Question Text: Type of industry, business or service - NAICS 2012 (20 categories).
Universe: MAR_110 = 1 or MAR_133 = 1 or MAR_135 = 1.
Note: Weight variable: WGHT_PER.

This derived variable indicates the type of industry, business, or service that an employed or self-employed person's work is classified in, according to the first two digits of the North American Industry Classification System (NAICS) 2012.

Respondents were asked what type of business it was for which they worked. With this information, the 6-digit NAICS code for 2012 was determined. NAICS is a common industry classification system developed between Canada, the United States, and Mexico. The three countries collaborate to revise the system every five years in order to keep it current with changes in economic activities.

Original response categories were abbreviated due to space restrictions.

Question Text: Type of work or occupation - NOC 2011 (10 categories).
Universe: MAR_110 = 1 or MAR_133 = 1 or MAR_135 = 1.
Note: Weight variable: WGHT_PER.

This derived variable indicates the occupation group that an employed or self-employed person belongs to, based on the first digit of the National Occupational Classification (NOC) 2011. Respondents were asked what their work or occupation was, and what their main activities were in their type of work. With this information, the 4-digit NOC code for 2011 was determined. The National Occupational Classification (NOC) 2011 updates both the National Occupational Classification 2006 of Human Resources and Skills Development Canada and Statistics Canada's National Occupational Classification for Statistics (NOC-S) 2006. This revised edition eliminates the differences between the two former systems. The first use of the NOC 2011 was in the 2011 National Household Survey.
