SLID Record Layout, 2010
External Cross-Sectional Person File (ec2010pr)

Variable name	Type	Size	Field	Start pos.	Long name
01100 Sample control - Identifiers					
pucpid26	Character	7	1	1	Cross-sect random person identifier
puchid25	Character	7	2	8	Cross-sectional random household identifier
01120 Sample control - Identifiers - Economic Family					
d31fam26	Character	2	3	15	Economic family identifier
01125 Sample control - Identifiers - Census Family					
d31cf26	Character	2	4	17	Census family identifier
01110 Sample control - Identifiers - Year					
year99	Numeric	4.0	5	19	Refyear
01200 Sample control - Weights					
wtcsld26	Decimal	10.4	6	23	Regular integrated cross-sectional weight for SLID
03110 Personal characteristics - Demographics - Year of birth, sex and marital status					
ecage26	Numeric	3.0	7	33	Person's age , refyear, external cross-sec file
ecsex99	Character	1	8	36	Sex of respondent on external cross-sectional files
ecyob26	Numeric	4.0	9	37	Person's year of birth on external cross-sectional files
marst26	Character	2	10	41	Marital status of person as of December 31 of refyear
03130 Personal characteristics - Demographics - Major activity and health					
mjacg26	Character	1	11	43	Person's major activity at end of refyear, group
03140 Personal characteristics - Demographics - Family situation					
fslac26	Character	1	12	44	Flag - Person is living with adult children (25+), refyear
fslsp26	Character	1	13	45	Flag - Person living with spouse in refyear
03200 Personal characteristics - Ethnocultural characteristics					
immst15	Character	1	14	46	Flag - Person is an immigrant
yrimmg26	Character	1	15	47	Number of years since person immigrated to Canada, group
03300 Personal characteristics - Activity limitations					
disabs26	Character	1	16	48	Flag - Disability status for the reference year
03510 Personal characteristics - Geography - Geographic area					
pvreg25	Character	2	17	49	Province of residence group, household, December 31, refyear
uszga25	Character	1	18	51	Adjusted size of area of residence
03610 Personal characteristics - Family and household characteristics - Household size and type					
hhsz25	Numeric	2.0	19	52	Number of persons in household as of December 31 of refyear
HHCOMP25	Character	1	20	54	Household composition as of December 31 of refyear
03612 Personal characteristics - Family and household characteristics - Dwelling, housing					
condm25	Numeric	8.0	21	55	Monthly condominium fee paid by household for dwelling
dwltyp25	Character	1	22	63	Type of dwelling
dwtenr25	Character	1	23	64	Ownership of dwelling
repa25	Character	1	24	65	Repairs dwelling needed
suit25	Character	1	25	66	Flag - Dwelling suitable, according to Nat. Occ. Standard
mortg25	Character	1	26	67	Flag - There is a mortgage on the dwelling
mortgm25	Numeric	8.0	27	68	Monthly mortgage payments, excluding property taxes
rentm25	Numeric	8.0	28	76	Regular monthly rent paid by the household for the dwelling
05110 Labour - Labour market activity patterns - Number of jobs and job change					
multj28	Character	1	29	84	Flag - Multiple job holder in any month in refyear

