted in person. Some birth interviews are now also conducted by telephone from centralized CATI work sites. Subsequent interviews are conducted in the following months, and are usually done by telephone.

Contact component

The following information is collected at the start of each contact attempt.
