TYPDWELP

Field:	7
Long name:	Type of dwelling
Description:	Type of dwelling occupied at time of interview.
Unit of measure:	Code
Specifications:	1 (If DC_Q010 =1) 2 (If DC_Q010 =2) 3 (If DC_Q010 =3) 4 (If DC_Q010 =4) 5 (If DC_Q010 = (5 or 6)) 6 (If DC_Q010 between 7 and 9)

Codeset:

Code	Description
1	Single detached
2	Semi-detached (double)
3	Row or terrace
4	Duplex
5	Apartment
6	Hotel, rooming or lodging house, mobile home, or other

Notes: This variable describes the type of dwelling in which the household resided at time of interview. A dwelling is a structurally separate set of living premises with a private entrance from outside the building or from a common hall or stairway.

Single detached: A structure with one dwelling only, separated by open space from all other structures.

Double or semi-detached: A dwelling joined to only one other dwelling, separated from it by a wall extending from ground to roof.

Row or terrace: A dwelling unit in a row of three or more dwellings, sharing common walls extending from ground to roof and in which there are no other dwellings either above or below.

Duplex: Two dwellings, situated one above the other, not attached to any other structure and surrounded on all sides by open space.

Apartment: Dwellings in triplexes, quadruplexes or apartment separated from other dwellings by horizontal and vertical divisions.

Hotel, rooming or lodging house, mobile home, or other:
Includes:
- motels, hotels, tourist homes, halfway houses, school residences, YM/YMCAs;
- all rooming and lodging houses or individual rooms within such structures;
- bunk houses in lumber, mining, construction and military camps, and Hutterite colonies;
- mobile homes - movable dwellings designed and constructed to be transported (by road) on their own chassis to a site, and placed on a temporary foundation such as block posts or a prepared pad;
- others - dwellings (other than mobile homes) used as permanent residences and capable of being moved on short notice, for example, motor homes, tents, railroad cars, houseboats (including float-houses and live-aboard boats).

Additional clarification: Although we exclude identified collectives at the time of survey, it is possible that at the time of interview the household lived in a collective and that is why this option is included in Type of Dwelling.

YEARBUIP

Field:	8
Long name:	Year built
Description:	Period of construction of dwelling.
Unit of measure:	Code
Specifications:	1 (If DC_Q040 =(1 or 2)) 2 (If DC_Q040 =3) 3 (If DC_Q040 =4) 4 (If DC_Q040 =5) 5 (If DC_Q040 =6) 6 (If DC_Q040 >6)

HEATMAIP

Field:	21
Long name:	Principal heating equipment
Description:	This variable indicates the type of heating equipment which is chiefly used to heat the dwelling.
Unit of measure:	Code
Specifications:	1 (If DC_Q100 = 1) 2 (If DC_Q100 = 2) 3 (If DC_Q100 = (3 or 5)) 4 (If DC_Q100 = 4)
Codeset:	

Code	Description
1	Steam or hot water furnace
2	Forced air furnace
3	Heating stoves (including wood stove), cookstove, or other
4	Electric heating

Notes: This variable indicates the type of heating equipment which is mostly used to heat the dwelling in winter.

Steam or hot water furnaces distribute central heating through radiators located throughout the house and connected by pressure pipes.

Forced hot air furnaces distribute central heating by a motor-driven fan through vents located throughout the dwelling. (This is the most common central heating system.) Furnaces with a pump are included in this category. Other hot air furnaces distribute central heating by convection (natural) flow of hot air through vents located throughout the house. Gravity furnaces are included in this category.

Heating stoves are localised heating units with no central distribution system to other parts of the house (for example, oil space heater, gas space heater, wood stoves). Also includes cookstoves and any other type of heating equipment not listed above.

Electric heating includes electric furnaces and permanently installed baseboard electric heating and other types such as floor or ceiling heating wires in all or most rooms.