Variable name	Type	Size	Field	Start pos.	Long name
05110 Labour - Labour market activity patterns - Number of jobs and job change					
nbjbs28	Numeric	2.0	30	85	Number of jobs held during refyear
05120 Labour - Labour market activity patterns - Labour force status and main job					
alfst28	Character	2	31	87	Annual labour force status
ml01v28	Character	2	32	89	Monthly labour force status: January
ml02v28	Character	2	33	91	Monthly labour force status: February
ml03v28	Character	2	34	93	Monthly labour force status: March
ml04v28	Character	2	35	95	Monthly labour force status: April
ml05v28	Character	2	36	97	Monthly labour force status: May
ml06v28	Character	2	37	99	Monthly labour force status: June
ml07v28	Character	2	38	101	Monthly labour force status: July
ml08v28	Character	2	39	103	Monthly labour force status: August
ml09v28	Character	2	40	105	Monthly labour force status: September
ml10v28	Character	2	41	107	Monthly labour force status: October
ml11v28	Character	2	42	109	Monthly labour force status: November
ml12v28	Character	2	43	111	Monthly labour force status: December
wksem28	Numeric	2.0	44	113	Total number of weeks employed during refyear
wksnlf28	Numeric	2.0	45	115	Total number of weeks not in the labour force during refyear
wksuem28	Numeric	2.0	46	117	Total number of weeks unemployed during refyear
05130 Labour - Labour market activity patterns - Class of worker					
fpdwk28	Character	1	47	119	Flag - Person was a paid worker during refyear
fsein28	Character	1	48	120	Flag - Self-employed incorporated job in refyear
fseui28	Character	1	49	121	Flag - Self-employed unincorporated job in refyear
05140 Labour - Labour market activity patterns - Work schedule					
alhrp28	Numeric	4.0	50	122	Total hours paid all jobs during refyear
mtlswk28	Numeric	3.0	51	126	Number of months since person last worked
scsum28	Character	2	52	129	Yearly summary of schedules of jobs during the refyear
05150 Labour - Labour market activity patterns - Earnings					
cmphrw28	Decimal	6.2	53	131	Composite hourly wage all paid jobs in refyear
rcvcmp28	Character	1	54	137	Flag - Received compensation during refyear
05200 Labour - Work experience					
yrxfte11	Numeric	2.0	55	138	Number of years of work experience, full-year full-time
05410 Labour - Job characteristics - Dates and duration					
jobdur1	Numeric	3.0	56	140	Duration of job up to the end of current refyear (months)
05420 Labour - Job characteristics - Class of worker					
clwkr1	Character	2	57	143	Class of worker in refyear
prmjb1	Character	1	58	145	Flag - Permanent job
reanp1	Character	2	59	146	Reason why this job is not permanent
05430 Labour - Job characteristics - Work schedule					
awh12v5	Decimal	5.1	60	148	Average weekly hours at job in December
fllprt1	Character	1	61	153	Flag - Job was full-time in refyear
reaisc1	Character	2	62	154	Reason for irregular work schedule at end of the year
reawpt1	Character	2	63	156	Reason why person worked less than 30 hours per week
scdtyp1	Character	2	64	158	Type of work schedule at end of year for given job
tothrp1	Numeric	4.0	65	160	Total hours paid at this job in refyear
typpt1	Character	1	66	164	Type of part time work at this job for refyear
wkhm1	Character	1	67	165	Flag - Person regularly worked at home for this job
hrwkhm1	Decimal	5.1	68	166	Hours per week worked at home for job
05440 Labour - Job characteristics - Occupation					
nocg2e6	Character	2	69	171	NOC-S 2006; NOC-S 2001 (End of reference year)

