EXECUTIVE SUMMARY

Since SLID uses computer-assisted interviewing (CAI) for data collection, no print questionnaire is required for collection. The question wordings and flow are documented as part of the SLID research paper series.

This document outlines the structure of the January 1995 labour interview. The information is presented in the same fashion as previous questionnaire documentation. In particular, the 1994 labour interview is presented in SLID Research Paper 94-05 "SLID Labour Interview Questionnaire - February 1994". Changes made to the labour interview between 1994 and 1995 are also discussed.

TABLE OF CONTENTS

1. INTRODUCTION

Every January, the SLID (Survey of Labour and Income Dynamics) labour interview is conducted using computer-assisted interviewing (CAI). CAI is paperless interviewing. This document is therefore a written approximation of the CAI interview, or the questionnaire. The CAI process is as follows:

a) A question appearing on the computer screen is read aloud to the respondent.

b) The respondent's answer is directly entered by the interviewer.

c) Based on the answer given, and/or age or other flow criterion, the computer determines the next question to be asked and displays it on the screen.

The foundation for the labour interview was a content document produced in September 1992 (SLID Research Paper 92-01A, *Content of the Survey of Labour and Income Dynamics: Part A - Demographic and Labour Content*). From this content description, a labour interview was derived. Subsequent field work has fine-tuned the instrument.

This research paper presents the content of the labour interview[1] including question wording, possible responses, and flows of questions. It will also outline changes since the 1994 labour interview, and explain the rationale for these changes.

2. HOW TO READ THIS DOCUMENT

Question numbers: For each section, the question numbers generally refer to the actual numbers used in the software and which appear on an interviewer's computer screen. Text in capital letters is read, as worded, by the interviewer. Those questions in lower case with "Interviewer:" at the beginning are questions to be answered directly by the interviewer without asking the respondent. Those

---

[1] The demographic questions will be presented in a separate document.

questions with "Internal logic:" at the beginning are questions answered directly by the computer. They are invisible to the interviewer, and are required to direct question flow.

Pre-fill items: These are items specific to each respondent's interview. The software adds the relevant information into the question, making it simply a matter of reading for the interviewer. Prefill items include:

[respondent] - This is the first and last name of the household member that the questions refer to. This is not necessarily the person who is talking to the interviewer.

[employer] - This is the employer referred to in the question. Questions are asked about as many as six employers. In each case, the specific employer's name is placed in the pre-fill.

[type of work] - This is a short description of the respondent's occupation or type of work performed, at last contact.

[industry] - This is a description of the industry of the employer as provided by the respondent.

[start date] and [end date] - Depending on the question, these refer to either the start and end dates of a specific job, of an unpaid absence, or a jobless spell.

Headers: For some sections, important information is noted at the top of the screen. In this document, this information is given at the beginning of each section description. For example, in question CHAR-Q38_CHG the header gives the wage at the time of last contact, and that specified during this interview in CHAR-Q38. This edit is triggered for respondents with a wage increase greater than 10% or any decrease, from past to current year, with the same employer and wage category (eg., per hour). Its purpose is to confirm that the change indeed occurred and is not a reporting or keying error.

<u>Ranges:</u> Hard and soft ranges are specified for some of the questions. The hard range gives the highest and lowest acceptable response values. For example, in CHAR-Q14 (number of employees supervised directly) a hard range of 1-999 exists. If the interviewer tries to enter a number greater than 999, the system will not accept this.

The soft range specifies an upper and lower limit which if exceeded will result in a probe to confirm that the amount entered is correct. If it is correct the interviewer can enter it as long as it does not exceed the hard range. For example, if the respondent states that his or her salary was $105,000, this exceeds the soft range of $. 01-$99,999 in CHAR-Q38. If confirmed as correct, the interviewer can enter this amount as it does not exceed the $999,999 upper limit of the hard range.

<u>Function Keys:</u> Interviewers have a number of keys on the computer (function keys) which are available to provide them with the following options.

