Question Name:

Concept: NAICS 2012 (20 categories) - Last year

Question Text: -

Universe: MAR_110 = 1 or MAR_133 = 1 or MAR_135 = 1

Note: This derived variable indicates the type of industry, business, or service that an employed or self-employed person's work is classified in, according to the first two digits of the North American Industry Classification System (NAICS) 2012.

Respondents were asked what kind of business they worked for. With this information, the NAICS code for 2012 was determined.

NAICS is a common industry classification system developed between Canada, the United States, and Mexico. The three countries collaborate to revise the system every five years in order to keep it current with changes in economic activities.

Some response categories were abbreviated due to space restrictions. Full text is as follows:

Question Name:

Concept: NOC 2016 (10 categories) - Last year

Question Text: -

Universe: MAR_110 = 1 or MAR_133 = 1 or MAR_135 = 1

Note: This derived variable indicates the occupation group that an employed or self-employed person belongs to, based on the first digit of the National Occupational Classification (NOC) 2016.

Respondents were asked what their work or occupation was, and what their main activities were in their type of work. With this information, the 4-digit NOC code for 2016 was determined.

The National Occupational Classification (NOC) 2016 updates both the National Occupational Classification 2011.

Concept: Unfair treatment/Discrimination - Based on gender identity

Question Text: What was this unfair treatment or discrimination based on? - Gender identity

Universe: DBH_01 = 1

Note: Gender identity refers to a person's internal and individual experience of gender, such as the sense of being a woman, a man, both, neither, or anywhere along the gender spectrum. A person's gender identity may be the same as or different from their birth-assigned sex. Gender identity is fundamentally different from a person's sexual orientation.

Variable Name: LANMT **Length:** 2.0 **Position:** 558

Question Name:

Concept: Mother Tongue - Collapsed

Question Text: -

Universe: All respondents

Note: This derived variable is the collapsed classification of mother tongue.

Mother tongue refers to the first language learned at home in childhood and still understood by the person at the time the data was collected. If the person no longer understands the first language learned, the mother tongue is the second language learned. For a person who learned two languages at the same time in early childhood, the mother tongue is the language this person spoke most often at home before starting school. The person has two mother tongues only if the two languages were used equally often and are still understood by the person.

LANMT metadata, including answer categories, are consistent with the departmental standard for the collapsed classification of mother tongue of person. LANMT replaces LANCHSUE, LANCHSUF, LANCHSUO.

Variable Name: LANMTMUL **Length:** 1.0 **Position:** 560

Question Name:

Concept: Mother Tongue - Single or multiple

Question Text: -

Universe: All respondents

Note: Mother tongue refers to the first language learned at home in childhood and still understood by the person at the time the data was collected. If the person no longer understands the first language learned, the mother tongue is the second language learned. For a person who learned two languages at the same time in early childhood, the mother tongue is the language this person spoke most often at home before starting school. The person has two mother tongues only if the two languages were used equally often and are still understood by the person.

LANMTMUL metadata, including answer categories, are consistent with the departmental standard for mother tongue of person.
