Question Name:

Concept: NAICS 2012 (20 categories) - Last year

Question Text: -

Universe: MAR_110 = 1 or MAR_133 = 1 or MAR_135 = 1

Note: This derived variable indicates the type of industry, business, or service that an employed or self-employed person's work is classified in, according to the first two digits of the North American Industry Classification System (NAICS) 2012.

Respondents were asked what kind of business they worked for. With this information, the NAICS code for 2012 was determined.

NAICS is a common industry classification system developed between Canada, the United States, and Mexico. The three countries collaborate to revise the system every five years in order to keep it current with changes in economic activities.

Question Name: DBH_Q03

Concept: Unfair treatment/Discrimination - Based on gender identity

Question Text: What was this unfair treatment or discrimination based on? - Gender identity

Universe: DBH_01 = 1

Note: Gender identity refers to a person's internal and individual experience of gender, such as the sense of being a woman, a man, both, neither, or anywhere along the gender spectrum. A person's gender identity may be the same as or different from their birth-assigned sex. Gender identity is fundamentally different from a person's sexual orientation.

Question Name:

Concept: Language spoken most often at home - Collapsed

Question Text: -

Universe: All respondents

Note: This derived variable is the collapsed classification of language spoken most often at home.

LANHOME replaces LANHSD. The main difference is the addition of a new "Multiple non-official languages" category (08).

Language spoken most often at home refers to the language the person speaks most often at home at the time of data collection. A person can report more than one language as "spoken most often at home" if the languages are spoken equally often.

For a person who lives alone, the language spoken most often at home is the language in which he or she feels most comfortable.

Variable Name: LANMT **Length:** 2.0 **Position:** 595

Question Name:

Concept: Mother Tongue - Collapsed

Question Text: -

Universe: All respondents

Note: This derived variable is the collapsed classification of mother tongue.

Mother tongue refers to the first language learned at home in childhood and still understood by the person at the time the data was collected. If the person no longer understands the first language learned, the mother tongue is the second language learned. For a person who learned two languages at the same time in early childhood, the mother tongue is the language this person spoke most often at home before starting school. The person has two mother tongues only if the two languages were used equally often and are still understood by the person.

LANMT metadata, including answer categories, are consistent with the departmental standard for the collapsed classification of mother tongue of person. LANMT replaces LANCHSUE, LANCHSUF, LANCHSUO.