> <u>Comment</u> - gives the interviewer the opportunity to add additional information in a note that will be attached to the data for that question. These comments are often useful during data processing.
> <u>Don't know:</u> to indicate if the respondent doesn't know the answer to the question. This answer is shown in this paper as DK.
> <u>Refusal</u> - to indicate if the respondent refuses to answer the question. This response is shown in the paper as R.
> <u>Options</u> - gives the interviewer access to some optional functions or information rosters. The choices available are:
> Household list - name, age, sex, marital status of each household member;
> Employer Roster - names of each employer, start and end dates of jobs and whether job is unended;
> Job Calendar - showing jobless spells;

"Ghost" Roster - list of former employers for whom the respondent has reported working in previous SLID interviews.

3.   CONTENT

The general flow of the Labour Interview is given in the flowchart on the previous page.

An initial divergence based on age can be seen. Those aged 16-69 are asked the labour series of questions, while those 70 years and over flow directly to the Disability module. For the former, if the respondent worked since the last interview, the characteristics of up to six jobs are asked, followed by identification of jobless spells. If a jobless spell occurred the respondent is asked the search series of questions. These are also asked for those who have not worked since the last labour interview. The compensation questions are then asked of all respondents, as are subsequent modules on education, disability and contact.

Comparing the current modules with those given in the 1994 labour interview [SLID Research Paper 94-05 *SLID Labour Interview Questionnaire: February 1994*] reveals the following major changes:

* "Ghost" employers: These are "new" employers for whom a person has previously worked. That is, a person stops working for an employer (either voluntarily or involuntarily), but then subsequently is rehired. To allow the identification of such movements, a list of former employers is provided to the interviewer. When the respondent reports a new employer, the interviewer first checks whether it is a return to a former employer or a completely new employer.

* In 1994, descriptive information was collected on up six employers during the reference year, but detailed characteristics were collected for up to 3 employers only. This was done to ease response burden for those with

more than three employers. This caused operational complexities.
Therefore, detailed information on all employers will now be collected.
The number of respondents with more than three employers is so low that
response burden is not a major concern.

●   In the COMP module, information on monthly receipt of Unemployment
    Insurance, Workers' Compensation, and Social Assistance are asked. To
    reduce "seam" problems in the data, those persons reporting the receipt of
    these benefits in December 1993 (just prior to the reference year for this
    interview) are given this information, and asked to confirm or deny.

●   Some questions provide a list of choices for the interviewer to mark the
    response, but provide an "Other - specify" option if the response cannot be
    coded into one of the categories listed. Certain responses, which were
    entered frequently in the "Other -specify" in January 1994, were added to
    the check list to save time during the interview. These changes are:

    CHAR-Q4 - how respondent got their job
    Two categories added - "Union" and "Contacted directly by employer".
    One category modified - "Employment agency" by adding "incl. Canada
    Employment Centres".

    CHAR-Q38 - wage unit
    Added the option DAILY as a wage unit.

    DATES-Q13B - Reasons Lost Job
    "Business slowdown (not caused by seasonal conditions)" was reworded.
    The category is now "Layoff/business slowdown (not caused by seasonal
    conditions).

New category added - Temporary job / Contract ended

DATES-Q13B - Reasons Left Job

New category added - Dissatisfied with job. When this choice is selected, would then go to a second question to get more details on the reason for dissatisfaction - DATES-Q13A2.

The categories "Poor working conditions" and "Low Pay" are removed, and included as a reason for dissatisfaction. Reasons provided in this list are: Poor pay, Not enough hours of work, Too many hours of work, Poor physical conditions (bad ventilation, too noisy, etc), Sexual harassment, Personal conflict with employer/other employees, Work too stressful, Other -specify

4. LABOUR INTERVIEW (EMP)

The Labour Interview (EMP) is comprised of six main modules as outlined in the following table.

MODULES OF THE LABOUR SURVEY AND MAJOR COMPONENTS

DATES	CHAR	SEARCH	COMP	EDUC	DISAB
●Job Tenure ●Reasons for leaving job	●General Job Characteristics ●Supervisory/ Managerial Responsibilities ●Work Schedule ●Wages & Benefits ●Absences from work for 1 or more weeks	●Jobless Spells ●Job Search Activities	●Receipt of Unemployment Insurance ●Receipt of Workers' Compensation ●Receipt of Social Assistance or Welfare	●Months Attended ●Type of Educational Establishment ●Information on any Diplomas, Certificates or Degrees	●Identification of Disabilities/ Activity Limitations ●Impact of condition on amount and/or the ability to work

DATES: Employer start and end dates are collected for up to 6 employers during the year. This module has an employer roster (a list of all employers the person worked for during the year), a ghost employer roster (a list of former employers reported in previous interviews) and a calendar to help both the interviewer and the respondent situate events. Feeding back of employer names from the previous January also occurs in this module. For a person on unpaid absence at the beginning of last January, the absence as well as the employer name is fed back.

