INTRODUCTION

This is the third in a new series of microdata tapes from Statistics Canada's Survey of Consumer Finances which will contain income as well as personal and labour-related characteristics of individuals aged 15 and over. A limited number of characteristics of the individual's economic and census families are also included on the tape. Changes since the 1982 tape are:

1. Coding of Special Individuals,
2. Expansion of the Size of Area codes and revision to 1981 Census definitions,
3. Revision of the Occupation Codes to 1980 definitions,
4. Updating the Immigration Codes,
5. Deletion of the variable "Residence".

The universe on this tape is all individuals aged 15 and over. This is a broader universe than the published one (Catalogue No. 13-207) which is restricted to income recipients. The variable "Presence of Earnings/Other Income" in position 149 has been included on the tape to assist users in identifying the published sample of (a) income recipients (codes 1 and 2)
(b) earners (code 1).

This tape contains 74,394 records with a total weighted count of 19,115,933.*

A considerable effort has been made to correct inconsistencies in the data. However, unusual situations or inconsistencies may still be present. Some of these are described in the relevant pages of the tape documentation and users are therefore advised to read over the documentation to be aware of these cases. In order to improve future issues of this data set we would appreciate hearing from users regarding any problems, suggestions or comments on the tape contents or documentation.

For further information contact the Income and Housing Surveys Section, Household Surveys Division, Statistics Canada, 5th Floor, Section D2, Jean Talon Building, Ottawa, Ontario K1A 0T6, phone 613-990-9775.

* See page 85-A and 85-B for revised count.

Users of this tape should be aware of the following points:

1. All distributions, estimated numbers and amounts, averages, etc. must be produced using weighted values and not sample counts. For a description of the weighting factor (in position 10-12 of each individual record) and its use see pages 5 and 79-80 of this documentation.
2. Any estimates or percentage distributions to be published or analysed from this data set should be based on a sample of at least 100 records. This is the policy followed in our publications and is based on the fact that data produced from smaller samples is unlikely to be reliable. The purchaser of this tape is invited to submit his final manuscript(s) to the manuscript review service offered by the Division. For further information on this procedure see page 83 of this documentation. In the text of such manuscripts the source should be described as follows: "The analysis done for this report is based on the Statistics Canada microdata tape "Individuals With and Without Income, 1984" which contains data collected in the 1985 Survey of Consumer Finances. All computations on this data base were done by (name of user organisation)." If this is the only source of data in the report, it is not necessary to source each table as well. However, if there are other sources, the tables should be individually sourced. In accordance with the development of standard referencing for machine-readable data files¹, we recommend the following wording be used in bibliographies:

Source: Statistics Canada. Individuals Aged 15 And Over, With And Without Income, 1984 [machine-readable data file]. October 1986 edition. Ottawa, Ontario: Household Surveys Division [producer and distributor]. 1 data file (74,394 logical records) and accompanying documentation.

3. If wage-rates are calculated a footnote must be added to any data to be published to the effect that these calculations depend heavily on certain assumptions which there is no evidence from the survey to support.

¹ Dodd, Sue A. "Bibliographic references for numeric social science data files: suggested guidelines". American Society for Information Science. Journal. 30(2):77-82, March 1979.

NOTES FOR USERS OF HISTORICAL SERIES OF SCF TAPES

1. On previous microdata files, individuals with exceptionally high incomes, large income losses from self-employment or unusual characteristics were excluded from the file. On the 1984 file records with these conditions have had selected characteristics zeroed-out rather than removing these records from the file. Variables which have been masked have been indicated on the record layout as "Special Family Units". Control counts on pages 85 to 115 include these records.
2. The Classifications of Occupations based on the 1980 Standard Occupational Classification is used for the first time on the 1984 income file.
3. The size of area variable (position 8) is based on 1981 Census population counts within 1981 boundaries. Previous microdata tapes were based on 1976 populations (1981 and 1982 tapes). The procedure of recording unique centres has been somewhat revised to provide less distortion in size of area groupings (see page 3).
4. From a methodological point of view, 2 important changes have occurred:
 - (i) The sample design changed with the 1984 data from that described in Catalogue No. 71-526, Methodology of the Canadian Labour Force Survey to the revised design described in the feature article published in The Labour Force, January 1985, Catalogue No. 71-001.
 - (ii) Beginning with the 1977 data, imputation of income data to income non-respondents has been incorporated into the survey processing. For more information, see page 81 of this documentation.

			0-3 Actual number 4 Four or more
<u>CHARACTERISTICS OF THE ECONOMIC FAMILY</u>			
1	180	N	NUMBER OF PERSONS If family characteristics (position 181) = 1-4 1-5 Actual number 6 Six or more
			If family characteristics = 5,6 2-3 Actual number 4 Four or more
1	181	N	CHARACTERISTICS 1 Unattached individual 2 Husband-wife only 3 Husband-wife family with single child(ren) only 4 Other husband-wife families 5 One-parent family with single child(ren) 6 All other families
1	182	N	TENURE 1 Owned with mortgage 2 Owned without mortgage 3 Renter 4 Other (secondary family unit in household)

<u>Size</u>	<u>Position</u>	<u>Type</u>	<u>Variable Title and Codes</u>
-------------	-----------------	-------------	---------------------------------

CENSUS FAMILY CHARACTERISTICS

The following 5 variables apply to census, family heads or wives (i.e. position 208 = 1 or 3). All other individuals will have zero codes in these fields.

7	183-189	N	SPOUSE'S TOTAL INCOME SUBJECT TO TAX
---	---------	---	--------------------------------------

Actual dollar amount. The first position of this field contains a '+' or a '-' sign to indicate whether the value is positive (+) or negative (-) and the following six positions give the actual numeric amount. This is a calculated sum of taxable income sources reported by the individual on the survey (see page 36 of this tape documentation for details)

1	190	N	SPOUSE'S AGE
---	-----	---	--------------

0	No spouse present
1	15-54
2	55-59
3	60-64
4	65 and over

NUMBER OF CHILDREN:

1	191	N	Under 6 YEARS OF AGE
---	-----	---	----------------------

0-2	Actual number
3	Three or more

1	192	N	6-17 YEARS OF AGE	zero means not applicable if this individual record is not a census family head or wife
---	-----	---	-------------------	---

0-2	Actual number
3	Three or more

1	193	N	18-24 YEARS OF AGE
---	-----	---	--------------------

0-1	Actual number
2	Two or more

<u>Size</u>	<u>Position</u>	<u>Type</u>	<u>Variable Title and Codes</u>
-------------	-----------------	-------------	---------------------------------

INCOME ADJUSTMENT VARIABLES*

Note: The first position of these two income fields contains a '+' or a '-' sign to indicate whether the value is positive (+) or negative (-) and the following six positions give the actual numeric amount.

7	194-200	N	FAMILY AND YOUTH ALLOWANCES
---	---------	---	-----------------------------

7	201-207	N	CHILD TAX CREDIT
---	---------	---	------------------

1	208	N	CENSUS FAMILY RELATIONSHIP
---	-----	---	----------------------------

- 0 - All other individuals
- 1 - Head of two-parent family
- 2 - Person not in family or head of single parent family
- 3 - Wife of two-parent family

17	209-225	N	ZEROS - SPARE FIELD
----	---------	---	---------------------

* These variables require some explanation. Following historical procedures, Family and Youth Allowances are reported in the SCF by the person claiming the children for a tax exemption, usually the male parent; although in most cases the monthly cheque is payable to the female parent. This procedure has been followed to avoid having a large number of income recipients whose only source of income is Family Allowances. Similarly, the Child Tax Credit, although usually received by the wife, is reported by the father if the wife has no other sources of income. We are providing these values at the census family level on the census family head's and wife's records so that these values can be substituted for the amounts in positions 41-47 and 48-54 if the user prefers to show these payments as the wife's. See pages 39-40 for additional details and a description of some unusual situations remaining on the data tape.

MICRODATA FILE DOCUMENTATION FOR INDIVIDUALS

<u>Size</u>	<u>Position</u>	<u>Type</u>	<u>Variable Title and Codes</u>

SEQUENCE NUMBER

Description

This variable is a unique five-digit number which identifies each individual on the file. The numbers begin with 00001 and increment by one for each new individual in the sample up to a maximum of 74,234. The file is sorted by province and area so that within each province the records from centres of population 500,000 or more will have the lowest numbers and the records from rural areas will have the largest numbers. Within each area, however, the records will not be in any order by location so that any two records in sequence within a combination of province and area codes may not be from the same city or geographic location within the province. Special Individuals (see "Introduction") have been numbered from 99,001 to 99,160.

STANDARD GEOGRAPHIC CODE

Description This two digit code identifies the province and region in which the surveyed unit is located. The first digit of the code gives the regional location and the second digit identifies the province.

<u>Code</u>	<u>Classification</u>
00	Special Individual (see "Introduction")
10	Newfoundland
11	Prince Edward Island
12	Nova Scotia
13	New Brunswick
24	Quebec
35	Ontario
46	Manitoba
47	Saskatchewan
48	Alberta
59	British Columbia

AREADescription

This variable indicates the population size of the area in which the surveyed unit is located. Population figures used to classify this variable were obtained from the 1981 Census and apply to the population covered by the Labour Force Survey within 1981 Census boundaries to conform with the sample design.

In five cases where urban centres are unique in a given area category for their province, they have been placed in another category. Two centres, Halifax and Saint John, have been moved down one category. St. John's, which was unique in the next lower category, was moved down two categories and Victoria was moved up one category. Brandon was moved up two categories.

<u>Code</u>	<u>Description</u>
0	Special Individual
1	Large urban centres with a population of 500,000 or more
2	Large urban centres with a population of 100,000 to 499,999
3	Minor urban centres with a population of 30,000 to 99,999
4	Other urban centres with a population under 30,000
5	Rural areas

NOTE: The following page gives the cities included under codes 1, 2 and 3.