Variable name	Type	Size	Field	Start pos.	Long name
05450 Labour - Job characteristics - Supervisory responsibility					
manag1	Character	1	70	173	Flag - Job was perceived as managerial
superv1	Character	1	71	174	Flag - Job involved supervising employees
05460 Labour - Job characteristics - Wages and benefits					
imphwe1	Decimal	6.2	72	175	Hourly wage at end of job or end of refyear
penpln1	Character	1	73	181	Flag - Has pension plan with this job in refyear
uncoll1	Character	1	74	182	Flag - Union member or covered by collective agreement
05470 Labour - Job characteristics - Employer attributes					
muloc10	Character	1	75	183	Flag - Employer operates at more than one location
n07c3g10	Character	2	76	184	Grouping 3, industry code of employer based on NAICS 2007
nbema10	Character	1	77	186	Number of employees at all locations
nbempl1	Character	1	78	187	Number of employees at person's place of work
pubpv10	Character	1	79	188	Flag - Employer is in public or private sector
07100 Financial situation - Income sources					
alimo42	Numeric	8.0	80	189	Support payments received
alip42	Numeric	8.0	81	197	Support payments paid
atinc42	Numeric	8.0	82	205	After-tax income
capgn42	Numeric	8.0	83	213	Taxable capital gains
ccar42	Numeric	8.0	84	221	Child care expenses
chfed42	Numeric	8.0	85	229	Total of federal child benefits (CCTB, WIS, NCBS)
chprv42	Numeric	8.0	86	237	Total provincial child benefits
chtxb42	Numeric	8.0	87	245	Total federal & provincial child benefits
cpqpp42	Numeric	8.0	88	253	CPP & QPP benefits
cqpc42	Numeric	8.0	89	261	Canada & Quebec Pension Plan contributions
earng42	Numeric	8.0	90	269	Earnings
eipr42	Numeric	8.0	91	277	Employment Insurance contributions
fditx42	Numeric	8.0	92	285	Federal income tax for Quebec residents
fmse42	Numeric	8.0	93	293	Farm self-employment net income including farm program
gi42	Numeric	8.0	94	301	Guaranteed Income Supplement under federal OAS
gstxc42	Numeric	8.0	95	309	Federal GST/HST Credit, excludes provincial sales tax credit
gtr42	Numeric	8.0	96	317	Government transfers, federal & provincial
inctx42	Numeric	8.0	97	325	Income tax, federal plus provincial
inva42	Numeric	8.0	98	333	Investment income
majri42	Character	2	99	341	Major source of income
mbinc42	Numeric	8.0	100	343	Disposable income for Market Basket Measure (MBM)
medx42	Numeric	8.0	101	351	Direct medical expenses
mtinc42	Numeric	8.0	102	359	Market income
nfmse42	Numeric	8.0	103	367	Non-farm self-employment net income
oas42	Numeric	8.0	104	375	Old Age Security pension
oasgi42	Numeric	8.0	105	383	Total of Old Age Security benefits
ogovtr42	Numeric	8.0	106	391	Other government transfers
ottxm42	Numeric	8.0	107	399	Other Taxable Income
pen42	Numeric	8.0	108	407	Private retirement pensions. Includes pension income splitting
pengiv42	Numeric	8.0	109	415	Deduction for elected split-pension amount.
penrec42	Numeric	8.0	110	423	Elected split-pension amount.
phpr42	Numeric	8.0	111	431	Public health insurance premiums
prpen42	Numeric	8.0	112	439	Private retirement pensions
pvitx42	Numeric	8.0	113	447	Provincial income tax
pvtxc42	Numeric	8.0	114	455	Provincial tax credits
rppc42	Numeric	8.0	115	463	Registered pension plan contributions

Variable name	Type	Size	Field	Start pos.	Long name
07100 Financial situation - Income sources					
rspwi42	Numeric	8.0	116	471	RRSP withdrawals
sapis42	Numeric	8.0	117	479	Social Assistance