Regarding "Don't Know's" in employer dates: To collect information on an employer, the interviewer must be able to establish the date the person started working for that employer. If the interviewer is able to establish the month the job began, but not the day, the computer will set the day to 01 and the employer will be accepted. Similarly, if the interviewer can establish the month the job ended, but not the day, the computer will set the day to 28. However, if the interviewer cannot get an estimate of the month in which the job started or ended, it is impossible to proceed with that employer, and it is deleted from the roster. If the respondent reports no employers during the past year, the respondent skips to SEARCH.

The following classification of employer-types is used in DATES:
Type 1 - an employer for whom the respondent was working at the time of the last interview;

Type 2 - an employer for whom the respondent was not working at the time of the last labour interview but to whom he/she was attached (i. e. , on temporary layoff or away on an absence of more than 4 weeks);

Type 3 - an employer not previously identified in the survey, generally one the respondent started working for during the reference year.

Jobless spells are derived from the employer dates, but not confirmed with respondents.

Employment with each employer is characterized as ended or unended, referring to whether the respondent was working for the employer at the end of the reference year. If a Type 1 job is denied, the job is deleted without an array of probing questions. For Type 2 jobs, one probing question is asked if the job is denied.

CHAR: Characteristics - This will be collected for up to 6 employers per respondent. For type 1 and 2 employers, information on employer name, and type of work performed is fed back to the respondent.

A change in occupation and wages can be recorded, as can two changes in work schedules for type 1 and 2 employees. This allows greater precision in deriving implicit hourly wage rates or total annual earnings from an employer (total annual earnings from all employers will also be collected in May in the income interview). The number of absences of one week or more (except paid vacation), and details on the first and last absences with each employer are also recorded.

SEARCH: If there was a jobless spell identified in DATES, or if the respondent did not work at any time in the year, flow will be directed to this module. For each jobless spell, there are a series of questions on job search, and the desire for employment.

For people who begin the year with a jobless spell, the search status in January is fed back to the respondent only if they were looking for work. Due to respondent sensitivity, feedback of "not looking for work" has been dropped.

COMP: Compensation - This module asks questions regarding receipt of UI, SA, or WC. This information is collected for everyone, independently of any reported job absences and jobless spells. The information which is collected includes:

-    receipt of UI, WC, and SA during reference year

-    months received

EDUC: Education - This module on formal education includes educational activity during the year, and degrees, certificates or diplomas obtained. If respondents attended more than one type of educational institution several flows will result, providing information on all formal education.

DISAB: Disability - This module contains questions to "screen" for disability. For those identified, questions related to impact on work are asked.

INTERVIEW

If respondent is 70 years of age or older, interview skips to DISAB-Q1A.

Otherwise, the labour portion of the interview begins with DATES.

All dates are in Day/Month/Year (DDMMYY) format unless otherwise stated.

4. 5   EDUCATION MODULE

The Education module captures all institutions attended by the respondent during the survey year and all degrees, certificates or diplomas completed. This results in a series of flows for each type of institution attended (EDUC-Q3). For example: If a respondent attended high school and university, we would ask EDUC-Q4A, and EDUC-Q4F, 5F & 6F. If another attended community college and then a business or commercial school, we would ask the B series (EDUC-Q4B to EDUC-Q7B) and then the D series.
These flows are close approximations, with each (except for high school) ascertaining whether any degree, certificate or diploma was obtained, field of study, program length, and whether studies were part-time, full-time, or both.

If EDUC-Q1 = yes (attended an educational institution in 1994), after flows for all institutions have been exhausted, EDUC-Q4G will ask about other degrees, certificates, or diplomas received during the survey year. This will isolate those respondents who would have received a degree in January '93, from a program that finished in December '92, but then started another program in 1994. Without EDUC-Q4G, these "degrees" would not be recorded. If EDUC-Q1 = No, EDUC-Q4H will also pick up these "hidden" degrees.