Code 1 - Population 500,000 or more

Québec-Lévis	Ottawa	Hamilton-Burlington	Calgary	Vancouver
Montréal	Toronto	Winnipeg	Edmonton	
		Brandon ¹	Victoria ²	

Code 2 - Population 100,000 to 499,999

Chicoutimi-Jonquière	London	Sudbury		
Trois-Rivières	Oshawa	Thunder Bay		
Sherbrooke	Windsor	Regina		
Hull	Kitchener-Waterloo	Saskatoon		
St. Catharine's-Niagara				

Code 3 - Population 30,000 to 99,999

Halifax ²	Joliette	Brantford	Moose Jaw
Sydney-Glace Bay	Saleberry de Valleyfield	Sarnia	Prince Albert
Sydney Mines	St-Jean	Chatham	Medicine Hat
Moncton	St-Hyacinthe	Halton Hills	Lethbridge
Saint John ²	Sorel	New Castle	Red Deer
Fredericton	Baie Comeau	St. Thomas	Fort McMurray
Rimouski	Sept-Îles	Woodstock	Chilliwack
Shawinigan	Kingston	Guelph	Kelowna
Victoriaville	Cornwall	Barrie	Kamloops
St-Jérôme	Peterborough	Sault Ste-Marie	Namaimo
Drummondville	Belleville-Trenton	Timmins	Prince George
Granby	North Bay	Matsqui-Mission City	

¹ The population of Brandon is actually 30,000 to 99,999.

² The population of Victoria, Halifax and Saint John is actually 100,000 to 499,999.

FINAL UNIVERSAL WEIGHT

Description

This is a three-digit variable which is computed to provide weights to inflate the sample to pre-determined population totals. It is actually 10% of the true weight so any aggregate calculated should be multiplied by 10. This weight must be used to produce valid statistics from this tape.

However, all estimated numbers and aggregates obtained from this survey should be treated as only approximate. As an illustration see the Reconciliation of SCF Income aggregates to National Accounts aggregates on page 82 of this documentation. The reliability of the survey's estimates depends in part on the quality of independent population estimates used to determine the weights. (Sampling errors are another factor in determining data quality. For further information on this see page 79 of this documentation and pages 39-42 of the 1984 issue of Catalogue No. 13-207.) The survey has to use estimates which are available at the time when the survey is processed. Frequently only preliminary figures are available then. Better estimates become available later but, due to the time lag and for other reasons, the survey is not re-weighted.

In addition, since only a few selected characteristics are used for classification of the population in the weighting process, (i.e. province, sex, age, labour force characteristics) estimates relating to any other characteristic represent unadjusted survey estimates and are thus less reliable.

For information on the principle behind weighting and on the actual calculation of these weights see page 38 of Catalogue No. 13-207 (1984 issue).

For information on the sample design see the feature article in the Labour Force Survey, January 1985, Catalogue 71-001.

For information on implications of the weights and sample design for data usage see pages 79-80 of this documentation.

INDIVIDUALS AGED 15 AND OVER, WITH AND WITHOUT INCOME, 1984 INCOME

REVISED WEIGHTS

SPECIAL NOTE TO USERS: REVISED WEIGHTS (1984 INCOME)

This microdata file contains a revised weight ("Revised Universal Weight") in positions 261-265. The revised weight comes from a new weighting procedure based on updated population counts from the 1991 census. This weight replaces the original weight ("Final Universal Weight") in position 10-12.

The revised weight is a 100% value while the original weight was a 10% value. The variable description on page 5 for the weight, stating that "...any aggregate calculated (from the file) should be multiplied by 10..." does not apply to the new weight, ie., the new weight should be used directly, without multiplying by 10.

The "SCF Income Estimates" on page 116 to 119 are included in this documentation package to permit users to verify their analytical/tabulation programs used with this file. The "sample count" values are simple counts of the file sample records and are not affected by the revised weights. The "weighted counts"/"Total weighted values", however, are derived from the revised weights in positions 261-265. Therefore, any weighted counts calculated from the file should use the original weight for reconciliation purposes. All final analysis and tabulations, though, should use the revised weight.

WAGES AND SALARIES

Description

This variable gives the sum of amounts reported as wages and salaries from civilian employment as well as payment for military services (as long as this is not the individual's major source of income*).

Included are gross cash wages and salaries received during the year 1984 from all jobs, before deductions for pension funds, hospital insurance, income taxes, Canada Savings Bonds, etc. Tips of such employees as waiters and porters, earnings of farm labourers, cleaning women, newspaper boys and baby-sitters as well as net commissions (gross commissions less expenses) of a salesperson who worked for only one company at a time and did not pay for his own office and staff are included here.

The value of taxable allowances and benefits provided by the employers, such as free lodging, bursaries, travelling expenses of wife, etc. are not included.

The wages and salaries reported should amount to the "total earnings before deductions" as shown in Box C of the T4 slips less the value of "taxable allowances and benefits" shown in box K to O plus tips and gratuities and casual earnings for which no T-4 slips were provided.

Also included are minor amounts reported on account of service as a regular member of the Armed Forces of Canada or as a member of a reserve unit, as well as payments to dependents of such servicemen. Special benefits paid upon discharge are also included.

* Individuals whose major source of income is military pay and allowances are excluded from this data set and from **Survey of Consumer Finances** income reports.

This variable is given separately on the tape for each individual and his/her family.

This variable is always positive.

Source

Income Questionnaire, Form CF06, Questions 1 and 2.

TOTAL NET INCOME FROM SELF-EMPLOYMENT

Description

This variables gives the sum of amounts reported on account of net income from self-employment (both farm and non-farm) and net income from roomers and boarders.

Self-employment income is defined as that income received as a result of being a partner in, or sole owner of, an unincorporated business, professional practice or farm. Only the individual's share of net income is included in the case of partnerships. A salesman who has his own office or staff, or who works for more than one firm at a time, reports his income under self-employment. Net income is calculated by deducting operating expenses (wages, rent, interest payments, etc.) and depreciation costs from the gross revenue of the business or farm. Items of a capital nature (e.g. investment in new buildings) are excluded from expenses. Government supplementary payments are included in gross revenue. The value of income in kind is not included.

Income received from businesses or farms which have corporate status is reported as wages and salaries or as dividends (under investment income).

Net income from roomers and boarders is calculated for individuals reporting gross income from roomers and boarders as one-third of the gross amount reported. Payments of room and board from relatives are not included. This component of total net income self-employment is always positive.

This variable may be positive, indicating a profit, or negative, indicating a loss.

Income Questionnaire, Form CF06, Questions 3-5.

Source

TOTAL EARNINGS

Description

This variable gives the sum of amounts reported on account of wages and salaries, military pay and allowances, net income from both farm and non-farm self-employment and net income from roomers and boarders. It is the sum of the preceding two variables.

This variable may be positive or negative.

Source

Income Questionnaire, Form CF06, Questions 1 to 5.

NET INCOME FROM INVESTMENT

Description

This variable gives the sum of amounts reported by the individual on account of investment income.

This source of income includes interest received on bonds, deposits and savings certificates from Canadian or foreign sources, dividends received from Canadian and foreign corporate stocks, cash dividends received from insurance policies, net rental income from real estate and farms, interest received on loans and mortgages, regular income from an estate or trust fund and other investment income.

This variable may be positive or negative.

Source

Income Questionnaire, Form CF06, Questions 6 to 8.

Note for the 1984 tape:

Every person who held Canada Savings Bonds in Series S27 and S30, was entitled to receive a cash bonus payment in 1984. If this bonus was received in 1984 [Statement of Cash Bonus Payment - Canada Savings Bonds (T600C)], the amount should have been recorded either here as investment income or as a capital gain (CF06, Question 18) depending on how it was reported on the 1984 Individual Income Tax Return (T1). Capital gains are not given on this tape or included in Total Income.

Canada Savings Bonds, Series S27 and S30, matured on November 1, 1984. The amount of accrued interest received in 1984 as shown on the Ownership Certificate (T600), Box 5, should be included here but not the principal.

FAMILY AND YOUTH ALLOWANCES

Description

This variable gives the amount received by the individual on account of Federal and Provincial family and youth allowances. The Provincial programmes included are for Quebec.

The amount of family and youth allowances received is reported by the person who claimed a personal tax exemption for the child(ren) for whom the allowance was paid. Usually, this is the male parent. Tape users who would prefer to have these amounts on the female parents' records (or the male parent's records) in all cases should refer to page 44 of this documentation. If neither parent (or guardian) claimed an exemption for the child(ren), the person to whom the cheque was made out was to report the payments. This reporting procedure has been used since the survey of 1975 incomes. Prior to that, the male parent or guardian reported the family allowance benefits.

This variable is always positive.

Source

Income Questionnaire, Form CF06, Question 9.

CHILD TAX CREDIT

Description

This variable gives the amount of the Child Tax Credit as claimed on line 450, page 4 of the 1984 T1-General or on page 2 of the 1984 T1-Special Individual Income Tax Return. This amount was to be reported on the survey questionnaire by the person who received the Family Allowance payment as of December, 1984 (usually the female parent). If tax credits were this person's only source of income, the amount was transferred to the spouse. (Family Allowance payments, however, are reported by the person who claimed the children for a tax deduction.)

It should be noted that the tax credit amount reported is for the 1984 taxation year. This amount may have been received in cash (probably in 1985) or may have only resulted in a reduction in total income tax payable.

This variable is always positive.

Source

Income Questionnaire, Form CF06, Question 21.

OLD AGE SECURITY AND GUARANTEED INCOME SUPPLEMENT

Description

This variable gives the amount received by all individuals 65 years of age and over on account of Old Age Security Pensions and the Guaranteed Income Supplement as well as amounts of spouses' allowances received by eligible spouses age 60-65. Supplements from provincial governments are included in Social Assistance and Provincial Income Supplements.

There may be some cases where persons with reported age under 65 or with reported year of immigration after 1974 have reported OAS-GIS.

This variable is always positive.

Source:

Income Questionnaire, Form CF06, Question 10.

CANADA/QUEBEC PENSION PLAN BENEFITS

Description

This variable gives the amount reported by the individual as benefits received under the Canada/Quebec Pension Plans.

This includes retirement pensions, survivor's benefits such as widow's pensions, disabled widower's pensions, orphan's benefits, and disability pensions with benefits for dependent children of disability pensioners. Lump sum death benefits received under these plans are not included.

This variable is always positive.

Source

Income Questionnaire, Form CF06, Question 11.