ttinc42	Numeric	8.0	119	495	Total income before taxes
uccb42	Numeric	8.0	120	503	Universal child care tax benefit
udpd42	Numeric	8.0	121	511	Union dues (and other professional premiums)
uiben42	Numeric	8.0	122	519	Employment Insurance benefits
wgsal42	Numeric	8.0	123	527	Wages & salaries before deductions
wkrcp42	Numeric	8.0	124	535	Workers' compensation benefits
09100 Education - Educational activity					
atbus20	Character	1	125	543	Flag - Attended business or commercial school in refyear
atcc20	Character	1	126	544	Flag - Attended college or applied arts tech. inst., refyear
atcegp20	Character	1	127	545	Flag - Attended CEGEP in refyear
atelhi20	Character	1	128	546	Flag - Attended high school in refyear
attrd20	Character	1	129	547	Flag - Person attended trade school in refyear
atuniv20	Character	1	130	548	Flag - Person attended university in refyear
cmphi20	Character	1	131	549	Flag - Person completed high school in refyear
fllprt20	Character	1	132	550	Flag - Person full-time student during refyear
rccoll20	Character	1	133	551	Flag - Rec'd cert\dipl. from coll./bus./trade/voc./CEGEP, ry
rcuniv20	Character	1	134	552	Flag - Received university degree/cert./dip., refyear
studtf26	Character	1	135	553	Flag - Attending school, coll., CEGEP or univ, in refyear
09210 Education - Level of schooling - Attainment					
cmphi18	Character	1	136	554	Flag - Person completed high school
dgcoll18	Character	1	137	555	Flag - Ever received non-univ. post-secondary cert./dipl.
dguniv18	Character	1	138	556	Flag - Ever recd univ. deg./cert./dipl. (from below Bach. to PhD)
encoll18	Character	1	139	557	Flag - Ever enrolled non-university training
enuniv18	Character	1	140	558	Flag - Person has ever enrolled in university
hleveg18	Character	2	141	559	Highest level of education of person, 1st grouping
yrcoll18	Decimal	4.1	142	561	Nbr Years completed at coll./tech. inst./trade/voc./CEGEP
yrelhi18	Decimal	4.1	143	565	Number of years completed at elementary & high school
yrpsec18	Decimal	4.1	144	569	Number of years of postsecondary schooling completed
yrrnug18	Character	2	145	573	Year rec'd recent non-univ. postsec. dipl., 5 yrs int., grp
yrrung18	Character	2	146	575	Year received highest university degree, 5 yr interv., group
yrschl18	Decimal	4.1	147	577	Number of years of schooling completed by person (elem, high school, post secondary)
yruniv18	Decimal	4.1	148	581	Number of years of university person has completed

Variable name	Type	Size	Field	Start pos.	Long name
01100 Sample control - Identifiers					
puchid25	Character	7	1	1	Cross-sectional random household identifier
01110 Sample control - Identifiers - Year					
year99	Numeric	4.0	2	8	Refyear
01120 Sample control - Identifiers - Economic Family					
d31fam26	Character	2	3	12	Economic family identifier

Theme/Subtheme: 01200 Sample control - Weights

wtcsld26

Start Position:	23
Type/Length:	Decimal(10.4)
Format:	99999.9999
Long Name:	Regular integrated cross-sectional weight for SLID
Description:	Regular integrated cross-sectional weight for SLID. This weight is valid for cross-sectional estimates using the Survey of Labour and Income Dynamics only and is available for all years of that survey, i.e., 1993 onwards. See also variable ICSWT26. Note that the SLID sample consisted of only one panel of respondents from 1993 to 1995, while since 1996 it consists of two panels of respondents; the weight takes this into account.

This is an integrated weight, which is to say that all persons in the same household receive the same weight. For estimates of families or households, the weight is counted once for each family or household.

Most recent revisions:
With the release of data for 2003, the weights were revised for 1993 to 2002. With this revision a new calibration strategy was implemented which included adding the number of earners as an additional dimension of the calibration. The number of earners was obtained from the Canada Revenue Agency T4 files. In addition, population control totals used in the calibration were updated based on the 2001 census.

With the release of data for 2004, the weights were revised for 2003. The calibration of the original weights for 2003 used modeled T4 data because the final T4 data was not yet available. The revision of the 2003 weights the following year (with the release of data for 2004), used the final T4 data in the calibration step.

With the release of data for 2005, the weights were revised for 2004. The calibration of the original weights for 2004 used modeled T4 data because the final T4 data was not yet available. The revision of the 2004 weights the following year (with the release of data for 2005), used the final T4 data in the calibration step.
With the release of data for 2010, the weights for years 2006 to 2009 were revised to take into account the population counts based on the 2006 Census of Population, instead of the 2001 Census.

