GSS 2011 - Cycle 25 – Families Analytical File

Variable Name: **FMTYPE** Length: 2

Respondent's type of family structure.

		FREQ	WTD
01	Couple only		
02	Intact family		
03	Family with common children and his		
04	Family with common children and hers		
05	Family with common children and his and hers		
06	Family without common children and his		
07	Family without common children and hers		
08	Family without common children and his and hers		
09	Family with children step to both parents		
10	Family lone parent with father		
11	Family lone parent with mother		
97	No spouse/partner or children in the household		
		=====	=====

Coverage: All respondents.

Source: General Social Survey, 2011, household composition matrix.

Format: I2

Weight variable: WGHT_PER

- Note:
- 03 - Family with children in common and children from father's previous unions.
 - 04 - Family with children in common and children from mother's previous unions.
 - 05 - Family with children in common and children from father's and mother's previous union.
 - 06 - Family with only child(ren) from father's previous union(s).
 - 07 - Family with only child(ren) from mother's previous union(s).
 - 08 - Family with only child(ren) from father's & mother's previous union(s).
 - 09 - Family with child(ren) with only step-parents - no biological link.
 - 10 - Family with male lone parent.
 - 11 - Family with female lone parent.

This variable is suppressed on the public use microdata file.

GSS 2011 - Cycle 25 – Families Analytical File

Variable Name: **FAMTYPE** Length: 1

Respondent's type of family structure.

		FREQ	WTD
1	Couple only		
2	Intact family		
3	Step-family with common child		
4	Step-family without a common child		
5	Lone parent family		
7	No spouse/partner or children in household	=====	=====

Coverage: All respondents.

Source: General Social Survey, 2011, household composition matrix.

Format: I1

Weight variable: WGHT_PER

Note: This variable was derived using the children listed on the household composition matrix only. In cases of multigenerational households where the respondent lived with a spouse or partner as well as a child and a grandchild, FAMTYPE was set to 1. In cases where the respondent had no children in the household and lived with only one parent, FAMTYPE was set to 5. An intact family refers to a now-married or common-law couple where all children (listed in the household composition matrix) have both biological or adoptive parents in the household. A step family refers to a now-married or common-law couple in which at least one of the children (listed in the household composition matrix) is in a step relationship with one of the parents. The respondent might be a parent or a child aged 15 or older in the family.

GSS 2011 - Cycle 25 – Families Analytical File

Variable Name: **FAMTYPA** Length: 2

Family type of the first family found in the household composition matrix.

		FREQ	WTD
01	Couple only		
02	Intact family		
03	Family with common children and his		
04	Family with common children and hers		
05	Family with common children and his and hers		
06	Family without common children and his		
07	Family without common children and hers		
08	Family without common children and his and hers		
09	Family with children step to both parents		
10	Family lone parent with father		
11	Family lone parent with mother		
97	No spouse/partner or children in the family A		
		=====	=====

Coverage: All respondents.

Source: General Social Survey, 2011, household composition matrix.

Format: I2

Weight variable: WGHT_PER 3 - Family with child(ren) in common and child(ren) from father's previous union(s).

4 - Family with child(ren) in common and child(ren) from mother's previous union(s).

5 - Family with child(ren) in common and child(ren) from father's and mother's previous union(s).

6 - Family with only child(ren) from father's previous union(s).

7 - Family with only child(ren) from mother's previous union(s).

8 - Family with only child(ren) from father's & mother's previous union(s).

9 - Family with child(ren) with only step-parents - no biological link.

10 - Family with male lone parent.

11 - Family with female lone parent.

Respondent could be in family A, B, C or D. To get family type of respondent you should use FAMTYPE.

This variable is suppressed on the public use microdata file.

GSS 2011 - Cycle 25 – Families Analytical File

Variable Name: **FAMTYPB** Length: 2

Family type of the second family found in the household composition matrix.

		FREQ	WTD
01	Couple only		
02	Intact family		
03	Family with common children and his		
04	Family with common children and hers		
05	Family with common children and his and hers		
06	Family without common children and his		
07	Family without common children and hers		
08	Family without common children and his and hers		
09	Family with children step to both parents		
10	Family lone parent with father		
11	Family lone parent with mother		
97	No spouse/partner or children in the family B	=====	=====

Coverage: All respondents.

Source: General Social Survey, 2011, household composition matrix.