UNEMPLOYMENT INSURANCE (UIC) BENEFITS

Description

This variable gives the sum of the amounts reported by all individuals in the family on account of the Unemployment Insurance scheme. This should equal the amount from Box "B", "Total Benefits" of the T-4U Income Tax slip and includes benefits for sickness, maternity, work-sharing, retraining and retirement. Benefits paid to self-employed fishermen are also included.

This variable is always positive.

Source

Income Questionnaire, Form CF06, Question 12.

SOCIAL ASSISTANCE AND PROVINCIAL INCOME SUPPLEMENTS

Description

This variable gives the amount reported by the individual as received for social assistance from Provincial or Municipal governments. Also included are payments received from provincial income supplement programs.

Benefits include assistance to needy mothers with dependent children, to the blind and disabled as well as other cash payments to any persons in need.

This variable is always positive.

Source

Income Questionnaire, Form CF06, Question 13.

Note:

As the amounts for Social Assistance and Other Transfers (next page) are only 51.9% of the National Accounts estimates, users are advised to combine these categories with other sources rather than publishing them separately.

OTHER INCOME FROM GOVERNMENT SOURCES
(INCLUDING PROVINCIAL TAX CREDITS)

Description

This variable gives the sum of amounts reported by the individual on account of all other payments received from federal, provincial or municipal governments not reported in previous variable fields. As of 1981 it also includes provincial tax credits as claimed on Individual Income Tax Return Forms.

Examples of payments included are veteran's pensions, pensions to widows and dependents of veterans, civilian war allowances, worker's compensation, payments received from Employment and Immigration Canada for training programs administered under the National Training Program, Quebec Work Assistance programs, Quebec "Programme Bi-energie", Quebec Maternity Allowance, regular payments received from provincial automobile insurance plans and provincial grants for home ownership promotion, mortgage interest rate reduction and property improvement.

Provincial tax credits included are the amounts claimed on the 1984 Individual Income Tax Returns under "Summary of Tax and Credits" for Nova Scotia, New Brunswick, Ontario, Manitoba, Alberta (including Royalty Tax Credit also) and British Columbia. Quebec's Real Estate Tax Refund as claimed on forms TPLAV or TPLGV and Quebec Allowance for Children Under 6 years of age are also included. These amounts may have been received in cash (probably in 1985) or may have resulted in a reduction in total income tax payable.

This variable is always positive.

Income Questionnaire, Form CF06, Questions 14 and 20.

Source

TOTAL GOVERNMENT TRANSFER PAYMENTS

Description

This variable gives the sum of amounts received on account of Family and Youth Allowances, Old Age Security pensions and Guaranteed Income Supplement, Canada/Quebec Pension Plan benefits, unemployment insurance, Child Tax Credit, and Provincial Tax Credits, social assistance and other government transfer payments. It equals the sum of the seven variables preceding it on the record layout.

This variable will always be positive.

Source

Income Questionnaire, Form CF06, Questions 9 to 14, 20 and 21.

Note:

The federal Child Tax Credit, Provincial Tax Credits and Quebec Real Estate Tax Refund/Allowance for Children under 6 are included starting with the 1981 data.

TAXABLE GOVERNMENT TRANSFER PAYMENTS

Description

This variable gives the sum of amounts reported as receipts from government transfer programs which are taxable. This amount is calculated during the survey processing, not reported by individuals as the amounts reported on their Individual Tax Returns. This variable should be used with this in mind and any reports or publications derived from this tape using this variable should mention our reservations about its use. The following amounts were included:

1. Family and Youth Allowances - all amounts;
2. Basic Old Age Security (OAS) - Amounts reported as OAS-GIS could be separated in to two components only by assuming that all amounts up to and including \$3,215 (the OAS maximum for 1984) were OAS for each recipient;
3. Canada/Quebec Pension Plan Benefits - all amounts;
4. Unemployment Insurance Benefits - all amounts;
5. Other income from government sources - Respondents were requested to specify the source of these payments. The following sources were taxable;
 - (a) National Training Program Allowances,
 - (b) Canadian Corps of Commissionaires,
 - (c) Adult Training Allowance,
 - (d) Home Insulation Program (CHIP),
 - (e) Quebec Maternity Benefit,
 - (f) Orientation and Training Center for Immigrants,
 - (g) Canadian Oil Substitution Plan,
 - (h) Provincial Incentive Program,
 - (i) Rural, Residential Rehabilitation Assistance Program,
 - (j) Canada Home Renovation Plan.

This variable is always positive.

Source

Income Questionnaire, Form CFO6, Questions 9-12 and 14.

NON-TAXABLE GOVERNMENT TRANSFER PAYMENTS

Description

Non-taxable transfers are also calculated during the survey processing and are subject to the same types of errors as taxable transfers. The following amounts are included:

1. Guaranteed Income Supplement (GIS) - Amounts reported as OAS/GIS by any individual which are in excess of \$3,215 are assumed to be GIS and therefore non-taxable. This is not a strictly accurate procedure as payments received only part of the year may total less than \$3,215 but include GIS amounts.
2. Social Assistance and Provincial Income Supplements - all amounts.
3. Other Income from Government Sources - Respondents were asked to specify the source of these payments. The following sources were non-taxable:
 - (a) Veteran's pensions,
 - (b) Pensions to widows and dependents of veterans,
 - (c) Workers' Compensation,
 - (d) Naval Pension,
 - (e) Automobile Insurance Board of Quebec.
4. Child Tax Credit* - all amounts.
5. Provincial Tax Credits* - all amounts.

This variable is always positive.

Source

Income Questionnaire, Form CF06, Questions 10, 13, 14, 20 and 21.

* Included as of 1981.

RETIREMENT PENSIONS, SUPERANNUATION AND ANNUITIES

Description

This variable gives the amount reported by the individual as the result of having been a member of a pension plan of one or more employers, except for pensions received from abroad which are included in Other Money Income (see next page).

Widows or other relatives of a deceased pensioner, who have pension rights under a pension plan or who become beneficiaries in cases guaranteed for a minimum period even if the pensioner dies, include this pension income here (unless it falls under the Canada or Quebec Pension Plan benefits). Also included are pensions of retired R.C.M.P. officers, army personnel and civil servants, and annuity payments received from Canadian Government Annuities Fund, an insurance company or other sources whether or not it was this person who purchased the annuity originally. Pensions received from registered retirement savings plans in the form of a life annuity, a fixed term annuity, a registered retirement investment fund or an income-averaging annuity contract are also included.

Refunds of pension fund contributions because an employee has resigned, are not considered income, and therefore, are not included. Withdrawals from a pension plan or RRSP, or refunds of overcontributions. Severance pay is reported in "Other Money Income".

This variable is always positive.

Source

Income Questionnaire, Form CF06, Question 15.

OTHER MONEY INCOME

Description

This variable gives the amount reported by the individual on account of other money income not included in the previous variables.

Included in this amount are:

- (a) Money received for the care of children being cared for on behalf of the Children's Aid Society.
- (b) Income received from abroad in Canadian dollar equivalent, including pensions, severance pay and retirement allowances, but not including interest and dividends (see Investment Income, page 9).
- (c) Non-refundable scholarships and bursaries.
- (d) Alimony.
- (e) Royalties on books, oil wells, etc.
- (f) Strike and sick pay from trade unions.
- (g) Payments from an income maintenance insurance plan or a guaranteed annual wage plan.

Excluded are:

- (a) Gambling gains and losses.
- (b) Money inherited during the year in a lump sum.
- (c) Capital gains or losses.
- (d) Receipts from the sale of property or personal belongings.
- (e) Income tax refunds.
- (f) Loans repaid to the respondent as lender.
- (g) Loans received.
- (h) Lump sum settlements of insurance policies.
- (i) Rebates received on property taxes or other taxes.
- (j) Refunds of pension contributions.
- (k) Income in kind.
- (l) Lump sum withdrawals from a Registered Home Ownership Savings Plan (RHOSP) or Registered Retirement Savings Plan (RRSP).

This variable is always positive.

Source

Income Questionnaire, Form CF06, Question 16.

TOTAL INCOME

Description

This variable is the sum of receipts from the sources described on pages 6 to 21 of this documentation and is equal to the sum of the following income items: Total Earnings, Net Income from Investment, Total Government Transfer Payments, Retirement Pensions, Superannuation and Annuities and Other Money Income.

This variable may be positive, negative or zero.

Source

Income Questionnaire, Form CF06, Question 17.

Note:

As of 1981, the federal Child Tax Credit, Provincial Tax Credits and Quebec Real Estate Tax/Allowance for Children under 6 are included in Total Income, see pages 11 and 16 for further details.

TOTAL INCOME TAX

Description

This variable gives the total Federal and Provincial income tax payable by the individual for the calendar (or taxation) year 1984.

This variable is always positive.

Source

Income Questionnaire, Form CF06, Question 19.

INCOME AFTER TAX

Description

This variable is calculated as 'Total Income' minus 'Total Income Tax' for each individual.

This variable may be positive or negative.

Source

Income Questionnaire, Form CF06, Questions 17 and 19.

INDIVIDUAL: MAJOR SOURCE OF INCOME

Description This variable identifies the largest source of the individual's total income.

The absolute values in the seven categories shown below are compared to find out which is the largest. If the largest absolute value is common to more than one variable, then the lowest code is selected.

<u>Code</u>	<u>Classification</u>
1	No income
2	Wages and salaries
3	Total net income from self-employment
4	Total government transfer payments
5	Net income from Investment
6	Retirement pensions, superannuation and annuities
7	Other money income

Source Income questionnaire, Form CF06, Questions 1, 3-16.

PROPORTION CONTRIBUTED BY THIS INDIVIDUAL TO FAMILY'S TOTAL EARNINGS

Description

The code in this variable indicates the proportion contributed by the individual to the economic family's total earnings. Total earnings is the sum of wages, salaries, military pay and allowances, net income from self-employment and net income from roomers and boarders. For more complete descriptions of these components see pages 6 and 7.