Theme/Subtheme: 03130 Personal characteristics - Demographics - Major activity and health

mjacg26

Start Position:	43
Type/Length:	Character(1)
Long Name:	Person's major activity at end of refyear, group
Description:	Person's major activity at the end of reference year (grouping). This is a direct response to a question (not derived). Due to a technical problem in the collection of data for 1999, respondents aged 70 and older were not asked about their major activity that year. To compensate for this problem, an imputation program was developed during processing of 2000, using data for years 1998 and 2000. Nonetheless, as a result of this imputation, the number of respondents aged 70 and older with a value for major activity as "retired" is high in 1999 as compared to other years.

Not available prior to reference year 1996. Codes 08 and 09 of variable MJACT26 are available starting with reference year 1999. Between reference years 1996 and 1998 inclusively, this question was about the whole year. It was not specific to the end of the year.

Population:	Persons aged 16 or older for SLID (1993 onwards);
	Persons aged 15 and older for SCD (1976 - 1997)

Theme/Subtheme: 03300 Personal characteristics - Activity limitations

disabs26

Start Position:	48
Type/Length:	Character(1)
Long Name:	Flag - Disability status for the reference year
Description:	Disability status, for the reference year. This is a summary flag in response to several questions. Starting with reference year 1999, the screening questions for disability status were significantly modified to reflect the new questions prepared for the 2001 Census. The new questions ask whether the person has any difficulty doing any of the activities of daily living and whether the person has a physical condition or mental condition or health problem that reduces the amount or kind of activity he or she can do in any of a few different types of situations. Starting in 1999, this variable is "yes" if any of the following variables is "yes": CNDFG26, CNDHM26, CNDWK26, CNDOT26. Prior to 1999, it is the same derivation based on the following variables, which represent the old version of the questions: DISLWK26, DISLOT26, DISHAN26. FOR SCF, indicates if respondent is permanently unable to work
Population:	Persons aged 16 or older for SLID (1993 onwards); Persons aged 15 and older for SCF (1976 - 1997)
Source Question:	For years 1993-1998: DISLWK26, DISLOT26, DISHAN26

Theme/Subtheme: 03510 Personal characteristics - Geography - Geographic area

uszga25

Start Position:	51
Type/Length:	Character(1)
Long Name:	Adjusted size of area of residence
Description:	Adjusted size of area of residence is assigned according to the variable CMAPO (CMA/CA population). However, if the household is not in a CMA/CA, the USZGA code depends on the variable URBPO (Population of area of residence) and USZGA is equal to the variable URBSZG (Size of area of residence).
	Notes: Reference years prior to 1999 follow the 1991 Census geography-base boundaries. Reference years from 1999 to 2004 follow the 2001 Census geography-base boundaries and reference years 2005 and on follow the 2006 Census geography-base boundaries. The categories for USZGA are the same. Rural areas outside of CMAs or CAs can include some small population centres. CAs with less than 30,000 inhabitants include population centres with less than 10,000 inhabitants.
Population:	All households
Source Question:	DEC31HH.CMAPO25 or DEC31HH.URBPO25
Processing:	If CMACA25 is not (000, 996, 997, 999) then get the CMAPO25 and assign accordingly the appropriate codes to USZGA25. If CMACA25 is (000, 996, 997, 998, 999) then USZGA25=URBSZG25.

repa25

Start Position:	65
Type/Length:	Character(1)
Long Name:	Repairs dwelling needed
Description:	Respondent's perception of the repairs the dwelling needed to restore it to its original condition.

Canada Mortgage and Housing Corporation (CMHC) defines the "adequacy" of a dwelling as not requiring major repairs.

"Major repairs" include, for example, corroded pipes, damaged electrical wiring, sagging floors, bulging walls, damp walls and ceilings, crumbling foundation, rotting porches and steps.

"Minor repairs" include, for example, small cracks in interior walls and ceilings, broken light fixtures and switches, leaking sinks, cracked or broken window panes, some missing shingles or siding, some peeling paint.