Notes:

Shelter includes expenditures on principal accommodation (either owned or rented) and on other accommodation such as vacation homes or accommodation while travelling.

Prior to 1997 in the Family Expenditure Survey, mortgage interest payments were reported in the "Shelter" category under both "Owned living quarters" and "Owned vacation homes". (Mortgage principal payments were reported under "Net change in assets and liabilities" since they were considered to pertain to a change in the value of household assets.)

For the Survey of Household Spending (starting with the 1997 reference year), interest payments are not available separately from principal. "Regular mortgage payments" on "Owned living quarters" (including both principal and interest) are included under "Shelter". However, the entire mortgage payment for owned vacation homes is included under "Money flows--assets, loans and other debts". Caution should therefore be used when comparing these data to data from previous years. Categories affected include: Total expenditure, Total current consumption, Principal accommodation, Owned living quarters, Regular mortgage payments, Other accommodation, Owned vacation home, and Money flows (assets, loans, and other debts).

Notes: Includes expenses on other property (not principal accommodation or vacation home), legal services, financial services, dues to unions and professional associations, contributions and dues for social clubs, forfeits of deposits, fines, money lost, and purchase of tools and equipment for work.

Prior to 1997, in the Family Expenditure Survey, interest on personal loans and interest paid on mortgages and loans for other property were reported under "Miscellaneous". (Principal payments for mortgages and loans were reported under "Money flows--assets, loans and other debts" since they were considered to pertain to a change in the value of household assets or debts.)

For the Survey of Household Spending (starting with the 1997 reference year), interest payments are not available separately from principal. Payments for personal loans and mortgages and loans pertaining to other property (including both principal and interest) are reported under "Money flows".

Also starting in 1997, expenditures for "Games of chance", formerly included under "Miscellaneous" became a separate sub-category. Caution should therefore be used when comparing these data to data from previous years. The categories "Total current consumption" and "Total expenditure" are also affected since "Miscellaneous" is a component of these categories.

Notes: "Games of chance (net)" equals the sum of expenditures on all types of games of chance minus the sum of winnings from all types of games of chance. However, if total winnings are greater than total expenditures, the amount to be subtracted from expenditures is set to $1 less than the expenditures and the value of the remaining winnings is moved to the variable "Other money receipts".

TOTCUCON

Field:	249
Long name:	Current consumption
Description:	Total expenses excluding personal taxes, personal insurance payments, and gifts and contributions.
Unit of measure:	Dollar ($)
Notes:	Expenses incurred during the survey year for food, shelter, household operations, household furnishings and equipment, clothing, transportation, health care, personal care, recreation, reading materials, education, tobacco products and alcoholic beverages, games of chance, and a miscellaneous group of items.

Caution should be used when comparing total current consumption for the Survey of Household Spending (1997 on) to total current consumption from previous years (Family Expenditure Survey). See "Shelter" and "Miscellaneous" for more information. Prior to 1997, expenditures for gifts were not included in total current consumption. Starting in 1997, these expenditures are reported in the appropriate category and, therefore, contribute to total current consumption.

TOTEXPEN

Field:	250
Long name:	Total expenditure
Description:	The expenditures included in "Current consumption" plus personal taxes, personal insurance payments and pension contributions, and gifts of money and contributions to persons outside the household.
Unit of measure:	Dollar ($)
Notes:	Caution should be used when comparing total expenditure for the Survey of Household Spending (1997 on) to total expenditure from previous years (Family Expenditure Survey). See "Shelter" and "Miscellaneous" for more information.