This variable is coded according to the following procedure:

DECISION TABLE			
Code	Classification	Family Value	Individual Value
1	Family and individual have zero or negative value	"0" Less than "0"	"0" and under "0" and under
2	76-100%	0 and under More than "0"	"More than 0" "More than 0" and calculated proportion = .75+
3	51-75%	More than "0"	"More than 0" and calculated proportion = .51 to .75
4	26-50%	More than "0"	"More than 0" and calculated proportion = .26 to .50
5	1-25%	More than "0"	"More than 0" and calculated proportion = .01 to .25
6	0%	More than "0" More than "0"	"More than 0" and calculated proportion less than .01 "0 and under"

PROPORTION CONTRIBUTED BY THIS INDIVIDUAL TO FAMILY'S TOTAL INCOME

Description The code in this variable indicates the proportion contributed by the individual to the economic family's total income. Total income is income received from any of the sources collected in the survey and described on pages 6-21 of this documentation.

This variable is coded according to the following procedure:

DECISION TABLE			
Code	Classification	Family Value	Individual Value
1	Family and individual have zero or negative value	"0" Less than "0"	"0" and under "0" and under
2	76-100%	0 and under More than "0"	"More than 0" "More than 0" and calculated proportion = .75+
3	51-75%	More than "0"	"More than 0" and calculated proportion = .51 to .75
4	26-50%	More than "0"	"More than 0" and calculated proportion = .26 to .50
5	1-25%	More than "0"	"More than 0" and calculated proportion = .01 to .25
6	0%	More than "0" More than "0"	"More than 0" and calculated proportion less than .01 "0 and under"

PRESENCE OF EARNINGS/OTHER INCOMEDescription

This variable has been included on the tape to assist users in identifying selected samples of earners and income recipients as published in Catalogue No. 13-207. Code 1 identifies earners. It is possible that Total Earnings (positions 27-33) will be zero for some earners if positive and negative sources of earnings cancel each other. Codes 1 and 2 together identify income recipients. Again, Total Income could be zero for similar reasons. Code 3 identifies individuals with no income (all sources = zero) who are excluded from our publications.

<u>Code</u>	<u>Classification</u>
1	Earnings present
2	No earnings but other income
3	No income

ECONOMIC FAMILY

TOTAL EARNINGS

Description This variable gives the sum of amounts reported by all family members age 15 or over on account of wages and salaries, military pay and allowances, net income from both farm and non-farm self-employment and net income from roomers and boarders.

Source Income Questionnaire, Form CF06, Questions 1 to 5.

Note: This variable is coded as follows on the tape:

Classification

01	Zero or negative
02	\$ 1 - \$ 9,999
03	10,000 - 14,999
04	15,000 - 19,999
05	20,000 - 24,999
06	25,000 - 29,999
07	30,000 - 34,999
08	35,000 - 39,999
09	40,000 - 49,999
10	50,000 - 59,999
11	60,000 and over

TOTAL INCOME

Description

This variable gives the sum of amounts reported by all family members age 15 or over from the income sources described on pages 6-21.

This variable may be positive, negative or zero.

Source

Income Questionnaire, Form CF06, Question 17.

Note:

This variable is coded as follows on the tape:

<u>Code</u>	<u>Classification</u>
01	Zero or negative
02	\$ 1 - \$ 9,999
03	10,000 - 14,999
04	15,000 - 19,999
05	20,000 - 24,999
06	25,000 - 29,999
07	30,000 - 34,999
08	35,000 - 39,999
09	40,000 - 49,999
10	50,000 - 59,999
11	60,000 and over

ECONOMIC FAMILY: MAJOR SOURCE OF INCOMEDescription

This variable gives the largest source of the economic family's total income.

The absolute values in the seven categories shown below are compared to find out which is the largest. If the largest absolute value is common to more than one variable, then the lowest code is selected.

<u>Code</u>	<u>Classification</u>
1	No income
2	Wages and salaries
3	Total net income from self-employment
4	Total government transfer payments
5	Net income from Investment
6	Retirement pensions, superannuation and annuities
7	Other money income

Source

Income questionnaire, Form CF06, Questions 1-16.

ECONOMIC FAMILY

NUMBER OF EARNERS

This variable gives the number of persons in the family who received income from wages, salaries, military pay and allowances, self-employment or roomers and boarders.

Code Classification

0-3 Actual number
4 Four or more

NOMBRE DE PERSONNES TOUCHANT UN REVENU

Cette variable donne le nombre de membres de la famille qui ont reçu un revenu provenant des sources prises en compte dans l'enquête et décrites aux pages 6 à 21 de la présente documentation.

Code	Classification
0 - 4	nombre réel
5	cinq ou plus

NUMBER OF UNEMPLOYMENT INSURANCE RECIPIENTS

This variable gives the number of persons in the family who reported having received money from the federal unemployment insurance program.

<u>Code</u>	<u>Classification</u>
0-2	Actual number
3	Three or more

ECONOMIC FAMILY: COMBINATION OF UNEMPLOYMENT INSURANCE RECIPIENTS

Description The code in this variable indicates whether any family member received unemployment insurance benefits in 1984, and whether or not the head was a UI recipient.

<u>Code</u>	<u>Classification</u>
0	Nobody
1	Includes head
2	Does not include head

ECONOMIC FAMILY: REVISED (1978) LOW INCOME CODE

DESCRIPTION

This code indicates whether or not the family unit falls below the 1978-base low income cut-off. These cut-offs were determined by adjusting the low income lines developed after analysis of 1978 Family Expenditure data for increasing prices, as reflected in the Consumer Price Index. These 1978-base low income limits reflect more recent consumption patterns of Canadian families. As the overall ratio spent on food, shelter and clothing had declined since 1969, families who on average spent 58.5% or more of their income on this type of goods and services were considered to be in straitened circumstances.

The cut-offs for 1984 family incomes are as follows:

Family Size	\$500,000 or more	\$100,000-\$499,999	Size of Area of Residence	
			\$30,000-\$99,999	Urban under \$30,000 Rural Areas
1	\$ 9,839	\$ 9,345	\$ 8,766	\$ 7,267
2	12,981	12,321	11,495	9,510
3	17,365	16,456	15,380	12,734
4	20,010	19,017	17,778	14,720
5	23,318	22,078	20,590	17,117
6	25,468	24,062	22,492	18,687
7+	28,032	26,543	24,807	20,590

Code	Classification
1	Below low income cut-off
2	Above or equal to low income cut-off

For a more detailed discussion of the analysis underlying these revised cut-offs, a technical paper "Rebasing Low Income Cut-Offs to 1978" is available. For a general discussion of the history and interpretation of low income cut-offs, see the Appendix in the 1980 issue of Catalogue No. 13-207.

NUMBER OF PERSONS WHO ARE NOT MEMBERS OF THIS ECONOMIC FAMILY UNIT

Description This variable indicates the number of persons in the household who are not related to this individual.

<u>Code</u>	<u>Classification</u>
0-3	Actual number
4	Four or more

ECONOMIC FAMILY CHARACTERISTICS

NUMBER OF PERSONS

Description This variable gives the number of persons in the family with maximum numbers determined by the characteristics of the family.

<u>Code</u>	<u>Classification</u>
1	Unattached individual
2-5	Actual number
6	Six or more
2-3	Actual number
4	Four or more

Applies to husband-wife families
(codes 2-4 in position 181)

Applies to single parent and other non-husband
and wife families (codes 5, 6 in position 181)

ECONOMIC FAMILY CHARACTERISTICS

Description The code in this variable indicates the composition of the economic family.

<u>Code</u>	<u>Classification</u>
1	Unattached individual
2	Husband-wife only
3	Husband-wife family with single child(ren) only
4	Other husband-wife families
5	Lone parent family with single child(ren) of any age
6	All other families

TENUREDescription

This variable gives the housing status of the economic family at the time of the Labour Force Survey in April, 1985.

Code Classification

- | | |
|---|---|
| 1 | Owned with mortgage |
| 2 | Owned without mortgage |
| 3 | Rented |
| 4 | Other (secondary family in the household) |

This coding is derived from a question which only asks if the dwelling is owned by a member of the household. If the dwelling is owned by a household member, it is assumed that it is owned by the first economic family listed on the questionnaire. If not owned by a household member, then the primary economic family is coded as renters. This assumes that the primary family cannot have a rent-free arrangement.

Secondary economic families are always code 4, which could mean rent-free accommodation, roomers, lodgers, employees or other miscellaneous arrangements. Dwellings owned or rented in partnership by two or more economic families are not identified so the secondary economic family is always coded "Other".

A dwelling is considered "owned" whether or not it has been fully paid for. Dwellings in multiple dwelling structures (e.g. apartment buildings) which are owned under a co-ownership arrangement are also coded "owned". People living in condominiums which are not yet registered are not coded as owners.

Household Record Docket, Form 03, Questions 36, 42 and 60.

CENSUS FAMILY

SPOUSE'S TOTAL INCOME SUBJECT TO TAX

Description

For individuals who are heads or wives in a census family this variable indicates the amount of their spouse's income which is subject to income tax: (i.e. on the head's record this will be his wife's amount, if a wife is present; on the wife's record this will be the husband's amount) the code in position 208 (see page 46) identifies whether this is a head or wife. This amount is the calculated sum of the following components (not the amount stated on the Individual Tax Return):

Wages and Salaries
 Military Pay and Allowances
 Net Income from Non-farm Self-employment
 Net Income from Farm Self-employment
 Net Income from Roomers and Boarders
 Interest
 Taxable Amount of Dividends (1.5 x actual dividends amount received)
 Other Investment Income
 Family Allowances
 Old Age Security Pension (amounts up to and including \$3,216 for persons aged 65 and over)
 Canada/Quebec Pension Plan Benefits
 Unemployment Insurance Benefits
 Retirement Pensions
 Superannuation and Annuities
 Taxable Capital Gains and Losses
 Taxable Other Income from Government Sources
 Taxable Other Money Income

This variable may be either positive or negative.

Source

Income Questionnaire, Form CF06, Questions 1-12, 14-16, and 18.

CENSUS FAMILY

SPOUSE'S AGE

Description

For individuals who are census family heads or wives the code in this variable indicates the age of their spouse (i.e., on the head's record the wife's age is given; on the wife's record the head's age is given). Heads and wives are identified by position 208 (see page 46).