"Regular maintenance" includes, for example, painting, leaking faucets, clogged gutters or eaves troughs.

Remodelling or energy improvements are excluded.

Available starting with reference year 2002.

Theme/Subtheme: 05140 Labour - Labour market activity patterns - Work schedule

scsum28

Start Position:	129
Type/Length:	Character(2)
Long Name:	Yearly summary of schedules of jobs during the refyear
Description:	Yearly summary of schedules of jobs held by respondent during the reference year. Full-year (53 weeks) and part-year (less than 53 weeks) are determined according to the annual labour force status. Full-time (130 hours or more per month) and part-time (less than 130 hours per month) are determined according to the monthly hours worked at all jobs.

Note: SLID has 53 weeks per year because it follows the operational calendar of the Labour Force Survey. Therefore, if one counts January 1st to January 7th as week number 1 and continues to the end of the year, there will be 53 weeks. However, the 53rd week may not necessarily be a full week with 7 days.

Theme/Subtheme: 05430 Labour - Job characteristics - Work schedule

tothrp1

Start Position:	160
Type/Length:	Numeric(4.0)
Long Name:	Total hours paid at this job in refyear
Description:	Total hours paid at this job in reference year. This is equal to the total hours scheduled minus scheduled hours during any unpaid absences or months not worked in this job.

Absence spells are not collected if someone is not a paid worker nor on call. If we do not know whether an absence is paid, it is assumed it is unpaid and hours absent are subtracted from hours usually worked.

If value is missing, it is imputed using the average hours worked based on whether the person works full-time or part time (FLLPRT1), based on sex (SEX99), based on the number of months worked (NBMTWK1) and based on age groups (16 to 24, 25 to 49, 50 to 69). For respondents over 49, we do not take into account the sex for the imputation. This is done since the lower number of classes in this group.

imphwe1

Start Position:	175
Type/Length:	Decimal(6.2)
Format:	$999.99
Long Name:	Hourly wage at end of job or end of refyear
Description:	Implicit hourly wage for this paid worker job at the end of the reference year or end of the job if it ended during the reference year. The amount includes tips, bonuses and commissions.

For respondents who reported their wage or salary at this job as an hourly amount, the value is taken directly. For respondents who reported their wage or salary on some other basis, the amount is converted to an hourly "implicit" rate using information provided like number of months worked, number of weeks worked and number of hours per week usually worked.

Paid worker jobs with zero paid hours are assigned the value "not applicable".

Theme/Subtheme: 01200 Sample control - Weights

wtcsld26

Start Position:	14
Type/Length:	Decimal(10.4)
Format:	99999.9999
Long Name:	Regular integrated cross-sectional weight for SLID
Description:	Regular integrated cross-sectional weight for SLID. This weight is valid for cross-sectional estimates using the Survey of Labour and Income Dynamics only and is available for all years of that survey, i.e., 1993 onwards. See also variable ICSWT26. Note that the SLID sample consisted of only one panel of respondents from 1993 to 1995, while since 1996 it consists of two panels of respondents; the weight takes this into account.

This is an integrated weight, which is to say that all persons in the same household receive the same weight. For estimates of families or households, the weight is counted once for each family or household.

Most recent revisions:
With the release of data for 2003, the weights were revised for 1993 to 2002. With this revision a new calibration strategy was implemented which included adding the number of earners as an additional dimension of the calibration. The number of earners was obtained from the Canada Revenue Agency T4 files. In addition, population control totals used in the calibration were updated based on the 2001 census.

With the release of data for 2004, the weights were revised for 2003. The calibration of the original weights for 2003 used modeled T4 data because the final T4 data was not yet available. The revision of the 2003 weights the following year (with the release of data for 2004), used the final T4 data in the calibration step.

