

## What's New: September 2001

---

Outlined here is a list of changes to all of the products currently shipping from DMTI Spatial™. The page numbers found beside each change refer to the page numbers in the corresponding product User Manuals.

We have added an AutoLoader to all of the DMTI Spatial data and software products. When you insert the CD-ROM into your drive it will automatically run an executable program to help you install our data or software to your machine. Should you choose to accept our License Agreement you will then be prompted for where you would like the software or data to reside on your system.

If you are concerned with staying current with your data, DMTI Spatial offers a Maintenance Program. The DMTI Spatial Maintenance Program lets you focus on your work, knowing that you'll be using the most up-to-date geo-spatial data. Program members automatically receive updates on either a quarterly or annual basis; depending on which program you choose to subscribe to. This allows you to load the data immediately or whenever it fits into your project schedule.

Products covered under the DMTI Spatial Maintenance Program are:

- The CanMap® Family of Products (CanMap® Streetfiles, CanMap® Major Roads & Highways, CanMap® Plus, CanMap® RouteLogistics)
- Postal Geography (Six Digit Postal Code file, Enhanced Postal Code File & Forward Sortation Area (FSA) Boundaries and Data)
- GeoPinpoint™ Geocoding Software for Canada

If there is a product listed here that you have not purchased and would like more information on, please visit our web site at [www.dmtispatial.com](http://www.dmtispatial.com), email us at [info@dmtdispatial.com](mailto:info@dmtdispatial.com) or phone us on our toll free number at 1-877-477-3684.

### CanMap® Streetfiles V5.1 and CanMap® RouteLogistics V5.1

- Street names for communities 1,000+ population<sup>1</sup>
- Street addressing for communities 2,000+ population<sup>1</sup>
- Addition of Iqaluit, the capital of Canada's newest territory, Nunavut, to Topographic coverage (1:250,000 scale)

### CanMap® RouteLogistics V5.1

- New - Relative Elevation Nodes  
This layer will replace the previous Node (nde) layer. The new Relative Elevation (ren) structure is similar to the previous Node (nde) layer but with the addition of 4 new fields (Page 19)
- Addition of more Highway Exit numbers (Page 11-16)
- Addition of "Collector to Express" and "Express to Collector" Exit Points (on the Highway 401 Expressway series)

---

<sup>1</sup> Where source data is available

## **CanMap® Major Roads and Highways V5.1**

- The new "Populated Placenames" were bundled with CanMap V5.0. This was well received by our clients and as a result they are now a permanent inclusion in CanMap® Major Roads and Highways (Page 18)

### **Special Bonus:**

Every order of CanMap® includes a free Canada Directory that includes Canada wide boundaries for Area Codes, Time Zones, Provinces, Regional Municipalities, **1996 Census Subdivision boundaries and data** and DMTI Spatial Urban Areas in addition to a coarse water layer. This allows you to instantly and accurately understand where your geography falls within Canada...no more cities floating in space!

## **New Enhanced Points of Interest**

- The Enhanced POI product has been updated. For more information please see our website at: [www.dmtispatial.com](http://www.dmtispatial.com)

## **GeoPinpoint™ Database**

- Additional streets and postal codes have been added to the Georeference Database based on CanMap V5.1
- Addition of Airport Names and Airport Codes

## **Postal Codes**

- Realigned to CanMap® Streetfiles V5.1
- Contains Postal Codes current to August 2001

## **Forward Sortation Areas (FSA)**

- Realigned to CanMap® Streetfiles V5.1 and New DMTI Postal Codes
- Contains FSAs current to August 2001

## **1996 FSA Census Data Reallocated to 2001 FSA boundaries**

- The 1996 Census Data at the FSA level has been reallocated to the current 2001 FSA boundaries.

For specific details on the file you have purchased please refer to your User Manual(s).