<u>Code</u>	<u>Classification</u>
0	No spouse present
1	15-54
2	55-59
3	60-64
4	65 and over

Source

Household Record Docket, Form 03, Questions 33, 36 and 37.

CENSUS FAMILY

NUMBER OF CHILDREN

Description

This series of variables gives the number of never-married children in the census family who belong in each of the age categories listed below. In addition to the family head's own children, this includes grandchildren, brothers, sisters and other guardianship children in the family. These variables are coded on the tape only for individuals who are heads or wives in census families. Individuals who are not heads or wives will be coded zero. The age categories given and their codes are:

<u>Description</u>	<u>Code</u>	<u>Classification</u>
<u>Under 6 years of age</u>	0-2 3	Actual number Three or more
<u>6-17 years of age</u>	0-2 3	Actual number Three or more
<u>18-24 years of age</u>	0-1 2	Actual number Two or more

Source

Household Record Docket, Form 03, Questions 33, 35, 36 and 37.

CENSUS FAMILY

FAMILY AND YOUTH ALLOWANCES

Description

This variable indicates the total payments received by the census family under the federal and provincial (Quebec and Alberta) programs. In almost all cases, these payments are reported by only one person in the family, either the head or wife whichever person claimed a personal tax exemption for the child(ren) in respect of whom the allowance was paid.

Tape users who would prefer to consider these payments as either the wife's (or the husband's) income in all cases may do so by using this amount instead of the value in positions 41-47.

Users should realize that other variables may also require adjustment (e.g. Total Government Transfers, Total Income, Major Source of Income, Proportion Contributed to Family Income, etc.).

In census families both the head and wife may have reported Family Allowances.

Source

Income Questionnaire, Form CF06, Question 9.

CENSUS FAMILY

CHILD TAX CREDIT

Description

This variable gives the amount of the Child Tax Credit received by this person's census family. In most cases, this person is the head or wife.

Tape users who would prefer to consider these payments as either the wife's (or the husband's) income in all cases may do so by using this amount instead of the value in positions 48-54. Users should realize that other variables may also require adjustment (e.g. Total Government Transfers, Total Income, Major Source of Income, Proportion Contributed to Family Income, etc.).

Source

Income Questionnaire, Form CF06, Question 21.

CENSUS FAMILY RELATIONSHIP

Description

For purposes of using the data in the preceding 5 variables which are given only on records of census family heads and wives, this variable identifies these heads and wives.

A census family consists of either a husband and wife (with or without children who have never married) or one parent with one or more children (who have never married), who are living together in the same dwelling. Once a son or daughter marries, he or she ceases to be a member of the parents' census family even if continuing to live under the same roof. A child who is living under the care of persons other than its own parents is considered a guardianship child (e.g. a grandchild not living with parents but with grandparents) and is a member of their census family. Foster children and wards of Children's Aid Society are treated as guardianship children. A guardianship child must be under 21 and not have married.

A person who is living alone, with unrelated individuals (as a lodger, employee or partner), or living with relatives but not in a husband-wife or parent-child relationship is a person not in family. If related to the household head, he (or she) may be a widowed parent, a sister or brother, aunt or uncle, a child who has been married and is living with parent or parents or another relative of the head of household.

The head of the census family is always the husband or parent. The head of a one-person census family is the person himself. The head must always be 15 years of age or over. Therefore, in rare cases where a person under 15 lives with non-relatives, this person is classified as a guardianship child in their census family.

Under Labour Force Survey procedures, members of the household are divided into economic families at the time of the interview. The method of selection of the head of each economic family is described on pages 48 and 49.

CENSUS FAMILY RELATIONSHIP - (end)

During the processing, census families are derived from the economic families according to the individual relationships to the head of each economic family. For the **Survey of Consumer Finances**, in cases of married couples where the female is coded head and the male is coded spouse, the relationships are switched so that, for historical comparability, males will always be heads in married couple situations. This relationship switch is not done for Labour Force Survey statistics.

Please note that the head of the family is not necessarily the major income recipient. In fact, the head may have received no income at all.

<u>Code</u>	<u>Classification</u>
0	Not head or wife
1	Head of 2-parent family
2	Unattached individual or head of single-parent family
3	Wife of 2-parent family

Source Household Record Card, Form F03, Questions 36 and 37.

RELATIONSHIP TO HEAD OF ECONOMIC FAMILY

Description

An economic family is defined as a group of individuals sharing a common dwelling unit who are related by blood, marriage or adoption. A person living alone or rooming in a household where he is not related to any other household members is called an "unattached individual" and is treated as an economic family unit by himself.

Under Revised Labour Force Survey procedures, members of the household are divided into economic families at the time of the interview. The head of each family is selected by the person interviewed with only the following restrictions:

If...

A family group consists of parent(s) and "single" children...

Then...

...The respondent selects either one of the parents as the head of the family
 (or if the respondent is unable or unwilling):
 ...one of the parents is selected by the interviewer; whoever is the one mainly responsible for the maintenance of the family

A family group consisting of parent(s) and married, widowed, divorced or separated son/daughter or son/daughter-in-law...

...The respondent selects either one of the parents or the son/daughter or son/daughter-in-law
 (or if the respondent is unable or unwilling):
 one of the parents or the son/daughter or son/daughter-in-law is selected by the interviewer, whoever is the one mainly responsible for the maintenance of the family

A family consists of brothers and/or sisters, and/or other group of related persons...

...The respondent selects one person as the head of the family
 (or if the respondent is unable or unwilling):
 ...the head of the family is selected by the interviewer as whoever is either the eldest or the one mainly responsible for the maintenance of the family

RELATIONSHIP TO HEAD OF ECONOMIC FAMILY - (end)

During processing of the Survey of Consumer Finances, in cases of married couples where the female is coded head and the male is coded spouse, the relationships are switched so that, for historical comparability, males will always be heads in married couple situations. This relationship switch is not done for Labour Force Survey statistics.

The head of the family is therefore characterized as follows:

- (1) In families consisting of married couples with or without children, the husband is the head;
- (2) In single-parent families with unmarried children, the parent is the head;
- (3) In single-parent families with married children, the member who is mainly responsible for the maintenance of the family becomes the head;
- (4) In families where the relationships are other than husband-wife or parent-child, normally the eldest is considered the head.

Please note that the head of the family is not necessarily the major income recipient. In fact, the head may have received no income at all.

<u>Codes</u>	<u>Classification</u>
1	Head
2	Wife
3	Child or child-in-law
4	Other relative

Source Household Record Card, Form F03, Questions 36 and 37.

INDIVIDUAL'S PERSONAL CHARACTERISTICSDescription

The following characteristics are determined at the time the individual enters the Labour Force Survey (December 1984 to March 1985).

The interviewers are instructed not to update Age if the respondent's birthday falls within the six month period he/she is in the Labour Force Survey. Other characteristics may be updated if the interviewer detects a change of status.

Code MARITAL STATUS

EDUCATION LEVELDescription

This variable gives the highest level of education completed by this individual at the time of his/her entry into the Labour Force Survey (December 1984 to March 1985).

Users should note that the codes do not show definite breaks between completed and uncompleted secondary school education, and between some university and other post-secondary education.

Post-secondary education normally requires high school graduation (or qualification as a mature student). Mature students are included only if they are taking credit courses which can be used towards a degree, certificate or diploma even though it may be taken for "personal interest".

An institution granting an educational degree requiring a secondary school diploma or a pre-university qualifying year for entrance and which grants a diploma, certificate or degree to the student for successful completion of a course is classified as a "University".

Persons whose highest level of training was received from attending private trade schools, private business colleges or adult training programmes will be marked at the highest elementary or secondary school level which they achieved.

<u>Code</u>	<u>Classification</u>
1	No schooling or elementary
2	9 or 10 years of elementary and secondary
3	11 years of elementary and secondary
4	12 years of elementary and secondary
5	13 years of elementary and secondary
6	Some post-secondary
7	Post-secondary certificate or diploma
8	University degree

Source

Household Record Docket, Form 03, Question 38.

ATTENDED SCHOOL IN REFERENCE WEEK

Description

This variable refers to attendance at any type of public or private educational establishment in the reference week (April 14-21, 1985). Only credit courses which are counted towards a degree, diploma or certificate are included. Personal interest courses are not included.

A person is considered to be attending a school, college or university if he or she received instruction during reference week or was engaged in other scholastic or academic activities such as doing research towards a degree, diploma or certificate. Employed persons receiving classroom training sponsored by their employer are considered as attending school only if the instruction is given at a public educational institution, such as a university or community college. They are also considered to be attending school:

1. If the person would have been attending school except that he or she was temporarily ill or disabled.
2. If the person is enrolled in school but is on a short vacation within the school year not exceeding 30 days.
3. If the person would have been attending school but did not because of a labour dispute such as a teachers' strike.

Full-time or part-time enrolment normally depends on the number of courses a person is enrolled in. This distinction differs from school to school.

Code Classification

- | | |
|---|---|
| 1 | Yes - enrolled as a full-time student |
| 2 | Yes - enrolled as a part-time student |
| 3 | Did not attend school in reference week |

Source Labour Force Questionnaire, Form 05, Questions 80 and 81.

TYPE OF SCHOOL ATTENDED

Description The code in this variable indicates the type of educational institution attended during reference week.

<u>Code</u>	<u>Classification</u>
1	Primary and secondary
2	University
3	Community college, other
4	Did not attend school in reference week

Source Labour Force Questionnaire, Form 05, Question 82.

IMMIGRATION STATUSDescription

This variable indicates if the individual was born in Canada (or born outside of Canada of Canadian parents who registered the child as Canadian), and, if not, it gives the period of years since which he/she has been residing in Canada. Persons born in Newfoundland prior to March 31, 1949 are coded Canadian born. For persons who immigrated to Canada more than once, the most recent year of immigration applies.

Because the survey only collects income received while in Canada a complete picture is not given of the income situation of 1984-1985 immigrants. For 1984 arrivals part-year income is collected but for 1985 arrivals only small amounts of family allowances may be present if they have been transferred from another family member during the survey processing.