With the release of data for 2005, the weights were revised for 2004. The calibration of the original weights for 2004 used modeled T4 data because the final T4 data was not yet available. The revision of the 2004 weights the following year (with the release of data for 2005), used the final T4 data in the calibration step.
With the release of data for 2010, the weights for years 2006 to 2009 were revised to take into account the population counts based on the 2006 Census of Population, instead of the 2001 Census.

Population:	All persons

Theme/Subtheme: 03510 Personal characteristics - Geography - Geographic area

uszga25

Start Position:	25
Type/Length:	Character(1)
Long Name:	Adjusted size of area of residence
Description:	Adjusted size of area of residence is assigned according to the variable CMAPO (CMA/CA population). However, if the household is not in a CMA/CA, the USZGA code depends on the variable URBPO (Population of area of residence) and USZGA is equal to the variable URBSZG (Size of area of residence).

Notes: Reference years prior to 1999 follow the 1991 Census geography-base boundaries. Reference years from 1999 to 2004 follow the 2001 Census geography-base boundaries and reference years 2005 and on follow the 2006 Census geography-base boundaries. The categories for USZGA are the same. Rural areas outside of CMAs or CAs can include some small population centres. CAs with less than 30,000 inhabitants include population centres with less than 10,000 inhabitants.

Population:	All households
Source Question:	DEC31HH.CMAPO25 or DEC31HH.URBPO25
Processing:	If CMACA25 is not (000, 996, 997, 999) then get the CMAPO25 and assign accordingly the appropriate codes to USZGA25. If CMACA25 is (000, 996, 997, 998, 999) then USZGA25=URBSZG25.

Income and Expenditures

limsda25

Start Position:	28
Type/Length:	Decimal(5.1)
Format:	999.9
Long Name:	Depth of low income based the after-tax low income measure (LIM)
Description:	Depth of low income based on the LIM (after tax) for the reference year. For those households with after-tax incomes below the LIM (after tax) threshold, the depth of low income is the difference between their after-tax income and their LIM (after tax) threshold, expressed as a percentage of that threshold. Values of 0 indicate that the after-tax income is equal to the LIM (after tax); values greater than 0 indicate that the after-tax income is lower than the LIM (after tax). If household after-tax income is less than 0, this variable is set to 100.
	With the release of data for 2010, this variable was revised for the years 2006 to 2009. This is due to the revision of the weights to take into account the population counts based on the 2006 Census of Population, instead of the 2001 Census.

Theme/Subtheme: 03630 Personal characteristics - Family and household characteristics - Economic family - size and type

fmtyp27

Start Position:	48
Type/Length:	Character(2)
Long Name:	Economic family type reference person
Description:	Economic family type. An economic family is composed of two or more persons living together who are related by blood, marriage, adoption or common-law. This variable is set using the major income earner in the economic family as the reference person. To reduce the length of the category descriptions, the following terms are used:

UNATTACHED INDIVIDUAL: While the definition of economic family does not include persons who do not live with a relative, such persons (called unattached individuals) are assigned an economic family id. If desired, data users can use this variable to separate unattached individuals from economic families.

ELDERLY: The major income earner in the economic family is aged 65 or over.

Spouse: The partner living with the major income earner in the family, including married, common-law and same-sex relationships.

MARRIED COUPLE: The major income earner and his/her spouse.

RELATIVE: A person related to the major income earner by blood, marriage, adoption or common-law.

CHILDREN: The family includes at least one child (birth, adopted, step, or foster) of the major income earner under age 18. Other relatives may also be in the family. Children of guardians are not considered "children" in this classification. In other words, older relatives are not treated as de facto parents when there is no direct parent identified.

LONE-PARENT FAMILY: Includes at least one child as defined above. Families where the parent is 65 years or older are excluded.

OTHER RELATIVE: A person in the economic family who is not the major income earner nor his/her spouse or child under age 18. Children aged 18 or over are considered to be "other relatives".