ADEQUACY

Field:	251
Long name:	Housing adequacy indicator
Description:	This variable was developed by Statistics Canada for Canada Mortgage and Housing Corporation (CMHC) to identify "any household living in a unit in need of major repairs, and/or lacking hot/cold running water, inside toilet, or a bath/shower".
	This variable classifies households according to whether their dwelling has at least one bathroom and is in reasonable repair.
Unit of measure:	Code
Specifications:	Adequate: DC_Q050 (need for repairs) = 2 (minor) or 3 (none) AND DC_Q080 (number of bathrooms) = 1 or more Not adequate: DC_Q050 (need for repairs) = 1 (major) OR DC_Q080 (number of bathrooms) = 0
Codeset:	

Code	Description

1	Inadequate

AFFORDAB

Field:	252
Long name:	Housing affordability indicator
Description:	This variable was developed by Statistics Canada for Canada Mortgage and Housing Corporation (CMHC).
	This variable uses a shelter cost-to-income ratio (STIR) to see if households spend more than an accepted amount on shelter: expenditures of 30 per cent or more are considered above the norm.
Unit of measure:	Code
Specifications:	Rent = RN_Q020 Regular mortgage = (MT_Q020 * MT_Q022) + (MT_Q040 * MT_Q042)

+ (MT_Q060 * MT_Q062) - (OP_Q030 * (100 - PctExpAgainstBusiness_OP_Q070 / 100 if MT_Q130 = 1)
 - (MT_Q125 if MT_Q140 = 1) Condo charges = OP_Q050 Property taxes = OP_Q030

Water, fuel and electricity = UT_Q010 + UT_Q020 + UT_Q030 + UT_Q040

Household income before taxes = IN_Q030 + IN_Q040 + IN_Q050 + IN_Q060 + IN_Q070 + IN_Q080 + IN_Q090 + IN_Q110 + IN_Q120 + IN_Q130

On this file, the housing affordability indicator is calculated as follows:

Affordable: Rent + Regular mortgage payments + Condominium charges + Property taxes + Water, fuel and electricity / Household income before taxes = less than 30%

Not affordable: Rent + Regular mortgage payments + Condominium charges + Property taxes + Water, fuel and electricity / Household income before taxes = 30% or more

Not applicable: Households where household income before taxes = 0 or less, and households with shelter cost-to-income ratio (STIR) = 1 or more.

1	Not affordable
9	Not applicable

SUITABLE

Field:	253
Long name:	Housing suitability indicator
Description:	This variable was developed by Statistics Canada for Canada Mortgage and Housing Corporation (CMHC) according to the National Occupancy Standard (NOS).
Unit of measure:	Code

Specifications:

The National Occupancy Standard (NOS), used to measure housing suitability, determines the number of bedrooms a household should have for households of different size and composition. According to the National Occupancy Standard, there must be one bedroom for each:

- cohabiting adult couple;

- unattached household member 18 years of age and over;

- same-sex pair of children under age 18;

- additional boy and/or girl in the family, unless there are two opposite sex siblings under 5 years of age, in which case they are expected to share a bedroom.

A household of one individual can occupy a bachelor unit (i.e., no bedroom).

For example, a household composed of a couple and two children (boy aged 4, and girl aged 2) is expected to require 2 bedrooms. When the boy turns 5 years old, the requirement would increase to 3 bedrooms.

Codeset:

Code	Description

Notes:

The National Occupancy Standard was developed by CMHC through a formal Federal/ Provincial/Territorial consultation process to encompass the commonalities of all the provincial/territorial occupancy standards and to serve as Canada's official housing suitability measure or indicator. RQNMBEDP

Field:	254
Long name:	Required number of bedrooms
Description:	This variable was developed by Statistics Canada for Canada Mortgage and Housing Corporation (CMHC). This variable represents the number of bedrooms required by the household under the National Occupancy Standard.
Unit of measure:	Count
Specifications:	The calculation of the required number of bedrooms is the first step in the calculation of the variable SUITABLE (formerly CROWDED). According to the National Occupancy Standard there must be one bedroom for each:

- cohabiting adult couple;
- unattached household member 18 years of age and over;
- same-sex pair of children under age 18;
- additional boy and/or girl in the family, unless there are two opposite sex siblings under 5 years of age, in which case they are expected to share a bedroom. A household of one individual can occupy a bachelor unit (i.e. no bedroom).