<u>Code</u>	<u>Classification</u>
1	Canadian born
2	Arrived before 1946
3	Arrived 1946-1955
4	Arrived 1956-1965
5	Arrived 1966-1970
6	Arrived 1971-1975
7	Arrived 1976-1980
8	Arrived 1981-1985

Source

Household Record Docket, Form 03, Question 50ab.

MOTHER TONGUE

Description

This variable gives the language which the individual first learned and still understands. If the person no longer understands the language first learned, then the next language he/she learned which is still understood is coded.

<u>Code</u>	<u>Classification</u>
0	Special Individuals (see "Introduction")
1	English
2	French
3	Other

Source

Household Record Docket, Form 03, Question 50c.

TYPE OF HOUSEHOLD

Description The codes in the variable indicate the living arrangements of the individual in terms of their status as an unattached individual or family member and the presence of an unrelated family or individual(s).

<u>Code</u>	<u>Classification</u>
1	Unattached individual, living alone
2	Unattached individual, living with an unrelated family
3	Unattached individual, living only with other unattached individual(s)
4	Family member, no unrelated persons in the household
5	Family member, unrelated persons also present in the household

LABOUR FORCE STATUS (REFERENCE WEEK)

Description

This variable gives the labour force status of the individual during the reference week. The definitions used for these categories are the same as for the Labour Force Survey and have changed from pre-1976 surveys. The labour force comprises the civilian non-institutional population age 15 and over who were employed or unemployed in the reference week.

The employed includes all persons who, during the reference week:

- (a) did any work for pay or profit
- (b) did any unpaid work which contributed directly to the operation of a farm, business or professional practice owned or operated by a related member of the same household
- (c) had a job but were not at work due to:
 - own illness or disability
 - personal or family responsibilities
 - bad weather
 - labour dispute
 - vacation
 - other reason not specified above (excludes persons on lay-off and persons whose job attachment was to a job to start at a definite date in the future)

The unemployed includes those persons who during the reference week:

- (a) were without work, had actively looked for work in the past four weeks (ending with reference week), and were available for work.
- (b) had not actively looked for work in the past four weeks but had been on lay-off for twenty six weeks or less and were available for work. Persons are classified as being on lay-off only when they expect to return to the job from which they were laid off.
- (c) had not actively looked for work in the past four weeks but had a new job to start in four weeks or less from reference week, and were available for work.

LABOUR FORCE STATUS (REFERENCE WEEK) (CONCLUDED)

Description
(Cont'd)

Persons meeting the following criteria are regarded as available:

- (i) Full-time students seeking part-time work who also met condition (ii) following.
Full-time students looking for full-time work are classified as not available for work during the reference week.
- (ii) They reported that there was no reason why they could not take a job in reference week, or, if they could not take a job it was because of "own illness or disability" or "personal or family responsibilities" or "already had a job".

Those not in the labour force include all individuals 15 years of age and over (exclusive of institutional population) who are not classified as employed or unemployed. Members of the Armed Forces are coded not in the labour force.

These categories differ slightly from the published Survey of Consumer Finances tables in that unpaid family workers are considered not in the labour force for the publication.

Code Classification

- 1 Employed
- 2 Unemployed
- 3 Not in the labour force

Source Labour Force Schedule, Form 05.

CLASS OF WORKER (CURRENT OR LAST JOB)

Description

This variable gives the class of worker of this individual as of April, 1985. For persons who had a job in the reference week, this is the class of their current main job. For persons who were unemployed or not in the labour force in the reference week but had worked since April 1, 1980 this is the class of their most recent position. Persons who have never worked or have not worked since April 1, 1980 are coded 4 and 5 respectively.

"Paid" includes any person who worked as an employee for an employer. This also includes persons who work for themselves in an incorporated business. Starting with the 1979 data, an additional group has been included as paid workers. This group contains only the following types of workers:

- (i) Non live-in baby-sitters and persons who provide services in the parental home of the children for whom they provide care.
- (ii) Persons who do housecleaning for a number of clients.
- (iii) Handymen, gardeners, and persons who do "odd jobs" who are directed to their various clients by an agency (or other third party) such as the Canada Employment Centres.

Note: For Labour Force Survey purposes the above three types of workers are considered as self-employed. This should be taken into account when comparing SCF and LFS estimates. Persons who are employees of an agency providing baby-sitting, housecleaning, or minor repair and maintenance services are included as paid workers as well as all persons who live on the premises of the client for whom they work.

"Self-employed" applies to individuals who work for themselves. These people may or may not have a business, farm or professional practice. Those who do, could have complete ownership or a partnership in the business, or hold a majority of the shares in an incorporated company. If the person is in the process of buying the business while operating it, this is considered ownership. The business must be unincorporated.

CLASS OF WORKER (CURRENT OR LAST JOB) (CONCLUDED)

A business exists where one or more of the following conditions are met:

- Description
(cont'd)
- (a) Machinery or equipment of significant value in which the person has invested money is used by him or his employees in conducting the business.
 - (b) An office, store, farm or other place of business is maintained.
 - (c) There has been some advertisement of the business or profession.

Examples of self-employment without a business are:

- Paper boys or paper girls
- Sales persons for Avon cosmetics, Sarah Coventry Jewelry, and similar companies
- Handymen, gardeners, and persons who do "odd jobs" and obtain their clients directly
- Persons who provide baby-sitting or day care services in their own home
- Boarding and rooming house operators
- Freelance professionals such as writers and journalists
- Artists and craftsmen or craftswomen
- Tailors
- Fishermen
- Farmers

"Unpaid family worker" includes any person who worked on a farm or in a business owned or operated by a related member of the same household. The work done must contribute to the operation of a family farm or family business.

<u>Code</u>	<u>Classification</u>
1	Paid, private sector
2	Paid, public sector
3	Self-employed
4	Unpaid family worker
5	Never worked before
6	Last worked more than five years ago

1980 OCCUPATIONAL CLASSIFICATION (CURRENT OR LAST JOB)

Description

This variable gives the occupational classification of the individual according to the Occupational Classification Manual, Census of Canada, 1980, Catalogue Number 12-565(E,F). For persons who had a job in the reference week, this is their current main occupation. For persons who were unemployed or not in the labour force in the reference week but had worked in the last 5 years this is the occupation they had at their most recent job.

The classification of occupations based on the 1980 Standard Occupational Classification is used for the first time on the 1984 file. This set of standards replaces those previously used which were developed for the 1971 Census. The changes between the 1971 and 1980 occupation classification systems are mainly related to managerial occupations. Persons performing managerial functions in the agriculture, retail trade, accommodation, food and beverages, and insurance industries, who are paid workers, are classified as managers in the 1980 occupation classification. Previously, they were coded to occupations such as farmers, sales, service, etc. Changes in other occupations were very minor.

The complete list of codes on the tape is given on page 12 to 14 of the record layout. The 3-digit 1980 Standard Occupational Classification codes are given in brackets as well as the breakdown of the major occupation (2-digit level) groups.

Note

These detailed occupation categories are provided to give tape users flexibility in creating their own groups for analysis. Users are advised that some of the codes above with small sample sizes may not yield reliable estimates on their own.

INDUSTRY (CURRENT OR LAST JOB)

Description

The codes in this variable indicate the industry in which the individual was working at the time of the survey or at their most recent job within the last five years if they are not currently employed.

The codes in the 1980 Standard Industrial Classification Manual have been grouped as follows to create this variable:

<u>S.I.C. Codes</u>	<u>Code on Tape</u>	<u>Classification</u>
011-023	01	Agriculture
031-092	02	Other primary
101-249	03	Manufacturing, non-durables
271-284	03	"
361-399	03	"
251-269	04	Manufacturing, durables
291-359	04	"
401-449	05	Construction
451-499	06	Transportation, communication and other utilities
501-599	07	Wholesale trade
601-692	08	Retail trade
701-761	09	Finance, insurance and real estate
851-869	10	Community Service
961-969	10	"
981	10	"
911-922	11	Personal Service
971-979	11	"
771-779	12	Business and miscellaneous services
982-999	12	"
811-841	13	Public administration
-	14	Never worked and permanently unable to work
-	15	Last worked more than 5 years ago

Labour Force Schedule, Form 05, Question 74.

TOTAL USUAL HOURS WORKED

Description

The codes in this variable indicate the usual hours which the individual works per week at all jobs. This may differ from the standard work week (such as stipulated in a collective agreement).

For people with varying hours, "usual hours" is the average number of hours worked per week in the previous three weeks including Reference week.

Variable hours applies to those whose work is characterized, for example, by seasonal swings in the number of hours worked per week (e.g. farmers, fishermen), irregular daily schedules (e.g. real estate agents, door-to-door salesmen) etc.

This procedure is also applied for those persons who usually work only certain periods in the month, e.g., they may only work one week each month, and for them this number of hours reflects a monthly average and distinguishes more effectively between full-time work and part-time work.

Code Classification

00-64	Actual hours
65	65 or more hours

Source

Labour Force Schedule, Form 05, Questions 13 and 35.

REASON FOR WORKING LESS THAN 30 HOURS PER WEEK

Description

This variable applies to individuals whose usual weekly hours of work is less than thirty (see preceding variable), and gives their reason for working part-time only.

Code 1: Full-time Job Requiring Less than 30 Hours Per Week. This code applies when there is some legal, institutional or natural impediment which prevents the respondent from working more than 30 hours per week. Examples of occupations in this category would be airline flying staff or transport drivers who are bound by law to restrict themselves to working less than 30 hours per week. Another example would be teachers who are restricted from working more hours because pupils only attend classes half days.

This code also applies to people such as farmers and fishermen who are interviewed in the off-season and report that they worked an average of less than 30 hours in the previous three weeks.

Code 2: Personal or Family Responsibilities. This code applies whenever the reason for working less than 30 hours per week is because the respondent has some ongoing commitment or responsibility to either themselves or their family which does not permit them to hold a job requiring more than 30 hours of work per week.

Some of the reasons which may fall into this category would be: the respondent provides care and supervision for his/her children or looks after sick or invalid parents or other relatives.

Code 3: Going to School. This code applies when the respondent cannot take a job to last more than 30 hours per week because he/she is currently attending an educational institution either full-time or part-time.