Population:	All economic families

Theme/Subtheme: 01200 Sample control - Weights

wtcsld26

Start Position:	16
Type/Length:	Decimal(10.4)
Format:	99999.9999
Long Name:	Regular integrated cross-sectional weight for SLID
Description:	Regular integrated cross-sectional weight for SLID. This weight is valid for cross-sectional estimates using the Survey of Labour and Income Dynamics only and is available for all years of that survey, i.e., 1993 onwards. See also variable ICSWT26. Note that the SLID sample consisted of only one panel of respondents from 1993 to 1995, while since 1996 it consists of two panels of respondents; the weight takes this into account.

This is an integrated weight, which is to say that all persons in the same household receive the same weight. For estimates of families or households, the weight is counted once for each family or household.

Most recent revisions:
With the release of data for 2003, the weights were revised for 1993 to 2002. With this revision a new calibration strategy was implemented which included adding the number of earners as an additional dimension of the calibration. The number of earners was obtained from the Canada Revenue Agency T4 files. In addition, population control totals used in the calibration were updated based on the 2001 census.

With the release of data for 2004, the weights were revised for 2003. The calibration of the original weights for 2003 used modeled T4 data because the final T4 data was not yet available. The revision of the 2003 weights the following year (with the release of data for 2004), used the final T4 data in the calibration step.

With the release of data for 2005, the weights were revised for 2004. The calibration of the original weights for 2004 used modeled T4 data because the final T4 data was not yet available. The revision of the 2004 weights the following year (with the release of data for 2005), used the final T4 data in the calibration step.
With the release of data for 2010, the weights for years 2006 to 2009 were revised to take into account the population counts based on the 2006 Census of Population, instead of the 2001 Census.

Population:	All persons

Theme/Subtheme: 01200 Sample control - Weights

wtcsld26

Start Position:	23
Type/Length:	Decimal(10.4)
Format:	99999.9999
Long Name:	Regular integrated cross-sectional weight for SLID
Description:	Regular integrated cross-sectional weight for SLID. This weight is valid for cross-sectional estimates using the Survey of Labour and Income Dynamics only and is available for all years of that survey, i.e., 1993 onwards. See also variable ICSWT26. Note that the SLID sample consisted of only one panel of respondents from 1993 to 1995, while since 1996 it consists of two panels of respondents; the weight takes this into account.

This is an integrated weight, which is to say that all persons in the same household receive the same weight. For estimates of families or households, the weight is counted once for each family or household.

Most recent revisions:
With the release of data for 2003, the weights were revised for 1993 to 2002. With this revision a new calibration strategy was implemented which included adding the number of earners as an additional dimension of the calibration. The number of earners was obtained from the Canada Revenue Agency T4 files. In addition, population control totals used in the calibration were updated based on the 2001 census.

With the release of data for 2004, the weights were revised for 2003. The calibration of the original weights for 2003 used modeled T4 data because the final T4 data was not yet available. The revision of the 2003 weights the following year (with the release of data for 2004), used the final T4 data in the calibration step.

With the release of data for 2005, the weights were revised for 2004. The calibration of the original weights for 2004 used modeled T4 data because the final T4 data was not yet available. The revision of the 2004 weights the following year (with the release of data for 2005), used the final T4 data in the calibration step.
With the release of data for 2010, the weights for years 2006 to 2009 were revised to take into account the population counts based on the 2006 Census of Population, instead of the 2001 Census.

Population:	All persons

Theme/Subtheme: 03140 Personal characteristics - Demographics - Family situation

mjice26

Start Position:	41
Type/Length:	Character(1)
Long Name:	Flag - Major income earner in the census family, refyear
Description:	Flag indicating whether the person was the major income earner in the census family during the reference year. A person in the same census family as his/her parents cannot be identified as the major income earner, even if his/her total income is the highest among all census family members. For purposes of this variable, the absolute value of total income is used. If more than one person has the same income, the major income earner is defined to be the oldest.