Code 4: Could Only Find Part-time Work. This code applies when a respondent indicates that he would have preferred full-time work (more than 30 hours) but was only able to find a job requiring less than 30 hours per week.

Code 5: Did Not Want Full-time Work. This code applies when a respondent has indicated that he or she preferred to take a job which required less than 30 hours per week.

REASON FOR WORKING LESS THAN 30 HOURS PER WEEK (CONCLUDED)

Code 6: Other: This code applies whenever the respondent has a chronic health condition or a disability which prohibits him/her from working more than 30 hours per week. This code also applies if none of the codes 1-5 apply.

Code 7: Not applicable. This individual is not employed, or if employed works 30 or more hours per week usually.

Source Labour Force Schedule, Form 05, Questions 14 and 36.

JOB TENURE

Description

This variable provides the length of time which the individual has been employed by his/her current employer. The specific job may have changed during this time. This variable also applies to persons classified as unemployed due to lay-offs.

<u>Code</u>	<u>Classification</u>
1	Less than 6 months
2	7-12 months
3	1-5 years
4	6-10 years
5	11-20 years
6	Over 20 years
7	Not applicable

Source

Labour Force Schedule, Form 05, Question 73.

REASON LEFT LAST JOB

Description

For individuals who were not employed in the reference week, but had worked sometime in the last 5 years this variable gives their reason for leaving their last job.

Code 1: Own Illness or Disability. Code 1 applies if a person left or lost a job as the result of his or her own illness or disability, or some health related reason. It also applies to those who were forced to retire because of ill health or some other disability.

It does not apply, however, if the respondent retired from his or her job at the normal retirement age (see code 5).

Code 2: Personal or Family Responsibilities. Code 2 applies if the person lost or left his job because of personal or family responsibilities, such as marriage, pregnancy, a long trip or vacation, a serious illness in the family, raising a family, etc.

Code 3: Going to School. Code 3 applies if the person has left his or her job in order to go back to school. A school can be any type of educational institution such as a high school, university, community college, or private institutions such as Secretarial colleges, hair-dressing schools, auto mechanic schools, etc. or if government sponsored retraining takes place in a school defined above.

Code 4: Lost Job or Laid Off Job (Paid Workers Only). This code applies for a paid worker whose employment ended involuntarily (for example, discharge for cause (fired), plant permanently shut down, company moved, reduction of staff, job came to an end). With the exception of seasonal job loss, the respondent must have no expectation of being recalled by his employer.

Code 4 also applies when the paid worker's job was of a specific time duration. This includes work on a contract nature where the job ended as soon as the contract was fulfilled, as may be the case for some professional athletes, musicians, consultants, and so on.

REASON LEFT LAST JOB (CONCLUDED)

Code 5: Retired. Most jobs have a normal retirement age of, for example, 65 years. If the respondent left his job at the normal retirement age then Code 5 is used. If, however, the person retired before the normal retirement age for that job due to ill health or disability then Code 1 applies. For retirement for any other reason, such as qualifying for earlier retirement with lower pension (e.g. at age 55 rather than 65), being forced into early retirement by the employer, etc., Code 5 applies.

Code 6: Other. This code applies if the individual left his/her job because of changing dwelling (for example, moved to another city or moved too far away to go to work at the old job from the new place of residence), because of job dissatisfaction, or other reasons not included in Codes 1-5 above.

Code 7: Never Worked

Code 8: Last Worked More Than Five Years Ago

Code 9: Not applicable

Source Labour Force Schedule, Form 05, Question 54.

ACTIVITY BEFORE STARTED LOOKING FOR WORKDescription

The codes in this variable indicate the major activity of job seekers before they started looking for work. Codes 1-4 apply only to unemployed individuals who actively sought work in the preceding four weeks.

<u>Codes</u>	<u>Classification</u>
1	Working
2	Keeping house
3	Going to school
4	Other
5	Not applicable

Source

Labour Force Schedule, Form 05, Question 59

DURATION OF UNEMPLOYMENT AS OF REFERENCE WEEKDescription

The codes in this variable give the continuous number of weeks which the individual has been without work and actively looking for work up to and including the end of Reference Week, but not counting weeks when that person also worked.

Note: For persons who started looking for work before their last job ended, only the number of weeks since their last job ended are included.

Codes 01-53 apply only to individuals who actively sought work in the four weeks preceding the survey.

<u>Code</u>	<u>Classification</u>
00-52	Actual weeks
53	53 or more weeks

Source

Labour Force Schedule, Form 05.

TYPE OF WORK SOUGHTDescription

The codes in this variable indicate what the person has been looking for in terms of the duration of a prospective job and whether the person has been looking for a job on a full-time or a part-time basis. Full-time is defined as 30 hours or more per week. This variable applies only to unemployed individuals who actively sought work in the four weeks preceding the survey.

<u>Code</u>	<u>Classification</u>
1	Full-time, 6 months or less
2	Full-time, more than 6 months
3	Part-time, 6 months or less
4	Part time, more than 6 months
5	Not applicable

Source

Labour Force Schedule, Form 05, Questions 60 and 61.

REASON FOR NOT LOOKING FOR WORK IN REFERENCE WEEKDescription

The codes in this variable indicate the reason why an unemployed individual did not look for work in the reference week.

<u>Code</u>	<u>Classification</u>
1	Illness or personal or family responsibilities
2	At school
3	No longer interested in finding work or has found a job
4	Awaiting recall (to former job) or replies from prospective employers.
<p>This code is also used for those people who have an arrangement to work but who are only called by the employer when work becomes available. Nurses who work special duty, secretaries and typists working for temporary office help agencies, substitute teachers, etc., are examples of this group.</p>	
5	Believes no work available in area or suited to his/her skills
6	Other reasons (includes dissatisfied with available jobs, because of low pay, poor working conditions, etc., away on a trip, didn't bother looking for work, etc.)
7	Not applicable

Source

Labour Force Schedule, Form 05, Question 62.

WEEKS WORKED LAST YEAR

Description

This variable gives the actual number of weeks in which the individual did any work in 1984.

Included as weeks worked are:

- (a) The number of weeks in which the person did any work, either part-time or full-time;
- (b) The number of weeks the person had a job but was not at work due to holidays, vacation, illness, maternity leave, strike or lock-out;
- (c) The number of weeks a person was self-employed;
- (d) The number of weeks a person had a job but was absent with pay (e.g. for job-related training, etc.)

These are not necessarily complete weeks for which the individual was paid. School teachers under contract to teach the full 1984 school year are coded 52 weeks even if they did not teach or do other work during the summer. Student nurses are not coded weeks worked as they are considered to be attending school.

Code Classification

00	No weeks worked
01-52	Actual number of weeks worked

Source

Household Record Docket, Form 03, Question 50de.

WORKED MOSTLY FULL-TIME OR PART-TIME LAST YEARDescription

This variable tells whether or not the individual worked in 1984 and if he/she did work, was this work mostly full-time or part-time in terms of weekly hours. For pre-1978 years it was up to the respondents to decide if their work was full-time or part-time as no fixed number of hours were attached to the definition. Since 1978 full-time work is defined as 30 or more hours per week.

<u>Code</u>	<u>Classification</u>
1	Full-time
2	Part-time
3	Did not work last year

Source

Household Record Docket, Form 03, Question 50f.

WORKED FULL-TIME OR LESS LAST YEAR

Description

This variable is created from the previous two items - "Weeks Worked" and "Worked Mostly Full-Time or Part-Time" as follows:

<u>Code</u>	<u>Classification</u>	<u>Method of Creation</u>	
		<u>Weeks Worked</u> <u>Code</u>	<u>Full or Part-Time</u> <u>code</u>
1	Full-time worker for 49-52 weeks*	49-52	1
2	Full-time worker for less than 49 weeks or part-time worker*	49-52 or 01-48	2 1 or 2
3	Did not work last year	00	

*For pre-1982 years, the criteria was 50 weeks. The effect of this change is minimal.

Source

Household Record Docket, Form 03, Questions 50de and 50f.

WEEKS WITHOUT WORK AND LOOKING FOR WORK LAST YEARDescription

This variable gives the actual number of weeks in 1984 in which the individual did no work but looked for work. Weeks in which the individual did any work, even for one hour only, but looked for work the rest of the week, are counted as weeks worked.

Code Classification

00 None
01-52 Actual number of weeks

Source

Household Record Docket, Form 03, Question 50gh.

Note:

The survey interviewers' instructions for this variable were clarified as follows for the indicated years:
1978 on-1. Weeks in which full-time students also looked for work are not counted.
2. Only the weeks in which the person was also available for work are included.
1980 on-1. Weeks a person is on temporary layoff are included.

NUMBER OF STRETCHES WITHOUT WORK AND LOOKING FOR WORK LAST YEARDescription

This variable indicates whether the above weeks without work and looking for work consisted of one, two, three or more continuous stretches in 1984. A "continuous stretch" is a period of time in which the respondent's only labour force activity was "without work and looking for work". If the individual had no weeks without work and looking for work in 1984, this variable is coded 'not applicable'.

<u>Code</u>	<u>Classification</u>
1	One stretch
2	Two stretches
3	Three or more stretches
4	Not applicable

Source

Household Record Docket, Form 03, Question 501.

MAIN ACTIVITY WHEN NEITHER WORKING NOR LOOKING FOR WORK LAST YEARDescription

This variable tells what the individual did mostly when neither working nor looking for work in 1984. If the total of weeks worked and weeks looking for work is 52 for the individual, then this variable is coded "not applicable".

Code Classification

1	Permanently unable to work
2	Kept house
3	Went to school
4	Retired or voluntarily idle
5	Other
6	Not applicable.

Household Record Docket, Form 03, Question 50j.

SAMPLE DESIGN AND IMPLICATIONS

The sample employed for the Survey of Consumer Finances is the Labour Force Survey sample. This multi-stage stratified clustered probability sample is described in detail in Methodology of the Canadian Labour Force Survey, 1976, Catalogue No. 71-526 or in more general terms in Guide to Labour Force Survey Data, Catalogue No. 71-528.

Briefly, this sample is designed to represent approximately 98% of the population. Excluded population groups are:

1. residents of the Yukon and Northwest Territories
2. residents of Indian reserves
3. residents of military barracks
4. inmates of institutions such as prisons, penitentiaries, jails, reformatories, mental hospitals, TB hospitals, sanatoria, orphanages and homes for the aged.

In addition, individuals in private households whose major source of income is military pay and allowances are excluded from this file and from Survey of Consumer Finances publications as the survey covers this universe only partially (see exclusion 3 above).

Because of varying sampling and response ratios each record on the file has a weight attached to it (see positions 10-12). This weighting factor reflects the sample design and incorporates the inverse of the sampling ratio (which varies significantly by geographic area) and differential response rates for households, among other things. For further information on the weighting procedure see Catalogue No. 13-207, page 38, and page 5 of this documentation (as well as Catalogues No. 71-526 and 71-528 mentioned above).

The sample design and weighting procedure have important implications for data use. Each variable on the file must be multiplied by the weight in order to produce valid statistical estimates of population parameters such as means, medians, modes, estimated numbers and aggregates. However, the appropriateness of using these sample survey weights in regression analysis is a complex issue. A useful summary of the issue is presented in DuMouchel and Duncan (1983) "Using Sample Survey Weights in Multiple Regression Analysis of Stratified Samples". Journal of the American Statistical Association Volume 78, December 1983, pp 535-543.

Since a multistage stratified clustered sample design was employed, standard error estimates based on the usual simple random formula generally underestimate the true standard errors. For an illustration of the differences, see the uncatalogued paper "An Investigation of Variance Estimation in Family Expenditure Surveys". See also the standard errors of average incomes (which estimate the sampling error) published in Survey of Consumer Finance, catalogues No. 13-207 and 13-208. Standard errors of percentage distributions for individuals and family units by size are published in 13-207, page 41.

The information necessary to estimate the standard errors are not given on this file. Most regression programs are not capable of considering design effects, even if the relevant information were available. However, generalized programs such as SAS, BMDP and SPSS produce coefficients using weighted least squares. The standard errors calculated by SPSS are much too low because the sum of the weights is used for the degrees of freedom. This can be corrected by dividing the weight on each record by the sum of the weights and multiplying by the sample size. This transformation will produce standard errors equivalent to those produced by SAS and BMDP. Specific requests to produce standard errors of estimates can be handled on a cost-recoverable basis. If this procedure is not followed, we suggest that users of regression packages be generally conservative in interpreting measures of statistical significance from these packages - perhaps using a factor of 2-3 to inflate the standard errors produced, since the standard errors in these packages are generally of the simple random type.

For further information on sampling and non-sampling errors associated with the survey, see Catalogue No. 13-207, pages 39-42.

COLLECTION AND PROCESSING PROCEDURES

The sample for the 1985 Survey of Consumer Finances used two thirds (or approximately 39,000 dwellings) of the April 1985 Labour Force Survey sample.

Data Collection and Processing: With the Survey of Consumer Finances being a supplement to the April Labour Force Survey, standard survey operations were carried out by updating the demographic information on all persons in the selected households and asking persons 15 years of age and over questions concerning their labour force activity during the previous week and work experience during the previous year. The interviewers then dropped off questionnaires for these persons requesting the completion of detailed income information for the calendar year 1984. During the survey period, the self-enumerated forms were picked up by the enumerator who made at least one more visit to the household. The questionnaires used in this survey are reproduced at the end of this documentation.

The labour force data were processed and edited according to established Labour Force Survey procedures. The income data were manually pre-edited, loaded onto the computer data base and linked with the Labour Force Survey data. The data were then processed through the computer edit system which checks individual records for consistency and completeness.

Response Rate: The income response rate for individuals 15+ was 80.5%. For a more detailed count of the original sample, vacant dwellings, etc., as well as provincial response rates, see pages 36 to 37 of Catalogue No. 13-207, 1984.

Imputation for Non-response: Income details for income non-respondents were imputed from income respondents (54,108 respondent individuals were used to impute income to 11,210 non-respondents). For imputation, the set of donor income respondents and income non-respondents were partitioned according to a pre-determined set of variables. A donor was selected from the set of potential donors on a geographically-nearest basis with reported income components transferred to an income non-respondent.

Income Tax Payable is the amount of income tax payable by income respondents and the sum of Federal Tax Payable and Provincial Tax Payable calculated for income non-respondents. Taxes for non-respondents were calculated in accordance with the computations outlined in the 1984 T1 General Individual Tax Return form (and the Quebec TPl General 1984 Return of Income form for non-respondents in Quebec).

Income After Tax is Total Income minus Income Tax Payable.

COMPARISON OF SCF ESTIMATES TO ADJUSTED PERSONAL INCOME

INDIVIDUALS - 1984

This detailed reconciliation is given for the convenience of researchers and must not be released or published without prior approval from the Director, Household Surveys Division, Statistics Canada. For a general description of differences in concepts and coverage see pages 43-44 of Catalogue No. 13-207 (1984 issue).

Item	SCF ¹		Estimates in Millions of Dollars
	NA Adjusted	NA Adjusted	
1. Wages and Salaries	101.9	209,844	205,945
2. Military Pay and Allowances	66.9	1,740	2,602
3. Farm Income	82.2	3,510	4,271
4. Non-farm Income from Self-employment Including Net Income from Roomers and Boarders Earnings	82.1	12,105	14,737
5. Interest, Dividends & Miscellaneous	99.8	227,199	227,555
6. Government Transfers (Sum of 7 to 12)	57.7	17,989	31,162
7. Family Allowances	80.0	34,200	42,757
8. Child Tax Credit*	97.4	2,500	2,566
9. Old Age Security and Guaranteed Income Supplement	97.1	1,435	1,478
10. Canada/Quebec Pension Benefits	102.4	10,039	10,065
11. Unemployment Insurance	90.1	4,937	5,479
12. Other Government Transfers ³	82.1	8,130	9,902
13. TOTAL (Sum of 1 + 2 + 3 + 4 + 5 + 6)	51.9	6,889	13,267
	92.7	279,388	301,474

¹ SCF amounts include receipts for individuals whose major source of income is military pay. These individuals are not included in published tables or on this tape.

² This item is obtained from Revenue Canada rather than National Accounts. 1983 Preliminary Taxation Statistics, Table B.

³ SCF - Social Assistance and Provincial Income Supplements plus Other Income from Government Sources plus Provincial Tax Credits.

NA = Item 6 - (Items 7+8+9+10+11).

PROCEDURES FOR MANUSCRIPT REVIEW

Because of the complexities inherent in data from household surveys, users of these data are advised to consult with the Household Surveys Division prior to publication of the data. A manuscript review service is provided by that Division to assist users. Users of microdata tapes are also advised prior to publishing their research to consult the relevant pages of the tape documentation provided regarding data reliability and the use of small samples.

The subscriber should file with Statistics Canada a copy of published research or other results based on the use of these microdata. The subscriber shall use the following form of accreditation in reference to the microdata:

"This analysis is based on the Statistics Canada microdata tape (name of tape) which contains data collected in the (1985 Survey of Consumer Finances). All computations on these microdata were done by (name of user organization) and the responsibility for the use and interpretation of these data is entirely that of the author(s)".

Manuscripts can be forwarded to: Director
Household Surveys Division
Statistics Canada
Jean Talon Building, 5th floor
Tunney's Pasture
Ottawa, Ontario
K1A 0T6

The user should distinguish clearly in the manuscript between data derived directly from the tape on the one hand and all added assumptions, adjustments and modifications introduced by him/her on the other. For example, true wage rates cannot be calculated from the data on the tape and the researcher must specify his assumptions (for which the survey does not provide direct evidence) that would make the averages calculated from the tape appropriate proxies for such a variable.

ESTIMATES OBTAINED FROM MICRODATA FILE

This data file consists of 74,394 individual records of whom 65,668 are income recipients and 50,038 are earners.

Pages 85-115 contain counts and aggregate income amounts obtained from this tape by various characteristics and are given for your use in checking computer output from the tape. On previous microdata files, individuals with exceptionally high incomes, large income losses from self-employment or unusual characteristics were excluded from the file. On the 1984 file, records with these conditions have had selected characteristics zeroed out rather than removing them from the file. Counts on pages 85 to 115 include these records.

We suggest that users not release or analyse data based on a sample of less than 100 records. In fact, due to our procedure of income imputation we feel that a slightly larger minimal sample would be more appropriate. Users employing small samples may wish to consult the **Income and Housing Surveys Section**.

QUESTION CARD

1985 SURVEY OF CONSUMER FINANCES

ITEM 50 ON F03 - SUPPLEMENTARY QUESTIONS AND CODES

Ask every applicable supplementary question for each person 15 years of age or over and enter a code in every column from

I	I	to	O
S	S		A
A	B		J

NOTE - BE SURE TO ASK EVERY QUESTION EXACTLY AS WORDED

I	I	IMMIGRATION STATUS
S	S	
A	B	

Is . . . Canadian born?

If 'YES', code:

00 - Persons born in Canada (including Nfld.) or Canadian by birth.

if 'NO', ask:

Since when has . . . been residing in Canada?

45 - Persons who immigrated to Canada before 1946.

46 to 85 - Persons who immigrated to Canada between 1946 and 1985. (Enter the last two digits of the actual year of arrival.)

S	STRETCHES OF UNEMPLOYMENT
U	
I	

Enter '0' if 'WU' is '00'; Otherwise, ask:

Were those weeks all in one stretch?

1 - Yes - 1 stretch

2 - No - 2 stretches

3 - No - 3 or more stretches

0 - Not applicable

M	MOTHER TONGUE
T	
C	

What is the language . . . first learned in childhood and still understands?

1 - English

2 - French

3 - Other

O	OTHER ACTIVITY
A	
J	

Enter '0' if 'WW' + 'WU' = '52'; Otherwise, ask:

What was . . . 's main activity during the weeks when he/she was neither working nor looking for work?

1 - Permanently unable to work

2 - Kept house

3 - Went to school

4 - Retired or voluntarily idle

5 - Other (Specify in 'Notes' of the F03)

0 - Not applicable

W	WEEKS WORKED
W	
D	

During 1984, in how many weeks did . . . do any work at a job or business?

(Include vacation, maternity leave, illness, strikes and lock-outs.)
